Dear Sirs,

Site Formation and Associated Infrastructural Works for Development of Re: Columbarium, Crematorium and Related Facilities at Sandy Ridge Cemetery Monthly Environmental Monitoring & Audit Report (No.35) - June 2021

We confirmed that the captioned report has complied with the requirement set out in the EM&A Manual, we hereby certify the captioned report pursuant to Specific Condition 3.4 of the Environmental Permit No. FEP-01/534/2017/A and EP-534/2017/A.

Should you have any queries, please feel free to contact the undersigned at Tel: 2959-6059 or Fax: 2959-6079 or Email: twtam@fordbusiness.com.

Yours sincerely, For and on Behalf of Action-United Environmental Services & Consulting (AUES)

T. W. Tam Environmental Team Leader TW/nh

Attention: Mr. HO Man-to

14 July 2021

Dear Sir,

Site formation and Associated Infrastructural Works for Development of Columbarium at Sandy Ridge Cemetery Monthly Environmental Monitoring and Audit Report (No. 35) June 2021

I refer to the email of the ET dated on 14/07/2021 regarding the captioned Monthly Report. According to Section 3.4 of the EP-534/2017/A and the FEP-01/534/2017/A, I hereby verify the Monthly EM&A report for June 2021 with Ref. No. TCS00881/18/600/R0551v2.

You are required to follow up the comments from EPD and IEC on the relevant EPs requirement and reports for our further review as soon as possible.

Yours faithfully,

CH Leung

EXECUTIVE SUMMARY

ES.01. This is the 35th Monthly Environmental Monitoring and Audit (EM&A) Report summarizing the monitoring results and inspection findings under the Project for the period from 1st to 30th June 2021 (the Reporting Month).

ENVIRONMENTAL MONITORING AND AUDIT ACTIVITIES

ES.02. In the Reporting Month, the major construction works under the Project included Contract CV/2016/10 (hereinafter named "Contract 1") and Contract CV/2017/02 (hereinafter named "Contract 2"). Environmental monitoring activities under the EM&A programme in this Reporting Month are summarized in the following table.

| Issues | Environmental Monitoring | Monitorin | Total Occasions/ | |
|-----------------------|--|---|---|------------------------------|
| 135005 | Parameters / Inspection | CV/2016/10 | CV/2017/02 | dates |
| Ain Quality | 1-hour TSP | ASR-1 | ASR-2 | 45 |
| Air Quality | 24-hour TSP | ASK-1 | ASR-3 | 15 |
| Construction Noise | L _{eq (30min)} Daytime | CN-1 CN-2 | CN-3 CN-4 | 20 |
| Water Quality | In-situ measurement and Water sampling | M3 | M1, M2 and M4 | 13 |
| Ecology | Sensitive Habitat | Transect within site area of CV/2016/10 | Transect within site area of CV/2017/02 | 8 th Jun 2021 |
| Landscape & Visual | Site Inspection | Site area of CV/2016/10 | Site area of CV/2017/02 | 17 th Jun 2021 |
| Inspection | Environmental Team (ET) Regular Environmental Site Inspection | Site area of | Site area of | 5 |
| & Âudit | Independent Environmental Checker (IEC) Monthly Environmental Site Audit | | CV/2017/02 | 1 |

 Table ES-1
 Summary of EM&A Programme in the Reporting Month

BREACH OF ACTION AND LIMIT (A/L) LEVELS

ES.03. In the Reporting Month, no exceedance of air quality, noise monitoring was recorded. For water quality monitoring, **29** Limit level non-project related exceedances and no Action Level were recorded. The statistics of environmental exceedance, Notification of Exceedance (NOE) issued and investigation of exceedance are summarized in the following table.

 Table ES-2
 Breach of Action and Limit (A/L) Levels in the Reporting Month

| Environmental Monitoring Action Limit Event & Action | | | | : Action | |
|--|---------------------------------|-------|-------|-------------------------------|---------------------------|
| Issues | Parameters | Level | Level | Investigation Findings | Corrective Actions |
| Air Quality | 1-hour TSP | 0 | 0 | - | - |
| Air Quality | 24-hour TSP | 0 | 0 | - | - |
| Construction Noise | Leq _{30min} Daytime | 0 | 0 | - | - |
| | DO | 0 | 0 | - | - |
| Water Quality | Turbidity | 0 | 13 | Not project related | - |
| Water Quanty | Suspended Solids (SS) | 0 | 16 | Not project related | - |

Note: NOE – *Notification of Exceedance*

ES.04. In the Reporting Month, 29 Limit level water quality exceedances, namely 13 exceedance of turbidity and 16 exceedances of SS were recorded at M1, M2 and M4. According to the weather information from the HKO, there was heavy rainstorm intermittently during the days of exceedance recorded. Under the impact of rainstorm, the water quality of the watercourse was deteriorated by the stirred up sediment and runoff from the surrounding environment. According to the Contractor's work programme, there were construction activities on Lin Ma Hang Road and Man Kam To Road, but no works were carried out near locations M1, M2 and M4. It was concluded that

the exceedances were likely related to the impact of rainstorm and not caused by the work under the project.

- ES.05. Monthly ecological monitoring for sensitive habitat for area of Contract 1 and Contract 2 were undertaken on 8^{th} June 2021. After analysing survey results in June 2019 to 2021, it is found that the species diversity in Contract 1 reduced in wetland habitat and the reduction could be due to natural fluctuation. For Contract 2, there was no significant drop in species diversity for both non-wetland and wetland habitats, but the species richness in both non-wetland and wetland area were slightly decreased, it could be due to natural fluctuation. Good practice during construction is required to prevent environmental contamination as well as unnecessary site clearance. Continuous monitoring is also recommended to inspect any significant decrease in species diversity.
- ES.06. Landscape and visual inspection at both Contracts were undertaken on 17th June 2021. The Contractor was reminded to prevent the construction material pile within Tree Protection Zone and ensure no works is allowed within the TPZ.

ENVIRONMENTAL COMPLAINT

ES.07. No environmental complaint was received in this Reporting Period.

Table ES-3Environmental Complaint Summaries in the Reporting Month

| Reporting Month | | Environmental Complaint Statistics | | | |
|------------------------------|------------|------------------------------------|------------|-------------------------|--|
| | | Frequency | Cumulative | Complaint Nature | |
| $1^{st} - 30^{th}$ June 2021 | Contract 1 | 0 | 1 | Air Quality | |
| 1 - 50 Julie 2021 | Contract 2 | 0 | 2 | Air Quality | |

NOTIFICATION OF SUMMONS AND SUCCESSFUL PROSECUTIONS

ES.08. No environmental summons or successful prosecution was recorded in this Reporting Month. The statistics of summons or successful prosecutions are summarized in the following tables.

Table ES-4 Environmental Summons Summaries in the Reporting Month

| Reporting Month | | Environmental Summons Statistics | | | |
|------------------------------|------------|----------------------------------|------------|----------------|--|
| | | Frequency | Cumulative | Summons Nature | |
| $1^{st} - 30^{th}$ June 2021 | Contract 1 | 0 | 0 | NA | |
| 1 - 50 June 2021 | Contract 2 | 0 | 0 | NA | |

Table ES-5 Environmental Prosecution Summaries in the Reporting Month

| Reporting Month | | Environmental Prosecution Statistics | | | |
|------------------------------|------------|--------------------------------------|------------|---------------------------|--|
| | | Frequency | Cumulative | Prosecution Nature | |
| $1^{st} - 30^{th}$ June 2021 | Contract 1 | 0 | 0 | NA | |
| 1 - 30 Julie 2021 | Contract 2 | 0 | 0 | NA | |

ES.09. In addition, no complaint and emergency event relating to violation of environmental legislation for illegal dumping and landfilling was received.

REPORTING CHANGE

ES.010. No reporting change was made in the Reporting Month.

SITE INSPECTION

ES.011. In the Reporting Month, joint site inspections for Contract 1 to evaluate the site environmental performance were carried out by the Resident Engineer, ET and the Contractor of the Contract 1 on 3^{rd} , 10^{th} , 17^{th} , 23^{rd} and 30^{th} June. Moreover, joint site inspections for Contract 2 by the RE, ET and the Contractor of Contract 2 were carried out on 2^{nd} , 10^{th} , 17^{th} , 23^{rd} and 30^{th} June. IEC attended the both Contract joint site inspection on 17^{th} June 2021. No non-compliance was noted during the site inspections.

FUTURE KEY ISSUES

- ES.012. The Contractors are reminded to pay special attention on water quality mitigation measures and should fully implement the measures as recommended in the EM&A Manual, in particular to prevent surface runoff and other pollutants from flowing to local stream and Conservation Area.
- ES.013. During wet season, the Contractors are reminded to pay special attention on water quality mitigation measures and should fully implement the measures as recommended in the EM&A Manual, in particular to prevent surface runoff and other pollutants from flowing to local stream and Conservation Area.
- ES.014. Construction noise mitigation measures such as use of movable noise barriers and Quality Powered Mechanical Equipment should be properly provided to reduce construction noise impact, where appropriate.
- ES.015. The Contractors should properly maintain the cleanliness and tidiness of the site. In addition, mosquito control should be performed to prevent mosquito breeding on site.

1. INTRODUCTION

1.1 PROJECT BACKGROUND

1.1.1 Civil Engineering and Development Department (CEDD) is the Project Proponent for the Project "Site Formation and Associated Infrastructural Works for Development of Columbarium, Crematorium and Related Facilities at Sandy Ridge Cemetery". The Project is a Designated Project to be implemented under Environmental Permit No. EP-534/2017/A and FEP-01/534/2017/A. The layout plan of the Project is shown in Appendix A. Major works to be executed under the Project shall include to the following:

A Designated Works under EP-534/2017/A

- (i) Site formation of about 8 hectares of land and associated drainage, sewerage and landscape works for development of Columbarium and Crematorium facilities at the Sandy Ridge Cemetery;
- (ii) Construction of a new road (about 600m) including a section of viaduct connecting the platform for Crematorium and Man Kam To Road and the pick-up/drop-off point at Man Kam To Road;
- (iii) Widening of about 900m of the existing Sha Ling Road;
- (iv) Widening of about 1.4km of the existing Lin Ma Hang Road; and
- (v) Improvement works to the existing barging point at Siu Lam

Non-Designated Works

- (i) Construction of a sewage detention tank complete with odour and septicity control mechanism;
- (ii) Construction of noise barriers along Sha Ling Road;
- (iii) Construction of a new Refuse Collection Point (RCP) near the junction between Man Kam To Road and Sha Ling Road;
- (iv) Landscaping works (including both hard and soft landscape works);
- (v) Associated tree felling, transplanting and compensatory planting works;
- (vi) Associated street lighting, street furniture and road marking, etc.; and
- (vii) Other works which are specified in PS of the Contract.
- 1.1.2 To facilitate the Project management, the Project works were separated into three Contracts to be executed which are described in below sub-sections.
- 1.1.3 Contract No. CV/2016/10 Site Formation and Associated Infrastructural Works for Development of Columbarium at Sandy Ridge Cemetery (hereinafter named "Contract 1"):-
 - Site formation of about 1.77 ha of land for the proposed pick-up and drop-off area for shuttle bus operation;
 - Upgrading of a section of 900m existing Sha Ling Road from 3m wide carriageway to 7.3m wide carriageway with footpath at both sides;
 - Construction of one EVA with a total length of about 160m;
 - Construction of noise barriers along Sha Ling Road;
 - Modification of junction between Man Kam To Road and Sha Ling Road;
 - Construction of a new pick up / drop off point at Man Kam To Road;
 - Relocation and construction of a new refuse collection point near junction between Man Kam To Road and Sha Ling Road;
 - Associated geotechnical works including cut and fill slopes, soil nailing works and retaining structures;
 - Associated drainage, sewerage and waterworks along Sha Ling Road; and
 - Associated landscaping works.
- 1.1.4 Contract No. CV/2017/02 Infrastructural Works at Man Kam To Road and Lin Ma Hang Road for Development of Columbarium at Sandy Ridge Cemetery (hereinafter named "Contract 2"):-
 - Construction of a new road connecting Columbarium site to Crematorium site;
 - Construction of one EVA with a total length of about 300m;
 - Widening of a section of 1.4 km long Lin Ma Hang Road (between Man Kam To Road and Ping Yuen River) from 6m wide carriageway to 7.3m with 2m width footpath on both sides;
 - Provision of a pair of lay-by at Lin Ma Hang Road;
 - Construction of a new vehicular access connecting the Sheung Shui Landmark North PTI and Lung Sum Avenue;

- Construction of covered walkway along Fanling Station Road;
- Removal of planters and central divider along Fanling Station Road and San Wan Road;
- Associated drainage, sewerage, waterworks and utility works along Man Kam To Road and Lin Ma Hang Road;
- Associated geotechnical works including cut and fill slopes, soil nailing works and retaining structures; and
- Associated landscaping works.
- 1.1.5 CEDD Contract No. (to be confirmed):-
 - Site Formation for the platform of the columbarium site;
 - Construction of two 2 at-grade access roads;
 - Construction of road junction between Man Kam To Road and the new access road;
 - Associated drainage, sewerage and waterworks along the two new access roads;
 - Associated geotechnical works including cut and fill slopes, soil nailing works and retaining structures; and
 - Associated landscaping works
- 1.1.6 Hsin Chong Tsun Yip Joint Venture (hereafter referred as "HCTYJV") has been awarded Contract 1 on 5 December 2017. According to the Contract requirement, HCTYJV shall take over the responsibility for part of the Environmental Permit No. EP-534/2017 for ease of management, therefore application for Further Environmental Permit was submitted by HCTYJV to EPD on 26 January 2018 and Further Environmental Permit No. FEP-01/534/2017 was granted to HCTYJV by EPD on 23 February 2018. Furthermore, EPD issued Environmental Permit No. FEP-01/534/2017/A on 24 December 2018.
- 1.1.7 Sang Hing Civil Contractors Company Limited (hereinafter referred as "Sang Hing") was awarded Contract 2 on 23 May 2018. The Contract Works is a Designated Project as under Environmental Permit (EP) No. EP-534/2017. Furthermore, EPD issued Environmental Permit No. EP-534/2017/A on 24 December 2018.
- 1.1.8 Action-United Environmental Services & Consulting (AUES) has been commissioned by the Contractors as an Environmental Team (ET) to implement the Environmental Monitoring and Audit (EM&A) programme in accordance with the approved EM&A Manual as well as the associated duties. As part of the EM&A programme, baseline monitoring to determine the ambient environmental conditions was completed before construction work commencement. The Baseline Monitoring Report (air, noise and water) certified by ET Leader (ETL) and verified by Independent Environmental Checker (IEC) was submitted to Environmental Protection Department (EPD) and it was approved by EPD on 25 October 2018.
- 1.1.9 Major construction work of Contract 1 and Contract 2 was commenced on 16 August 2018 and 5 November 2018 respectively.
- 1.1.10 This is the **35th** Monthly EM&A Report summarizing the monitoring results and inspection findings for the period from **1st** to **30th** June 2021.

1.2 REPORT STRUCTURE

- 1.2.1 The Monthly EM&A Report is structured into the following sections:-
 - Section 1 Introduction Section 2 **Project Organization and Construction Progress** Section 3 Summary of Monitoring Requirements Section 4 Air Quality Monitoring Results Section 5 Noise Monitoring Results Section 6 Water Quality Monitoring Results Section 7 Ecology Monitoring Results Landscape & Visual Section 8 Section 9 Waste Management Section 10 Site Inspections

Section 11 Environmental Complaints and Non-Compliance

- Section 12 Implementation Status of Mitigation Measures
- Section 13 Conclusions and Recommendation

2. PROJECT ORGANIZATION AND CONSTRUCTION PROGRESS

2.1 CONSTRUCTION CONTRACT PACKAGING

- 2.1.1 To facilitate the project management and implementation, the Project was divided by the following contracts:
 - Contract 1 (Contract No. CV/2016/10)
 - Contract 2 (Contract No. CV/2017/02)
 - Contract 3 (Contract No. TBA)
- 2.1.2 Organization structure and contact details of relevant parties with respect to on-site environmental management are shown in *Appendix B*.

2.2 CONSTRUCTION PROGRESS

2.2.1 The three-month rolling construction programme for Contract 1 and Contract 2 are enclosed in *Appendix C*. Construction activities of the Contract 1 and Contract 2 undertaken in the Reporting Month are presented below.

Contract 1 (CV/2016/10)

- General site housekeeping
- Bulk excavation
- Construction of cut slope, installation of soil nailing and construction of surface channel and planter wall
- Construction of fill slope and surface channel
- Construction of pick-up and drop-off Point near Man Kam To Road
- Construction of storm/ sewer drain
- Laying of street lighting ducts
- Laying of watermains
- Construction of Refuse Collection Point.

Contract 2 (CV/2017/02)

- Construction of Manhole, gullies, drainage pipe at Lin Ma Hang Road between CH50-160 Southbound & CH780-890 Northbound & CH1345-1377 Northbound.
- Construction of Jacking Pit for DN400 watermain by trenchless method at Man Kam To Road
- DN400 DI Watermain works in approx. CH300-1040 at Man Kam To Road North Slow Lane
- Soil Nail Works at Lin Ma Hang Road Slope C224 & C231.
- Construction of Manhole, gullies, drainage pipe at Sandy Ridge Road E CH180-300 (~120m)
- Construction of Manhole, gullies, drainage pipe at Sandy Ridge Road F CH690-730 (~40m)
- Backfilling of Retaining Wall 12
- Fanling Station Road Covered Walkway
- Lung Sum Avenue road surface modification works

2.3 SUMMARY OF ENVIRONMENTAL SUBMISSIONS

2.3.1 Summary of the relevant permits, licenses, and/or notifications on environmental protection for the Project in this Reporting Month is presented in *Tables 2-1 and 2-2*.

| Item | Description | License/ Permit ref no. | License/ Permit Status |
|------|--------------------------------|-----------------------------------|---------------------------|
| 1 | Air Pollution Control | Ref. no. 428909 | Valid |
| | (Construction Dust) Regulation | Acknowledged by EPD on 20/12/2017 | |
| 2 | Chemical waste Producer | WPN: 5231-641-H3937-01 | Valid |
| | Registration | Issued by EPD on 27/03/2018 | |
| 3 | Water Pollution Control | License no. WT00030795-2018 | Valid |
| | Ordinance | Issued date: 9/5/2018 | |
| | | Expire Date: 31/5/2023 | |

2.4 SUMMARY OF SUBMISSION UNDER THE ENVIRONMENTAL PERMIT REQUIREMENTS

2.4.1 *Tables 2-3 to 2-4* summarized the submission status under the EP and/or FEP stipulation in the Reporting Month.

Table 2-3Status of Submission as under FEP

| Item | EP and / or FEP Stipulation | Description | Status |
|------|--------------------------------|---|--|
| 1 | | Management organization of : i) the main construction companies; ii) ET; and iii) IEC and the supporting team | Submitted and no approval is required. |
| 2 | | i) Detailed phasing programme of all construction works; and ii) Location plan of all construction works | Submitted and no approval is required. |

| Item | EP and / or FEP Stipulation | Description | Status |
|------|--------------------------------|---|---|
| 3 | Condition 2.12 of FEP | Contamination Assessment Plan (CAP) | Approved by EPD on 27 May 2019 |
| 4 | Condition 2.13 of FEP | Grassland Reinstatement Plan | Pending approval |
| 5 | Condition 2.14 to 2.16 of FEP | Vegetation Survey Report and Vegetation Transplantation Proposal for Contract 1 | Approved by EPD on 12 October 2018 |
| 6 | Condition 2.17 of FEP | Woodland Compensation Plan (Rev.05) | Approved by EPD on 30 Jun 2020 |
| 7 | Condition 2.18 of FEP | Monitoring and Survey Plan for Golden-headed Cisticola for Contract 1 (Rev.02) | Approved by EPD on 22 Oct 2019 |
| 8 | Condition 2.20 of FEP | Landscape & Visual Mitigation and Tree Preservation Plan(s) Contract 1 (Rev.04) | Pending approval |
| 9 | Condition 2.22 of FEP | Traffic Noise Mitigation Plan Contract 1 (Rev. 4) | Pending approval |
| 10 | Condition 3.3 of the FEP | Baseline Monitoring Report (Air, Noise and Water) | Approved by EPD on 25 October 2018 |
| 11 | Condition 4.2 of the FEP | The Contract Internet website | Internet website address has notified EPD on 15 Jun 2018 and no approval is required. |

Table 2-4Status of Submission as under EP

| Item | EP and / or FEP Stipulation | Description | Status |
|------|--------------------------------|---|--|
| 1 | Condition 2.10 of EP | Management organization of : i) the main construction companies; ii) ET; and iii) IEC and the supporting team | Submitted and no approval is required. |
| 2 | Condition 2.11 of EP | i) Detailed phasing programme of all construction works; and ii) Location plan of all construction works | Submitted and no approval is required. |
| 3 | Condition 2.12 of EP | Layout Plan for the proposed footpath at Lin Ma Hang Road | Pending approval |
| 4 | Condition 2.13 of EP | Contamination Assessment Plan (CAP) | Approved by EPD on 27 May 2019 |
| 5 | Condition 2.14 of EP | Grassland Reinstatement Plan | Pending approval |
| 6 | Condition 2.15 to 2.17 of EP | Vegetation Survey Report and Vegetation Transplantation Proposal under Contract 2 | Pending approval |
| 7 | Condition 2.18 of EP | Woodland Compensation Plan (Rev.05) | Approved by EPD on 30 Jun 2020 |
| 8 | Condition 2.19 of EP | Monitoring and Survey Plan for Golden-headed Cisticola Contract 2 | Pending approval |
| 9 | Condition 2.21 – 2.22 of EP | Landscape & Visual Mitigation and Tree Preservation Plan(s) Contract 2 | Pending approval |
| 10 | Condition 2.23 of EP | Traffic Noise Mitigation Plan Contract 2 | Pending approval |
| 11 | Condition 3.3 of the EP | Baseline Monitoring Report (Air, Noise and Water) | Approved by EPD on 25 October 2018 |
| 12 | Condition 4.2 of the EP | The Contract Internet website | Internet website address has notified EPD on 15 June 2018 and no approval is required. |

3. SUMMARY OF IMPACT MONITORING REQUIREMENT

3.1 GENERAL

- 3.1.1 The EM&A requirements are set out in the Approved EM&A Manual. Environmental issues such as air quality, construction noise, water quality and ecology were identified as the key issues during the construction phase of the Project.
- 3.1.2 A summary of construction phase EM&A requirements are presented in the sub-sections below.

3.2 MONITORING PARAMETERS

- 3.2.1 The EM&A impact monitoring shall cover the following environmental aspect:
 - Air quality;
 - Construction noise;
 - Water quality;
 - Ecology; and
 - Landscape and visual

3.2.2 A summary of the monitoring parameters is presented in *Table 3-1* below

Table 3-1Summary of EM&A Requirements

| Environmental Issue | Parameters | |
|---------------------|---|--|
| Air Quality | 1-hour TSP;24-hour TSP | |
| Noise | Leq_(30min) during normal working hours.; and Leq_(15min) during the construction works undertaken in Restricted Hours | |
| Water Quality | In-situ Measurements Dissolved Oxygen Concentration (mg/L) & Saturation (%); Temperature (°C); Turbidity (NTU); Salinity (ppm) pH unit; Water depth (m); and Stream Flow Velocity (m/sec). Laboratory Analysis Suspended Solids (mg/L) | |
| Ecology | Ecologically sensitive habitats (wetland habitats and non-wetland habitats) | |

3.3 MONITORING LOCATIONS

- 3.3.1 According to the Approved EM&A Manual of the Project *Site Formation and Associated Infrastructural Works for Development of Columbarium, Crematorium and Related Facilities at Sandy Ridge Cemetery*, the designated monitoring locations for air quality, noise, water quality and ecology under the monitoring programme, is shown in *Appendix D*.
- 3.3.2 Since the Project was divided into three Works Contracts and all Contracts will be commenced at different time, the construction phase impact monitoring will only be performed at the Contract-related monitoring stations upon commencement of each Contract Works.

Air Quality

3.3.3 There were three (3) designated air quality monitoring stations recommended in the Approved EM&A Manual Section 5.6.1.1. There was proposed relocation of air quality monitoring location ASR-3 in October 2018 since the landlord refused to set up the HVS at his premises and nearby Conservation Area due to noise nuisance and Muk Wu Nga Yiu House No. 2A was proposed as alternative location ASR-3a. The proposal dated on 9 November 2018 which verified by IEC was submitted to EPD for approval. Based on rationale in Section 3.3.2, the Contract-related air quality monitoring location for construction phase were summarized in *Table 3-2* and illustrated in *Appendix D*.

| Location ID | Description in EM&A Manual | Location | Related Work Contract |
|----------------|--|--------------------------------|-----------------------------|
| ASR-1 | Village House along Man Kam To Road | Sha Ling Village House No.6 | Contract 1 |
| ASR-2 | Village House at San Uk Ling | San Uk Ling Village House No.1 | Contract 2 |
| ASR-3 | Village House at Muk Wu Nga Yiu | Muk Wu Nga Yiu House No.28 | Contract 2 |
| ASR-3a (#) | Village House at Muk Wu Nga Yiu | Muk Wu Nga Yiu House No.2A | Contract 2 |

Table 3-2 Designated Air Quality Monitoring Location under the Project

Remark: (#) There was proposed relocation of air quality monitoring location ASR-3 in October 2018. The proposal dated on 9 November 2018 after verified by IEC was submitted to EPD for approval.

3.3.4 If the designated monitoring location is required to relocate, alternative monitoring location shall agree with IEC and seek for EPD approval which shall meet the following criteria:

- i) Be at the site boundary or such locations close to the major dust emission source;
- ii) Close to the sensitive receptors;
- iii) Take into account the prevailing meteorological conditions;
- iv) For monitoring location located in the vicinity of the ASRs, care shall be taken to cause minimal disturbance to the occupants during monitoring.
- v) When positioning the HVS, the following points shall be noted:
 - a. a horizontal platform with appropriate support to secure the samples against gusty wind shall be provided;
 - b. no two samplers shall be placed less than 2m apart;
 - c. the distance between the HVS and an obstacle, such as buildings, must be at least twice the height that the obstacle protrudes above the HVS;
 - d. a minimum of 2 m separation from walls, parapets and penthouses is required for HVS at the rooftop;
 - e. a minimum of 2 m separation from any supporting structure, measures horizontally is required;
 - f. no furnace or incinerator flue is nearby;
 - g. airflow around the sampler is unrestricted;
 - h. the HVS is more than 20 m from the dripline;
 - i. any wire fence and gate to protect the HVS, shall not cause any obstruction during monitoring;
 - j. permission must be obtained to set up the HVS and to obtain access to the monitoring stations; and
 - k. a secured supply of electricity is needed to operate the HVS.

Construction Noise

3.3.5 There were four (4) designated noise monitoring locations recommended in the Approved EM&A Manual Section 6.5.1.1. Based on rationale in Section 3.3.2, the Contract-related noise quality monitoring location for construction phase were summarized in *Table 3-3* and illustrated in *Appendix D*.

 Table 3-3
 Designated Construction Noise Monitoring Location under the Project

| Locatio n ID | Description in EM&A Manual | Location | Related Work Contract |
|-----------------|-------------------------------|--|-----------------------------|
| CN-1 | Village house to the west of | Village house to the west of Sha Ling | Contract 1 |
| | Sha Ling Road | Road (free field condition) | |
| CN-2 | Village house to the north of | Sha Ling Village House No. 25 (free | Contract 1 |
| | Man Kam To Road | field condition) | & 3 |
| CN-3 | Village house near San Uk | San Uk Ling Village House No. 18 (free | Contract 2 |
| | Ling | field condition) | |
| CN-4 | Village house of Muk Wu | Muk Wu Village House No. 267 (1m | Contract 2 |
| | | façade from the building) | |

Water Quality

3.3.6 There were four (4) water quality monitoring locations recommended in the Approved EM&A Manual Section 7.6.1.2. The locations and coordinates of water quality monitoring were listed in *Table 3-4*. Based on rationale in Section 3.3.2, the Contract-related water quality monitoring location for construction phase were summarized in *Table 3-4* and illustrated in *Appendix D*.

| Proposed | Co-ore | linates | Description | Related Work |
|-------------|---------|---------|--|---------------------|
| Location ID | North | East | Description | Contract |
| M1 | 843 431 | 831 308 | Midstream of Nam Hang Stream | Contract 2 |
| M2 | 843 840 | 831 101 | Downstream of Nam Hang Stream | Contract 2 |
| M3 | 843 509 | 830 040 | Wetland in the Conservation Area near Yuen Leng Chai | Contract 1 |
| M4 | 843 997 | 831 783 | Watercourse across Lin Ma Hang Road, running from east of San Uk Ling to Man Kam To Boundary Control Point | Contract 2 |

Table 3-4Designated Water Quality Monitoring Stations under the Project

3.4 MONITORING FREQUENCY AND PERIOD

3.4.1 The requirements of impact monitoring were stipulated in *Sections 5.8.1.1, 6.7.1.1* and *7.8.1.4* of the approved *EM&A Manual* and presented as follows.

Air Quality Monitoring

- 3.4.2 Monitoring frequency for air quality impact monitoring is as follows:
 - 1-Hour TSP 3 sets of 1-hour TSP monitoring shall be carried out once every six days during construction periods
 - 24-Hour TSP 24-hour TSP monitoring shall be carried out every six days during construction periods

Noise Monitoring

3.4.3 Noise impact monitoring shall be carried out once per week during construction periods. The noise measurement for the time period between 0700 and 1900 hours shall be measured in terms of L_{eq} (30 minutes) or 6 sets of L_{eq} (5mins).

Water Quality Monitoring

3.4.4 The monitoring frequency shall be 3 days per week during construction phase and the interval between two sets of monitoring shall not be less than 36 hours.

3.5 MONITORING EQUIPMENT

3.5.1 The monitoring equipment using for the EM&A program as proposed by the ET shall be verified by the IEC.

Air Quality Monitoring

- 3.5.2 The 24-hour and 1-hour TSP levels shall be measured by following the standard high volume sampling method as set out in the *Title 40 of the Code of Federal Regulations, Chapter 1 (Part 50), Appendix B*. If ET proposes to use a direct reading dust meter to measure 1-hour TSP levels, it shall submit sufficient information to IEC for approval.
- 3.5.3 The filter paper of 24-hour TSP measurement shall be determined by HOKLAS accredited laboratory.
- 3.5.4 All equipment used by ET for air quality monitoring is listed in *Table 3-5*.

| Table 3-5 | Air Quality Monitoring Equipment |
|-----------|----------------------------------|
|-----------|----------------------------------|

| Equipment | Model | |
|--------------------------------|---|--|
| 24-hour TSP | | |
| High Volume Air Sampler (HVAS) | TISCH High Volume Air Sampler, HVS Model TE-5170 | |
| Calibration Kit | TISCH Model TE-5025A | |
| 1-Hour TSP | | |
| Portable Dust Meter | Sibata LD-3 Laser Dust monitor Particle Mass Profiler & Counter | |

 $Z: \label{eq:loss} 2018 \ CV-2016-10) \ 600 \ EM\&A \ Report \ Submission \ Monthly \ Report \ 2021 \ 35th \ Month \ (Jun \ 2021) \ R0551v2. doc \ R0551v2. \ R0551v$

Wind Data Monitoring Equipment

- 3.5.5 According to the approved EM&A Manual, wind data monitoring equipment shall also be provided and set up for logging wind speed and wind direction near the dust monitoring locations. The equipment installation location shall be proposed by the ET and agreed with the IEC. For installation and operation of wind data monitoring equipment, the following points shall be observed:
 - 1) The wind sensors should be installed 10 m above ground so that they are clear of obstructions or turbulence caused by buildings.
 - 2) The wind data should be captured by a data logger. The data shall be downloaded for analysis at least once a month.
 - 3) The wind data monitoring equipment should be re-calibrated at least once every six months.
 - 4) Wind direction should be divided into 16 sectors of 22.5 degrees each.
- 3.5.6 ET has liaised with the premises owners/ landlords to grant the permission for the HVS installation. However, they rejected to set up wind data monitoring equipment installation in their premises.
- 3.5.7 Under this situation, the ET proposed to obtain representative wind data from the Hong Kong Observatory Ta Kwu Ling Weather Station. Ta Kwu Ling Station is located near the Project site which situated at the sea level above 15mPD and the wind data monitoring equipment is installed 10 m above the existing ground.

Noise Monitoring

- 3.5.8 Sound level meter in compliance with the International Electrotechnical Commission Publications 651: 1979 (Type 1) and 804: 1985 (Type 1) specifications shall be used for carrying out the noise monitoring. The sound level meter shall be checked using an acoustic calibrator. The wind speed shall be checked with a portable wind speed meter capable of measuring the wind speed in ms⁻¹ before each noise monitoring event. Noise measurements should not be made in fog, rain, wind with a steady speed exceeding 5 m s⁻¹ or wind with gusts exceeding 10 m s⁻¹.
- 3.5.9 Noise monitoring equipment used for impact monitoring is listed in *Table 3-6*.

| Equipment | Model |
|-------------------------------|----------------------------------|
| Integrating Sound Level Meter | Rion NL-52 Sound Level Meter |
| Calibrator | Rion NC-73 Acoustical Calibrator |
| Portable Wind Speed Indicator | Testo Anemometer |

Table 3-6Noise Monitoring Equipment

3.5.10 Sound level meters listed above comply with the *International Electrotechnical Commission Publications 651: 1979 (Type 1)* and *804: 1985 (Type 1)* specifications, as recommended in TM issued under the NCO.

Water Quality Monitoring

3.5.11 Water quality parameters include dissolved oxygen, water temperature & depth, turbidity, salinity, pH and stream flow velocity shall be measured *in-situ*, and suspended solids shall be analyzed by a HOKLAS-accredited testing laboratory.

Dissolved Oxygen and Temperature Measurement

- 3.5.12 The dissolved oxygen (DO) measuring instruments should be portable and weatherproof. The equipment should also complete with cable and sensor, and DC power source. It should be capable of measuring:
 - A DO level in the range of 0 20 mg/L and 0 200% saturation; and
 - A temperature of 0 45 degree Celsius.
- 3.5.13 The equipment should have a membrane electrode with automatic temperature compensation complete with a cable.

3.5.14 Should salinity compensation not be built-in to the DO equipment, in-situ salinity should be measured to calibrate the DO measuring instruments prior to each measurement.

Turbidity Measurement

3.5.15 The turbidity measuring instruments should be a portable and weatherproof with DC power source. It should have a photoelectric sensor capable of measuring turbidity level between 0–1000 NTU (for example, Hach model 2100Q or an approved similar instrument).

Salinity Measurement

3.5.16 A portable salinometer capable of measuring salinity in the range of 0–40 parts per thousand (ppt) should be provided for measuring salinity of the water at each monitoring location.

<u>pH Measurement</u>

3.5.17 A portable pH meter capable of measuring a range between 0.0 and 14.0 should be provided to measure pH under the specified conditions accordingly to the APHA Standard Methods.

Water Depth Measurement

3.5.18 A portable, battery-operated echo sounder or an approved similar instrument should be used for water depths determination at each designated monitoring station.

Stream Flow Velocity Equipment

3.5.19 Since the EM&A Manuals do not specified instrument to use stream flow velocity measurement, the monitoring of stream flow velocity is therefore proposed to be conducted by using a flow probe which is a digital water velocity meter.

Water Sampling Equipment

- 3.5.20 A water sampler is required for suspended solid (SS) monitoring. A water sampler e.g. Kahlsico Water Sampler, which is a transparent PVC cylinder with capacity not less than 2 litres, will be used for water sampling if water depth over than 0.5m.
- 3.5.21 For sampling from very shallow water depths e.g. <0.5 m, water sample will be collected from water surface below 100mm using plastic bottle to avoid inclusion of bottom sediment or humus. Moreover, Teflon/stainless steel bailer or self-made sampling buckets maybe used for water sampling. The equipment used for sampling will be depended the sampling location and depth situations.

Sample Containers and Storage

- 3.5.22 Water samples for suspended solid should be stored in high density polythene bottles with no preservative added, packed in ice (cooled to 4°C without being frozen) and delivered to the laboratory within 24 hours of collection and be analyzed as soon as possible after collection.
- 3.5.23 Analysis of suspended solids should be carried out in a HOKLAS or other accredited laboratory. Water samples of about 1L should be collected at the monitoring stations for carrying out the laboratory suspended solids determination. The SS determination work should start within 24 hours after collection of the water samples. The SS analyses should follow the *APHA Standard Methods* 2540D with Limit of Reporting of 2 mg/L.
- 3.5.24 Details of the equipment used for water quality monitoring are listed in *Table 3-7* below.

Table 3-7Water Quality Monitoring Equipment

| Equipment | Model |
|------------------------|---|
| Water Depth Detector | Tape measures |
| Water Sampler | A 2-litre transparent PVC cylinder with latex cups at both ends or Teflon/stainless steel bailer or self-made sampling bucket |
| Thermometer & DO meter | YSI Professional DSS/ YSI 550A |
| pH meter | AZ8685 pH meter / YSI Professional DSS |

| Equipment | Model |
|----------------------|---|
| Turbidimeter | Hach 2100Q/ YSI Professional DSS |
| Salinometer | Atago refractometer Atago S Salinity Meter / YSI Professional DSS |
| Stream Flow Velocity | FP211 Global Flow Probe |
| Sample Container | High density polythene bottles (provided by laboratory) |
| Storage Container | 'Willow' 33-litter plastic cool box with Ice pad |

3.5.25 Furthermore, Suspended solids (SS) analysis was carried out by *ALS Technichem (HK) Pty Ltd*. Which is one a local HOKLAS-accredited laboratory

3.6 EQUIPMENT CALIBRATION

- 3.6.1 The HVAS is operated and calibrated on a regular basis in accordance with the manufacturer's instruction using Tisch Calibration Kit Model TE-5025A. Calibration would carry out at fortnightly interval. The calibration data are properly documented and the records are maintained by ET for future reference. Furthermore, Tisch Calibration Kit will be calibrated by the manufacturer in yearly basis.
- 3.6.2 The 1-hour TSP meter calibrated by a local HOKLAS-accredited laboratory would be undertaken in yearly basis. Zero response of the equipment was checked before and after each monitoring event.
- 3.6.3 The sound level meter and acoustic calibrator are calibrated and certified by a laboratory accredited under HOKLAS or any other international accreditation scheme at yearly basis.
- 3.6.4 The multi-parameter Water Quality Monitoring System is calibrated by HOKLAS accredited laboratory of three month intervals.
- 3.6.5 All updated calibration certificates of the monitoring equipment used for the impact monitoring program in this Reporting Month are attached in *Appendix E*.

3.7 DATA MANAGEMENT AND DATA QA/QC CONTROL

- 3.7.1 The impact monitoring data are handled by the ET's systematic data recording and management, which complies with in-house Quality Management System. Standard Field Data Sheets (FDS) are used in the impact monitoring program.
- 3.7.2 The monitoring data recorded in the equipment e.g. 1-hour TSP meter, noise meter and Multi-parameter Water Quality Monitoring System are downloaded directly from the equipment at the end of each monitoring day. The downloaded monitoring data are input into a computerized database properly maintained by the ET. The laboratory results are input directly into the computerized database and QA/QC checked by personnel other than those who input the data. For monitoring activities require laboratory analysis, the local laboratory follows the QA/QC requirements as set out under the HOKLAS scheme for all laboratory testing.

3.8 DETERMINATION OF ACTION/LIMIT (A/L) LEVELS

3.8.1 The baseline monitoring results form the basis for determining the environmental acceptance criteria for the impact monitoring. The air quality, construction noise and water quality criteria, namely Action and Limit levels were established according to Approved EM&A Manual, and they are listed in *Tables 3-8, 3-9* and *3-10* below.

| Monitoring Station | Action | Level (µg /m ³) | Limit Level (µg/m ³) | | |
|--------------------|------------|-----------------------------|----------------------------------|-------------|--|
| Monitoring Station | 1-hour TSP | 24-hour TSP | 1-hour TSP | 24-hour TSP | |
| ASR-1 | 331 | 181 | 500 | 260 | |
| ASR-2 | 316 | 165 | 500 | 260 | |
| ASR-3 | 307 | 160 | 500 | 260 | |

Table 3-8Action and Limit Levels for Air Quality Monitoring

| Table 3-9 | Action and Limit Levels for Construction Noise |
|-----------|--|
|-----------|--|

| Monitoring Location | Action Level Limit Level in dB(A) | | | | |
|-----------------------|---|----------|--|--|--|
| | Time Period: 0700-1900 hours on normal weekdays | | | | |
| CN-1,CN-2, CN-3, CN-4 | When one or more documented complaints are received | 75 dB(A) | | | |

Note: * Reduces to 70 dB(A) for schools and 65 dB(A) during the school examination periods.

Table 3-10 Action and Limit Levels for Water Quality

| Deveryoter | Performance | Monitoring Location | | | | | |
|--------------------|--------------|---------------------|------|------|------|--|--|
| Parameter | criteria | M1 | M2 | M3 | M4 | | |
| DO (/I) | Action Level | 3.03 | 4.99 | 4.58 | 3.62 | | |
| DO (mg/L) | Limit Level | 2.97 | 4.90 | 4.49 | 3.52 | | |
| Turbidity (NTU) | Action Level | 7.1 | 39.7 | 5.6 | 5.4 | | |
| | Limit Level | 7.6 | 42.2 | 5.9 | 5.9 | | |
| SS (mg/L) | Action Level | 8.5 | 29.0 | 9.3 | 4.8 | | |
| | Limit Level | 10.1 | 31.0 | 9.5 | 5.0 | | |

Notes:

For DO, non-compliance of the water quality limits occurs when monitoring result is lower than the limits
For turbidity and SS, non-compliance of the water quality limits occurs when monitoring result is higher

than the limits.

3.8.2 Should non-compliance of the environmental quality criteria occurs, remedial actions will be triggered according to the Event and Action Plan enclosed in *Appendix F*.

4. AIR QUALITY

4.1 MONITORING RESULTS

- 4.1.1 In the Reporting Month, air quality monitoring was performed at all designated locations. Impact monitoring schedule provided to all relevant parties was shown in *Appendix G*.
- 4.1.2 In this Reporting Month, there were 5 sessions of 24-hour TSP and 15 sessions of 1-hour TSP undertaken at each designated station for air quality monitoring. The air quality monitoring results are summarized in *Tables 4-1* to 4-3. The database of 24-hour TSP is shown in *Appendix H* and the graphical plots of monitoring result are shown in *Appendix I*.

| Table 4-1 | Summary of Air (| Duality Monitoring | Results at ASR-1 under | Contract 1 |

4.2 AIR MONITORING EXCEEDANCE

4.2.1 As shown in *Tables 4-1 to 4-3*, the monitoring results of 24-hour and 1-hour TSP monitoring in the Reporting Month were below the Action/ Limit Level. No Notification of Exceedance (NOE) of air quality monitoring criteria was issued and therefore corrective action was not required. The meteorological data during the impact monitoring days are summarized in *Appendix J*.

5. CONSTRUCTION NOISE

5.1 MONITORING RESULTS

- 5.1.1 In the Reporting Month, noise monitoring was performed at all designated locations. Impact monitoring schedule provided to all relevant parties was shown in *Appendix G*.
- 5.1.2 In this Reporting Month, **5** sessions of noise monitoring were undertaken at each designated noise monitoring location. The sound level were set in a free field situation for CN1, CN2 and CN3 and therefore a façade correction of +3dB(A) has been added according to acoustical principles and EPD guidelines. The monitoring result of noise monitoring is show in *Tables 5-1 and 5-2* and the graphical plots are shown in *Appendix I*.

| Table 5-1 | Summary of | Construction | Noise Monitoring | Results under | Contract 1 |

| 10-Jun-21 | 14:23 | 65 | 13:45 | 58 | | | |
| 16-Jun-21 | 14:12 | 64 | 14:57 | 64 | | | |
| 22-Jun-21 | 14:37 | 58 | 15:13 | 60 | | | |
| 28-Jun-21 | 14:31 | 62 | 15:11 | 58 | | | |
| Limit Level | 75 dB(A) | | | | | | |

(*) A façade correction of +3dB(A) has been added according to acoustical principles and EPD guidelines.

5.1.3 Prior and after noise monitoring, the accuracy of the sound level meter has been checked by an acoustic calibrator to ensure the measurement within acceptance range of ± 0.5 dB. Moreover, wind speed checked by portable wind speed meter has been performed before noise monitoring. No noise measurement was performed in fog, rain, wind with a steady speed exceeding 5 m s⁻¹ or wind with gusts exceeding 10 m s⁻¹.

5.2 NOISE MONITORING EXCEEDANCE

5.2.1 As shown in *Tables 5-1 and 5-2*, no Limit Level exceedance for noise monitoring exceedance was recorded in the Reporting Month. Moreover, no noise complaint (which triggered Action Level) was received. No Notification of Exceedance (NOE) of construction noise criterion was issued and no corrective action was therefore required.

6. WATER QUALITY

6.1 MONITORING RESULTS

- 6.1.1 In the Reporting Month, water quality monitoring was performed at all designated locations. Impact monitoring schedule provided to all relevant parties was shown in *Appendix G*.
- 6.1.2 In the Reporting Month, a total of 13 monitoring days were carried out for water quality impact monitoring. The monitoring result of key parameters including Dissolved Oxygen, Turbidity and Suspended Solids are summarized in *Tables 6-1* and 6-2. Detailed monitoring results including in-situ measurements and laboratory analysis data are shown in *Appendix H* and graphical plots for monitoring result are shown in *Appendix I*.

 Table 6-4
 Action and Limit (A/L) Levels Exceedance Record

6.2.2 Notification of Exceedance (NOE) and the investigation for exceedance in the Reporting Month is summarized in *Table 6-5*.

| Table 6-5 | Summary of Investigation of | of Water Quality Exceedance | e in the Reporting Month |
|-----------|-----------------------------|-----------------------------|--------------------------|
|-----------|-----------------------------|-----------------------------|--------------------------|

| Date of Exceedance | Exceeded Location | Exceeded Parameter | Cause of Water Quality Exceedance | | | |
|--------------------------------------|----------------------|-----------------------|---|--|--|--|
| 9, 11, 15, 17 and 19 June 2021 | M1 | Turbidity & SS | Construction activities were conducted on Man Kam To Road and Lin Hang Road, but there were no active work area out near locations M1 and M2. According to the weather information from the HKO, there was heavy rainstorm intermittently on 9 to 19 June 2021. Under the impact of rainstorm, the water quality of the watercourse was deteriorated by the stirred up sediment and runoff from the surrounding environment. Weekly site inspection was conducted and no adverse water quality impact | | | |
| 11 June 2021 | M2 | SS | was conducted and no adverse water quality impact observed on the works area on Man Kam To Road and Li Ma Hang Road. No works under the Project was carried out near Locations M1 and M2. Since there were n works undertaken near Locations M1 and M2, it was considered that the exceedances were related to the rainstorm and unlikely caused by the work under the project. | | | |
| 23 and 25 June 2021 | M1 | Turbidity & SS | Construction activities were conducted on Man Kam | | | |
| 23 and 25 June 2021 | M2 | SS | impact of rainstorm, the water quality of the watercourse was deteriorated by the stirred up sediment and runoff | | | |

| Date of Exceedance | Exceeded Location | Exceeded Parameter | Cause of Water Quality Exceedance |
|------------------------|----------------------|-----------------------|--|
| | Location | Tarameter | from the surrounding environment. Weekly site inspection was conducted on 10 and 17 June 2021. No adverse water quality impact observed on the works area on Man Kam To Road and Lin Ma Hang Road and no works was carried out near Locations M1 and M2. Since there were no works undertaken near Locations M1 and M2, it was considered that the exceedances were related to the rainstorm and unlikely caused by the work under the project. |
| 28 and 30 June 2021 | M1, M2 & M4 | Turbidity & SS | Construction activities were conducted on Man Kam To Road and Lin Hang Road, but there were no active work area out near locations M1, M2 and M4. According to the weather information from the HKO, there was heavy rainstorm intermittently on 28 to 30 June 2021. Under the impact of rainstorm, the water quality of the watercourse was deteriorated by the stirred up sediment and runoff from the surrounding environment. No adverse water quality impact observed on the works area on Man Kam To Road and Lin Ma Hang Road during weekly site inspection and no works was carried out near Locations M1, M2 & M4. Since there were no works undertaken near Locations M1, M2 & M4, it was considered that the exceedances were related to the rainstorm and unlikely caused by the work under the project. |

7. ECOLOGY MONITORING

7.1 REQUIREMENT

- 7.1.1 According to approved EIA report (AEIAR-198/2016), habitat types within project boundary comprise of watercourse, grassland, upland grassland, plantation, woodland and developed area. Natural habitats were of moderate ecological value in terms of species diversity, species rarity, species abundance, ecological linkage as well as nursery. Moreover, 0.3ha of wet woodland on the northern side of Sandy Ridge was deemed habitat with high ecological value. Four types of habitats were regarded as ecologically sensitive habitats, namely wet woodland, watercourses, upland grassland and woodland. Considering human disturbance in upcoming construction and operation phases, ecologically sensitive habitats shall be monitored in accordance with EM&A Manual.
- 7.1.2 The objective of ecologically sensitive habitats monitoring is to evaluate the effectiveness of measures to minimize impacts on concerned habitats from disturbance and pollution. In order to monitor the effectiveness of the measures to the minimize impact on ecologically sensitive habitats from disturbance and pollution, monthly monitoring during construction and operation phases is required as specified in EM&A Manual. Standard faunal transect and sampling surveys cover both wetland habitats (*wet woodland and watercourse*) and non-wetland habitats (*upland grassland and woodland*).

7.2 METHODOLOGY

7.2.1 Wetland habitats include wet woodland and watercourses. Monitoring surveys using standardized quantitative methodology will conduct at fixed points. For seasonal watercourse, the survey will be conducted whenever the habitat appears. Measures to respond to decreases in numbers of aquatic fauna using the wetland habitats and Action/Limit levels to trigger these measures are detailed in *Table 7-1*.

| Action Level | Response | Limit Level | Response | | | |
|--------------|----------|-------------------|---|--|--|--|
| | 6 | taxa diversity by | Investigate cause and if cause identified as related to the project instigate remedial action. | | | |

 Table 7-1
 Action and Limit Levels for Wet Woodland Habitats Monitoring

Remarks: Action and Limit Levels and Responses to Evidence of Declines in Aquatic Fauna

7.2.2 Non-wetland habitats consist of upland grassland and woodland. Monthly quantitative surveys of non-aquatic fauna will be conducted using standard route transect counts. Measures to respond to decreases in numbers of non-aquatic fauna using the non-wetland habitats and Action/Limit levels to trigger these measures are detailed in *Table 7-2*.

 Table 7-2
 Action and Limit Levels for Non-Wet Woodland Habitats Monitoring

| Action Level | Response | Limit Level | Response |
|--------------|---|--------------------------------|---|
| Reduction in | Investigate cause and if cause identified as related to the project instigate remedial action to remove or reduce source of | Reduction in species diversity | Investigate cause and if cause identified as related to the project instigate remedial action. |
| | disturbance. | | |

Remarks: Action and Limit Levels and Responses to Evidence of Declines in Non-Aquatic Fauna

7.2.3 The ecological survey includes all taxa being investigated in accordance with EIA report. Schedule of faunal surveys in each year during construction phase is presented in *Table 7-3*.

Table 7-3Schedule of Faunal Surveys in each year During Construction Phase

Mammal Survey

7.2.4 Mammal surveys will be conducted along the proposed transects (shown in *Appendix K* - Ecological Survey Reports) in during both daytime and night time periods. Along with direct observations, other field signs, such as scats and tracks, will be searched and recorded if present.

<u>Bird Survey</u>

7.2.5 Bird surveys will be conducted along the transects (shown in *Appendix K* - Ecological Survey Reports) during the surveys, species and their vocalizing individuals recorded will be enumerated and recorded according to the habitat(s) they are utilizing.

Herpetofauna Survey

7.2.6 Reptile and amphibian surveys will be conducted along transects (shown in *Appendix K* - Ecological Survey Reports) during surveys careful searches of appropriate microhabitats and refugia for reptiles and their vocalizing individuals will be undertaken and all reptiles observed will be identified and counted.

Dragonfly and Butterfly Survey

7.2.7 Dragonfly and Butterfly surveys will be conducted along transects (shown in *Appendix K* - Ecological Survey Reports) during surveys all dragonflies and Butterflies seen will be identified and counted as accurately as possible.

Aquatic Fauna Survey

- 7.2.8 Freshwater fishes and macro-invertebrates will be recorded by direct observation. All species trapped/recorded will be enumerated and identified (to the lowest taxonomic level possible), and the species of conservation importance photographed.
- 7.2.9 After each ecological monitoring survey, a monthly report of the survey result and data collected will be provided with reference to EM&A Manual. An annual analysis of data will be carried out in order to study if there is any significant reduction in taxa diversity and abundance.

7.3 ECOLOGICAL MONITORING SURVEY FINDINGS (CONTRACT 1)

7.3.1 In the Reporting Month, ecological monitoring was undertaken on δ^{th} June 2021 at work area of Contract 1. A sunny day. The day survey covered wetland and non-wetland areas. The survey was conducted by transect and at fixed points. All species seen will be identified and counted as accurately as possible. Results of the monitoring survey are presented below:

Monitoring Result for Contract 1

Mammal

7.3.2 There was no mammal recorded in the monitoring area

<u>Birds</u>

7.3.3 There were a total of 21 bird individuals from 10 species recorded in the monitoring area. A specie of conservation interests was recorded in the monitoring area: White-throated Kingfisher白胸翡翠. Golden-headed Cisticola was not observed during the bird survey.

<u>Herpetofauna</u>

7.3.4 There was no reptile species recorded in monitoring area. There were two amphibian species recorded in the monitoring area.

Butterfly

7.3.5 There were a total of 7 butterfly individuals from 4 species recorded in the monitoring area.

<u>Dragonfly</u>

7.3.6 There was a total of 4 odonate individuals from 2 species recorded in the monitoring area.

Aquatic Fauna Survey (Freshwater communities)

- 7.3.7 There was no freshwater community recorded in the monitoring area.
- 7.3.8 The summaries of faunal survey result are shown in *Tables 7-4 and 7-5*.

Discussion

7.3.9 After analysing survey results in June from 2019 to 2021, it is found that the species diversity reduced in wetland habitat. The reduction could be due to natural fluctuation. Good practice during construction is required to prevent environmental contamination as well as unnecessary site clearance. Continuous monitoring is also recommended to inspect any significant decrease in species diversity.

7.4 ECOLOGICAL MONITORING SURVEY FINDINGS (CONTRACT 2)

7.4.1 In the Reporting Month, ecological monitoring was undertaken on 8th June 2021 at work area of Contract 2. A sunny day. The day survey covered wetland and non-wetland areas. The survey was conducted by transect and at fixed point. All species seen will be identified and counted as accurately as possible. Results of the monitoring survey are presented below:

Monitoring Result for Contract 2

<u>Mammal</u>

7.4.2 There was no mammal recorded in the monitoring area

<u>Birds</u>

7.4.3 There were total of 23 bird individuals from 9 species recorded in the monitoring area. Two species of conservation interests were recorded in the monitoring area: *Milvus migrans* Black Kite 黑鳶 and *Centropus sinensis* Greater Coucal 褐翅鴉鵑. Golden-headed Cisticola was not observed during the bird survey.

<u>Herpetofauna</u>

7.4.4 There was 1 reptile individual from one species recorded in the monitoring area. There was no amphibian recorded in the monitoring area.

<u>Butterfly</u>

7.4.5 There were 5 butterfly individuals from 3 species recorded in the monitoring area.

<u>Dragonfly</u>

7.4.6 There were 10 odonate individuals from 4 species recorded in the monitoring area.

Aquatic Fauna Survey (Freshwater communities)

7.4.7 There were two species of freshwater fish were recorded in the monitoring area.

7.4.8 The summaries of faunal survey result are shown in *Tables 7-6* and 7-7.

+: Species appeared but uncountable.

Discussion

- 7.4.9 After analysing survey results in June 2019 to 2021, there was no significant drop in species diversity for both non-wetland and wetland habitats, but the species richness in both non-wetland and wetland area were slightly decreased, it could be due to natural fluctuation. However, a good practice during construction is required to prevent environmental contamination as well as unnecessary site clearance. Moreover, continuous monitoring is required to inspect any significant reduction of species diversity.
- 7.4.10 The detailed Ecological Survey Reports for Contract 1 and Contract 2 are attached in Appendix K.
- 7.4.11 The tentative ecology inspection and monitoring in the next Reporting Month (July 2021) is scheduled on 8th July 2021.

7.5 MONITORING OF FLORA SPECIES OF CONSERVATION INTEREST

- 7.5.1 According to the approved vegetation survey report and transplantation proposal under FEP-01/534/2017/A, an individual of flora species of conservation interest (the transplanted T-2928) was identified and transplanted to the receptor site.
- 7.5.2 According to approved vegetation survey report and transplantation proposal, post-transplantation monitoring was conducted once per week in the first three months after the transplantation in Oct

2018 and once in each of the following month in the remaining establishment period for 12 month. During the remaining construction phase of the project, the transplanted T-2928 would be monitored on quarterly basis.

7.5.3 A landscape sub-contractor was employed by the Contractor to monitor the health condition of transplanted species and provide advice on necessary weeding, fertilizing and pest control. The monitoring records were submitted to ET and IEC for review and record. Moreover, inspection of the transplanted T-2928 was undertaken by ET as part of the weekly site inspection. No construction activity and disturbance were observed at the location of the transplanted T-2928. The health condition of the transplanted T-2928 was fair with normal foliage color and density.

7.6 MEASURE FOR PROTECTION OF NESTING BIRD

- 7.6.1 Pursuant to FEP-01/534/2017/A condition 2.19 and EP-534/2017/A condition 2.20, precautionary checks for the presence of nesting birds shall be carried out in the breeding season (February to July) before vegetation clearance.
- 7.6.2 As advised by both Contractors, there were no vegetation clearance conducted within the site in the Reporting Month and therefore precautionary check for the presence of nesting birds was not required.

8. LANDSCAPE AND VISUAL

8.1 REQUIREMENT

- 8.1.1 The EIA has recommended EM&A for landscape and visual resources to be undertaken during the design, construction and operational stages of the project. The design, implementation and maintenance of landscape mitigation measures is a key aspect of this and should be checked to ensure that they are fully realized and that potential conflicts between the proposed landscape measures and any other project works let its are resolved at the earliest possible date and without compromise to the intention of the mitigation measures. In addition, implementation of the mitigation measures recommended by the EIA will be monitored through the site audit programme.
- 8.1.2 A number of mitigation measures to ameliorate the landscape and visual impacts of the Project implementation is summarized in the EMIS of Appendix 13.1 of the EIA Report.
- 8.1.3 The landscape and visual mitigation measures proposed should be incorporated in the landscape and engineering design. Mitigation measures to be implemented during construction should be adopted from the start of construction and be in place throughout the entire construction period. Mitigation measures to be implemented during operation should be integrated into the detailed design and built as part of the construction works so that they are in place on commissioning of the Project. Tree transplantation and compensatory planting should be carried out as early as possible in the Project with transplantation carried out prior to construction starting in any particular area.
- 8.1.4 During construction phase, Landscape & Visual Monitoring of the contractor's operations should be conducted monthly and reported by ET, and countersigned by IEC.

8.2 FINDINGS / DEFICIENCIES DURING SITE INSPECTION IN THE REPORTING MONTH

In the Reporting Month, landscape & visual inspection was carried out by the Registered Landscape 8.2.1 Architect (RLA) for works area of Contract 1 and Contract 2 on 17th June 2021. The findings / reminders recorded during the inspection are presented in *Tables 8-1 and 8-2*.

| Table 8-1 | Landscape & Visual Inspection Finding for Contract 1 | | | | | |
|-------------------------------|--|--|--|--|--|--|
| Date | Findings and Reminder | Follow-Up Status | | | | |
| 17 th June 2021 | 1. Formation of slope near retain trees was observed. | • The Contractor will pay attention on the retain trees. | | | | |
| | 2. Tree protection zone for transplanted tree T2465 was missing. | • Tree protection zone has been reinstated. | | | | |
| | 3. The Contractor is reminded to set up TPZ of proper size and with appropriate material around retain trees according to approved method statement. | • Reminder only | | | | |
| | 4. The Contractor is reminded to prevent the construction material pile within TPZ and ensure no works is allowed within the TPZ. | • Reminder only | | | | |
| | 5. Transplanted trees T2465, T2468 and T2928 were in fair health condition with normal foliage color and density. Contractor is reminded to provide proper maintenance according to approved method statement. | • Reminder only | | | | |

| ble 8-1 | Landscape | & Visual | Inspection | Finding | for Contract 1 |
|---------|-----------|----------|------------|--------------|----------------|

|-------------------------------|---|------------------|
| Date | Findings and Reminder | Follow-Up Status |
| 17 th June 2021 | 1. Contractor is reminded to set up TPZ of proper size and with appropriate material around retain trees according to approved method statement. Contractor should prevent any construction material pile within TPZ and ensure no works is allowed within the TPZ. | Reminder only |

8.2.2 Inspection checklist of Landscape & Visual signed by RLA is attached in *Appendix L*.

9. WASTE MANAGEMENT

9.1 GENERAL WASTE MANAGEMENT

9.1.1 Waste management was carried out by an on-site Environmental Officer or an Environmental Supervisor from time to time in accordance with the Waste Management Plan (WMP).

9.2 **RECORDS OF WASTE QUANTITIES**

- 9.2.1 All types of waste arising from the construction work are classified into the following:
 - Construction & Demolition (C&D) Material;
 - Chemical Waste;
 - General Refuse; and
 - Excavated Soil.
- 9.2.2 The quantities of waste for disposal in this Reporting Month are summarized in *Table 9-1* and *9-2* and the Monthly Summary Waste Flow Table is shown in *Appendix M*. Whenever possible, materials were reused on-site as far as practicable.

| | Contract 1 | | Contract 2 | |
|---|------------|----------------------|---------------|----------------------|
| Type of Waste | Quantity | Disposal Location | Quantity | Disposal Location |
| Total generated C&D Materials (Inert) ('000m ³) | 5.712 | | 901.09 (#) | |
| Reused in this Contract (Inert) ('000m ³) | 0 | | 0 | |
| Reused in other Projects (Inert) ('000m ³) | 0 | | 0 | |
| Disposal as Public Fill (Inert) ('000m ³) | 3.594 | Tuen Mun Area 38 | 901.09 (#) | Tuen Mun Area 38 |

Table 9-1Summary of Quantities of Inert C&D Materials

Remark: the unit is '000kg

Table 9-2Summary of Quantities of C&D Wastes

| | Contract 1 | | Contract 2 | |
|---|------------|----------------------|--------------|----------------------|
| Type of Waste | Quantity | Disposal Location | Quantity | Disposal Location |
| Recycled Metal ('000kg) | 0 | | 0 | |
| Recycled Paper / Cardboard Packing ('000kg) | 0 | | 0 | |
| Recycled Plastic ('000kg) | 0 | | 0 | |
| Chemical Wastes ('000kg) | 0 | | 0 | |
| General Refuses ('000m ³) | 0.068 | NENT Landfill | 8.040 (#) | NENT Landfill |

Remark: the unit is '000kg

9.2.3 Since canteen and/or kitchen are not allowed setting on the Project site, no domestic wastewater was generated from the Project.

10. SITE INSPECTION

10.1 REQUIREMENT

10.1.1 According to the approved EM&A Manual, environmental site inspection should be led by RE and attended by the Contractor and ET at least once per week. Regular environmental site inspections shall be carried out to assess the environmental performance.

10.2 FINDINGS / DEFICIENCIES DURING SITE INSPECTION IN THE REPORTING MONTH Contract 1

- 10.2.1 In the Reporting Month, joint site inspections for Contract 1 to evaluate the site environmental performance were carried out by the RE, ET and the Contractor on 3^{rd} , 10^{th} , 17^{th} , 23^{rd} and 30^{th} June 2021 and IEC attended joint site inspection on 17^{th} June 2021. No non-compliance was noted.
- 10.2.2 The findings / deficiencies that observed during the weekly site inspection are listed in *Table 10-1*.

Table 10-1Site Observations for the Works of Contract 1

| Date | Findings / Deficiencies | Follow-Up Status | |
|----------------------------|--|---|--|
| 3 rd June 2021 | The Contractor should place chemical container inside drip tray at PDA. The Contractor should spray water for dusty construction activity at CS12. The Contractor was reminded to spray water regularly at exposed work area for dust suppression. | Chemical container was removed from site area. Dusty activities at CS 12 were completed. Reminder only. | |
| 10 th June 2021 | • Generator without drip tray underneath was observed. The Contractor should provide secondary containment for the generator. | • Generator was removed from site area. | |
| 17 th June 2021 | • Stagnant water was observed inside drip tray at CS1. The Contractor was advised to clean the stagnant water and dispose as chemical waste. | • Stagnant water inside drip tray was cleaned and disposed as chemical waste. | |
| | • The Contractor should provide proper container for storage of general refuse. | • Proper container was provided on site. | |
| | • Air compressor without drip tray was observed at CS13. The Contractor was advised to provide drip tray for air compressor used within site area. | • Air compressor was removed from site area. | |
| | • The Contractor was reminded to spray water regularly at exposed work area. | Reminder only. | |
| | • The Contractor was reminded to place chemical containers inside drip tray. | Reminder only. | |
| | • The Contractor was reminded to enhance house-keeping within site area. | • Reminder only. | |
| 23 rd June 2021 | • No adverse environmental issue was observed. | NA | |
| 30 th June 2021 | • The Contractor was reminded to provide proper mitigation measure for dust work at CS11. | • Reminder only. | |

Contract 2

- 10.2.3 In the Reporting Month, joint site inspections for Contract 2 to evaluate the site environmental performance carried out by the RE, ET and the Contractor was on 2^{nd} , 10^{th} , 17^{th} , 23^{rd} and 30^{th} June and IEC attended joint site inspection on 17^{th} June 2021 non-compliance was noted.
- 10.2.4 The findings / deficiencies that observed during the weekly site inspection are listed in *Table 10-2*.

| Date | Findings / Deficiencies | Follow-Up Status |
|----------------------------|--|---|
| 2 nd June 2021 | • The Contractor was reminded to remove any stagnant water accumulated on site after rainy days. | • Reminder only. |
| 10 th June 2021 | • No adverse environmental issue was observed. | • NA |
| 17 th June 2021 | construction activities carried out near retained tree.The Contractor was reminded to place EP at all | Reminder only.Reminder only. |
| | site entrance/exit area. | |
| 23 rd June 2021 | • No adverse environmental issue was observed. | • NA |
| 30 th June 2021 | • The Contractor was reminded to treat the surface run-off prior to discharge. | • Reminder |

Table 10-2Site Observations for the Works of Contract 2

11. ENVIRONMENTAL COMPLAINT AND NON-COMPLIANCE

11.1 Environmental Complaint, Summons and Prosecution

11.1.1 In the Reporting Month, no environmental complaint was received for the project. No summons and prosecution was lodged for the Contract. The statistical summary table of the environmental complaint, summons and prosecution are presented in *Tables 11-1, 11-2* and *11-3*.

Table 11-1 Statistical Summary of Environmental Complaints

| Reporting Month | | Enviro | nmental Complain | t Statistics |
|------------------------------|------------|-----------|------------------|-------------------------|
| | | Frequency | Cumulative | Complaint Nature |
| $1^{st} - 30^{th}$ June 2021 | Contract 1 | 0 | 1 | Air Quality |
| $1^{st} - 30^{th}$ June 2021 | Contract 2 | 0 | 2 | Air Quality |

Table 11-2 Statistical Summary of Environmental Summons

| Reporting Month | | Environmental Summons Statistics | | |
|------------------------------|------------|---|------------|-------------------------|
| | | Frequency | Cumulative | Complaint Nature |
| $1^{st} - 30^{th}$ June 2021 | Contract 1 | 0 | 0 | NA |
| $1^{st} - 30^{th}$ June 2021 | Contract 2 | 0 | 0 | NA |

Table 11-3 Statistical Summary of Environmental Prosecution

| Reporting Month | | Env | vironmental Prosecutio | on Statistics |
|------------------------------|------------|-----------|------------------------|-------------------------|
| | | Frequency | Cumulative | Complaint Nature |
| $1^{st} - 30^{th}$ June 2021 | Contract 1 | 0 | 0 | NA |
| $1^{st} - 30^{th}$ June 2021 | Contract 2 | 0 | 0 | NA |

11.1.2 In addition, no complaints received and emergency event relating to violation of environmental legislation for illegal dumping and landfilling were received.

12. IMPLEMENTATION STATUS OF MITIGATION MEASURES

12.1 GENERAL REQUIREMENTS

- 12.1.1 The environmental mitigation measures that recommended in the Implementation Schedule for Environmental Mitigation Measures (ISEMM) in the approved EM&A Manual covered the issues of dust, noise, water and waste and they are summarized presented in *Appendix N*.
- 12.1.2 The Works of Contract 1 and Contract 2 under the Project shall be implementing the required environmental mitigation measures according to the approved EM&A Manual subject to the site condition. Environmental mitigation measures implemented in this Reporting Month is summarized in *Table 12-1*.

| Issues | Environmental Mitigation Measures |
|-------------|--|
| Water | • Provided efficient silt removal facilities to reduce SS level before effluent |
| Quality | discharge. |
| | • Provided ditches, earth bunds or sand bag barriers to minimize polluted runoff. |
| | • Temporary drainage was provided to prevent runoff going through site surface |
| | and minimize polluted runoff. |
| | • Provided perimeter cut-off drains at site boundaries to intercept storm runoff from |
| | crossing the site. |
| | • Exposed slopes surface were compacted and covered with tarpaulin or similar |
| | means. |
| | Provided portable chemical toilets on site. |
| Air Quality | Maintain damp / wet surface on access road. |
| | Maintain low vehicular speed within the works areas. |
| | • Provided vehicle wheel washing facilities at each construction site exit; |
| | Provided water spraying for all active works area. |
| | • Stockpiles of dusty material were covered with impervious sheeting. |
| | • Provided workers to clear dusty materials at the vehicle entrance or exit regularly. |
| | • Stockpile more than 20 bags of cement or dry pulverized fuel ash (PFA) has been |
| | covered entirely by impervious sheeting or placed in an area sheltered on the top |
| NT . | and the 3 sides. |
| Noise | • Restricted operation time of plants from 07:00 to 19:00 on any working day |
| | except for Public Holiday and Sunday. |
| | Keep good maintenance of plants. |
| | Placed noisy plants away from residence and school. |
| | • Provided noise barriers or hoarding to enclose the noisy plants or works. |
| Waste and | Shut down the plants when not in used.Provided on-site sorting prior to disposal. |
| Chemical | Followed requirements and procedures of the "Trip-ticket System" |
| Management | Predicted required quantity of concrete accurately. |
| Wanagement | |
| | • Collected the unused fresh concrete at designated locations in the sites for subsequent disposal. |
| Ecology | Implementing water control measures (ETWB TCW No. 5/2005) to avoid direct |
| Leology | or indirect impacts any watercourses and impact to any aquatic fauna during the |
| | construction phase. |
| | Demarcation fencing has been erected to prevent unauthorised encroachment into |
| | the riparian corridor by constructions works and traffic. |
| | • The construction work and site formation have been phased in order to reduce |
| | overall noise disturbance impacts in particular areas. |
| | Works have been restricted to daytime and any construction lighting was designed |
| | and positioned as to not impact on adjacent ecologically sensitive areas. |
| General | The site was generally kept tidy and clean. |
| | 0 |

 Table 12-1
 Environmental Mitigation Measures

12.2 TENTATIVE CONSTRUCTION ACTIVITIES IN THE COMING MONTH

- 12.2.1 According to the information provided by HCTYJV, the forthcoming construction activities for Contract 1 are listed below:
 - General site housekeeping
 - Bulk Excavation
 - Construction of cut slope, installation of soil nailing and construction of surface channel and planter wall.
 - Construction of fill slope and surface channel
 - Construction of pick-up and drop-off point near Man Kam To Road
 - Construction of sewer and storm drain
 - Laying of street lighting ducts
 - Construction of watermains
 - Construction of Refuse Collection Point.
- 12.2.2 According to the information provided by Sang Hing, the forthcoming construction activities for Contract 2 are listed below:
 - Construction of Manhole, gullies, drainage pipe at Lin Ma Hang Road between CH50-160 Southbound & CH780-890 Northbound.
 - Construction of Dia.1200mm Concrete Sleeve tunnel for DN400 watermain by trenchless method at Man Kam To Road
 - DN400 DI Watermain works in approx. CH300-1040 at Man Kam To Road North Slow Lane
 - Construction of Manhole, gullies, drainage pipe at Sandy Ridge Road E CH180-300 (~120m)
 - Construction of Manhole, gullies, drainage pipe at Sandy Ridge Road F CH690-730 (~40m)
 - Retaining Wall 14 backfilling
 - Backfilling of Retaining Wall 12
 - Soil Nail Works at Lin Ma Hang Road Slope C231 & C224
 - Fanling Station Road Covered Walkway
 - Lung Sum Avenue road surface modification works

12.3 KEY ISSUES FOR THE COMING MONTH

- 12.3.1 Key issues to be considered in the coming month for the works of Contract 1 include:
 - Implementation of control measures for rainstorm;
 - Regular clearance of stagnant water during wet season;
 - Implementation of dust suppression measures at all times;
 - Potential wastewater quality impact due to surface runoff;
 - Potential fugitive dust quality impact due from the dry/loose/exposure soil surface/dusty material;
 - Ensure dust suppression measures are implemented properly;
 - Sediment catch-pits and silt removal facilities should be regularly maintained;
 - Discharge of site effluent to the nearby wetland is prohibited;
 - Nearby wetland prohibited stockpiling and/or disposal of materials;
 - Follow-up of improvement on general waste management issues; and
 - Implementation of construction noise preventative control measures.
- 12.3.2 The Contractors are reminded to pay special attention on water quality mitigation measures and should fully implement the measures as recommended in the EM&A Manual, in particular to prevent surface runoff and other pollutants from flowing to local stream and Conservation Area. The implementation of water quality mitigation measures conducted by the Contractors is shown in Appendix *O*.
- 12.3.3 During wet season, the Contractors are reminded to pay special attention on water quality mitigation measures and should fully implement the measures as recommended in the EM&A Manual, in

particular to prevent surface runoff and other pollutants from flowing to local stream and Conservation Area.

13. CONCLUSIONS AND RECOMMENTATIONS

13.1 CONCLUSIONS

- 13.1.1 This is the 35th Monthly EM&A Report presenting the monitoring results and inspection findings for the period of 1st to 30th June 2021.
- 13.1.2 No 24-hour or 1-hour TSP monitoring result that triggered the Action or Limit Levels was recorded. No NOEs or the associated corrective action was therefore required.
- 13.1.3 No noise complaint (which is an Action Level exceedance) was received and no construction noise measurement result that exceeded the Limit Level was recorded in this Reporting Month. No NOEs or the associated corrective actions were therefore issued.
- 13.1.4 In the Reporting Month, **29** Limit level exceedances, namely 13 exceedance of Turbidity and 16 exceedances of SS were recorded. According to the weather information from the HKO, there was heavy rainstorm intermittently during the days of exceedance recorded. Under the impact of rainstorm, the water quality of the watercourse was deteriorated by the stirred up sediment and runoff from the surrounding environment. According to the Contractor's work programme, there were construction activities on Man Kam To Road but no works were carried out near locations M1, M2 and M4. It was concluded that the exceedances were likely related to the impact of rainstorm and not caused by the work under the project.
- 13.1.5 Monthly ecological monitoring for sensitive habitat for area of Contract 1 and Contract 2 were undertaken on 8^{th} June 2021. After analysing survey results in June 2019 to 2021, it is found that the species diversity in Contract 1 reduced in wetland habitat and the reduction could be due to natural fluctuation. For Contract 2, there was no significant drop in species diversity for both non-wetland and wetland habitats, but the species richness in both non-wetland and wetland area were slightly decreased, it could be due to natural fluctuation. Good practice during construction is required to prevent environmental contamination as well as unnecessary site clearance. Continuous monitoring is also recommended to inspect any significant decrease in species diversity.
- 13.1.6 As advised by both Contractors, there were no vegetation clearance conducted within the site in the Reporting Month and therefore precautionary check for the presence of nesting birds was not required.
- 13.1.7 Landscape and visual inspection at both Contracts were undertaken by the RLA on *17th June 2021*. The Contractor was reminded to prevent the construction material pile within TPZ and ensure no works is allowed within the TPZ.
- 13.1.8 In the Reporting Month, no environmental complaints, summons and prosecution were received. In addition, no complaints received and emergency events relating to violation of environmental legislation for illegal dumping and landfilling were received.
- 13.1.9 In the Reporting Month, joint site inspections for Contract 1 to evaluate the site environmental performance were carried out by the Resident Engineer, ET and the Contractor of the Contract 1 on 3^{rd} , 10^{th} , 17^{th} , 23^{rd} and 30^{th} June. Moreover, joint site inspections for Contract 2 by the RE, ET and the Contractor of Contract 2 were carried out on 2^{nd} , 10^{th} , 17^{th} , 23^{rd} and 30^{th} June. IEC attended the both Contract joint site inspection on 17^{th} June 2021. No non-compliance was noted during the site inspections.

13.2 RECOMMENDATIONS

- 13.2.1 The Contractors are reminded to pay special attention on water quality mitigation measures and should fully implement the measures as recommended in the EM&A Manual, in particular to prevent surface runoff and other pollutants from flowing to local stream and Conservation Area.
- 13.2.2 During wet season, the Contractors are reminded to pay special attention on water quality mitigation measures and should fully implement the measures as recommended in the EM&A Manual, in

particular to prevent surface runoff and other pollutants from flowing to local stream and Conservation Area.

- 13.2.3 Construction noise would be a key environmental issue during construction phase of the Project. Noise mitigation measures such as using quiet plants and mobile noise barriers should be implemented in accordance with the EM&A requirement.
- 13.2.4 Since some of the construction site under the Project is located near villages, both Contractors should fully implement air quality mitigation measures to reduce construction dust emission.
- 13.2.5 Furthermore, daily cleaning and weekly tidiness shall be properly performed and maintained. In addition, mosquito control should be performed to prevent mosquito breeding on site.

Linear Regression of Y or X

| Slope (factor): | 0.8273 |
|-----------------------------|-------------|
| Correlation Coefficient (R) | 0.9948 |
| Date of Issue | 6 July 2020 |

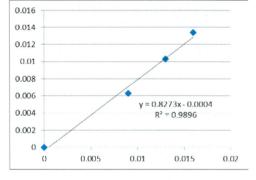

Remarks:

1. **Strong** Correlation (R>0.8)

2. Factor 0.8273 should be apply for TSP monitoring

*If R<0.5, repair or re-verification is required for the equipment

Calibration & Testing Laboratory

Certificate of Calibration 校正證書

Certificate No. : C204359 證書編號

- 1. The unit-under-test (UUT) was allowed to stabilize in the laboratory for over 12 hours, and switched on to warm up for over 10 minutes before the commencement of the test.
- 2. Self-calibration was performed before the test.
- 3. The results presented are the mean of 3 measurements at each calibration point.
- 4. Test equipment :

| Equipment ID | Description | Certificate No. |
|--------------|-------------------------------------|-----------------|
| CL280 | 40 MHz Arbitrary Waveform Generator | C200258 |
| CL281 | Multifunction Acoustic Calibrator | CDK1806821 |

- 5. Test procedure : MA101N.
- 6. Results :
- 6.1 Sound Pressure Level
- 6.1.1 Reference Sound Pressure Level

| UUT Setting | | | | Applie | d Value | UUT | IEC 61672 |

The values given in this Certificate only relate to the values measured at the time of the test and any uncertainties quoted will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the measurement. Sun Creation Engineering Limited shall not be liable for any loss or damage resulting from the use of the equipment.

The test equipment used for calibration is traceable to the National Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

Calibration check

DATE OF TEST / 測試日期 : 20 January 2021

TEST RESULTS / 測試結果

The results apply to the particular unit-under-test only. The results do not exceed manufacturer's specification. The results are detailed in the subsequent page(s).

The test equipment used for calibration are traceable to National Standards via :

- The Government of The Hong Kong Special Administrative Region Standard & Calibration Laboratory
- The Bruel & Kjaer Calibration Laboratory, Denmark
- Agilent Technologies / Keysight Technologies
- Fluke Everett Service Center, USA

Sun Creation Engineering Limited Calibration & Testing Laboratory

Certificate of Calibration 校正證書

Certificate No.: C210388 證書編號

- 1. The unit-under-test (UUT) was allowed to stabilize in the laboratory for over 12 hours before the commencement of the test.
- 2. The results presented are the mean of 3 measurements at each calibration point.
- 3. Test equipment :

Equipment ID CL130 CL281 TST150A Description Universal Counter Multifunction Acoustic Calibrator Measuring Amplifier <u>Certificate No.</u> C203952 CDK1806821 C201309

- 4. Test procedure : MA100N.
- 5. Results :
- 5.1 Sound Level Accuracy

| UUT | Measured Value | Mfr's Spec. | Uncertainty of Measured Value |
|---------------|----------------|-------------|-------------------------------|
| Nominal Value | (dB) | (dB) | (dB) |
| 94 dB, 1 kHz | 94.0 | ± 0.25 | ± 0.2 |

5.2 Frequency Accuracy

| UUT Nominal Value | Measured Value | Mfr's | Uncertainty of Measured Value |
|-------------------|----------------|----------------------------|-------------------------------|
| (kHz) | (kHz) | Spec. | (Hz) |
| 1 | 1.000 0 | $1 \text{ kHz} \pm 0.1 \%$ | ± 0.1 |

Remark : The uncertainties are for a confidence probability of not less than 95 %.

Note :

Only the original copy or the laboratory's certified true copy is valid.

The values given in this Certificate only relate to the values measured at the time of the test and any uncertainties quoted will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the measurement. Sun Creation Engineering Limited shall not be liable for any loss or damage resulting from the use of the equipment.

The test equipment used for calibration is traceable to the National Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

|---------------------|--|---|--|
| ADDRESS: | RM A 20/F., GOLD KING IND BLDG, NO. 35-41 TAI LIN PAI ROAD, KWAI CHUNG, N.T. HONG KONG | SUB-BATCH: LABORATORY: DATE RECEIVED: DATE OF ISSUE: | 0 HONG KONG 21-Apr-2021 28-Apr-2021 |

SPECIFIC COMMENTS

Equipment information (Brand name, Model No., Serial No. and Equipment No.) is provided by client. The performance of the equipment stated in this report is checked with independent reference material and results compared against a calibrated secondary source.

The "Tolerance Limit" quoted is the acceptance criteria applicable for similar equipment used by the laboratory or quoted from relevant international standards.

The "Next Calibration Date" is recommended according to best practice principle as practised by the laboratory or quoted from relevant international standards.

The validity of equipment/ meter performance only applies to the result(s) stated in the report.

| Equipment Type: | Multifunctional Meter |

1 INTRODUCTION

1.1 <u>BACKGROUND</u>

- 1.1.1 The main objective of the proposed site formation and associated infrastructural works for development of columbarium, crematorium (C&C) and related facilities at Sandy Ridge Cemetery is to increase the public cremation services and supply of public niches to meet the future demand.
- 1.1.2 The project includes site formation and associated works for development of C&C facilities at the Sandy Ridge Cemetery, road works within Sandy Ridge Cemetery, widening a section of Lin Ma Hang Road (from 6.5m to 7.3m), provision of off-site pick-up/drop-off points for shuttle buses as well as barging point at Siu Lam, Lok On Pai.
- 1.1.3 The Environmental Impact Assessment (EIA) report, including Environmental Monitoring and Audit Manual (EM&A Manual), was approved with conditions on 8 August 2016 (Register No.: AEIAR-198/2016). EPD issued an Environmental Permit (EP) for the Project (EP-534/2017) on 7 April 2017. A Further Environment Permit (FEP) for the Project (FEP-01/534/2017) was issued on 23 February 2018, variation of EP (EP-534/2017/A) and variation of FEP (FEP-01/534/2017/A) were issued on 24 December 2018.
- 1.1.4 According to Clause 3.1 of the FEP (FEP-01/534/2017/A), "The Permit Holder shall implement the EM&A programme in accordance with the procedures and requirements as set out in the EM&A Manual. Any changes to the programme shall be justified by the ET Leader and verified by the IEC as conforming to the information and requirements contained in the EM&A Manual before submission to the Director for approval".
- 1.1.5 This Ecologically Sensitive Habitats Monitoring Methodology articulates the protocol of monitoring the ecology of concerned habitats as specified in EM&A Manual.

1.2 <u>OBJECTIVE</u>

- 1.2.1 According to approved EIA report (AEIAR-198/2016), habitat types within project boundary comprise of watercourse, grassland, upland grassland, plantation, woodland and developed area. Natural habitats were of moderate ecological value in terms of species diversity, species rarity, species abundance, ecological linkage as well as nursery. Moreover, 0.3ha of wet woodland on the northern side of Sandy Ridge was deemed habitat with high ecological value. Four types of habitats were regarded as ecologically sensitive habitats, namely wet woodland, watercourses, upland grassland and woodland. Considering human disturbance in upcoming construction and operation phases, ecologically sensitive habitats shall be monitored in accordance with EM&A Manual.
- 1.2.2 The objective of ecologically sensitive habitats monitoring is to evaluate the effectiveness of measures to minimize impacts on concerned habitats from disturbance and pollution.

2 ECOLOGICALLY SENSITIVE HABITATS

2.1 DESCRIPTION OF HABITATS

2.1.1 In order to monitor the effectiveness of the measures to the minimise impact on ecologically sensitive habitats from disturbance and pollution, monthly monitoring during construction and operation phases is required as specified in EM&A Manual. Standard faunal transect and sampling surveys cover both wetland and non-wetland habitats:

| Wetland habitats | Non-wetland habitats |
|------------------|----------------------|
| Wet Woodland | Upland Grassland |
| Watercourses | Woodland |

- 2.1.2 Wet woodland is small patch present on northwest of the project boundary, and is confined by the marsh area to the north and the secondary woodland to the east, south and south-west parts. A number of mature trees *Cleistocalyx nervosum* and *Acronychia pedunculata* form the tree canopy, with other self-sown shrubs (including *Psychotria asiatica, Ligustrum sinense* and *Glochidion lanceolarium*) and trees (*Aporosa dioica* and *Litsea monopetala*). Whilst botanically it comprises of naturally regenerated secondary woodland and ground level are a series of small braided streams and weep points which even during the dry season remain wet. This creates a rather uncommon habitat in Hong Kong offering suitable conditions for a good assemblage of common wetland species. The wet woodland provides a good assemblage of micro-habitats, which is relatively undisturbed and has good linkages to other natural habitat: East Asian Porcupine, Leopard Cat, Red Muntjac, Two-striped Grass Frog, Small Snakehead, *Somanniathelphusa zanklon*, Dancing Shadow-emerald.
- 2.1.3 Seasonal watercourse running west to east in the eastern part of the area inside the Project boundary is shallower in gradient than those running off the hillside. This seasonal watercourse is heavily vegetated with wetland-associated herbs including *Commelina diffusa*, *Polygonum chinense*, *Colocasia esculenta* and *Dracaena sanderiana*. A mature tree of *Aquilaria sinensis* was recorded at the bank of the seasonal watercourse to the west of the Sandy Ridge Cemetery Office. Seasonal watercourses are restricted to the steeper slopes within the project boundary and are characterised by being entirely dry for much of the dry season. However, endemic crab *S. zanklon* population is supported by ephemeral watercourses close to the project boundary.
- 2.1.4 Upland grassland is the major habitat within the project boundary. The semi-natural habitat is dominated by typical upland grassland species: fern *Dicranopteris pedata*, grass *Neyraudia reynaudiana*, *Miscanthus floridulus*, climbing vines *Smilax china*, *Smilax glabra*, and shrubs such as *Rhodomyrtus tomentosa*, *Breynia fruticosa* and *Helicteres angustifolia*. Approximately 30 flowering spikes of two orchid species Bamboo Orchid and Toothed Habenaria were recorded near the hill top in the northern part of this upland grassland. Golden-headed Cisticola, which is considered as Local Concern by Fellowes *et al.* (2002), was also recorded in upland grassland on Sandy Ridge, including a proved breeding record of fledged young in September 2013. In addition, numerous species of conservation interest were recorded in EIA report, such as East Asian Porcupine, Leopard Cat, Red Muntjac, Great Swift, Tamil Grass Dart, Small Three-ring and Small Grass Yellow.

2.1.5 Scattered patches of woodland are present throughout the assessment area, with the largest contiguous block located immediately to the east of the project boundary. These woodlands are relatively young with single-layered of canopy dominants (~10 – 15m tall) including *A. dioica, Bridelia tomentosa, Cinnamomum burmannii, Daphniphyllum calycinum, Litsea glutinosa, Rhus succedanea,* and *Zanthoxylum avicennae*. Such areas comprise secondary woodland which is largely derived from natural regeneration and colonisation of trees as a result of seed dispersal by birds and/or bats. A mature tree of *A. sinensis* is located at the woodland edge at the central part of the Project according to EIA report.

2.2 MONITORING MEASURES OF WETLAND HABITATS

- 2.2.1 Wetland habitats include wet woodland and watercourses. Monitoring surveys using standardised quantitative methodology will be conducted at fixed points. For seasonal watercourse, survey shall be conducted whenever the habitat appears.
- 2.2.2 Measures to respond to decreases in numbers of aquatic fauna using the wetland habitats and action and limit levels to trigger these measures are detailed in Table 1.

| Action Level | Response | Limit Level | Response |
|----------------|-----------------------------|-------------|-----------------------------|
| Reduction in | Investigate cause and if | Reduction | Investigate cause and if |
| taxa diversity | cause identified as related | in taxa | cause identified as related |
| by 30% | to the project instigate | diversity | to the project instigate |
| | remedial action to remove | by 50% | remedial action. |
| | or reduce source of | | |
| | disturbance. | | |

Table 1 Action and Limit Levels and Responses to Evidence of Declines in Aquatic Fauna

2.3 MONITORING MEASURES OF NON-WETLAND HABITATS

- 2.3.1 Non-wetland habitats consist of upland grassland and woodland. Monthly quantitative surveys of non-aquatic fauna will be conducted using standard route transect counts.
- 2.3.2 Measures to respond to decreases in numbers of non-aquatic fauna using the non-wetland habitats and action and limit levels to trigger these measures are detailed in Table 2.

| Action Level | Response | Limit Level | Response |
|-------------------|-----------------------------|--------------|-----------------------------|
| Reduction in | Investigate cause and if | Reduction | Investigate cause and if |
| species diversity | cause identified as related | in species | cause identified as related |

Table 3 Survey Schedule

3.1 MAMMAL SURVEY

3.1.1 Mammal surveys will be conducted along the transects shown in Appendix 1 during both daytime and night time periods. Along with direct observations, other field signs, such as scats and tracks, will be searched and recorded if present.

3.2 BIRD SURVEY

3.2.1 Bird surveys will be conducted along the transects shown in Appendix 1 during the surveys, species and their vocalizing individuals recorded will be enumerated and recorded according to the habitat(s) they are utilising.

3.3 HERPETOFAUNA SURVEY

3.3.1 Reptile and amphibian surveys will be conducted along transects shown in Appendix 1 during surveys careful searches of appropriate microhabitats and refugia for reptiles and their vocalizing individuals will be undertaken and all reptiles observed will be identified and counted.

3.4 DRAGONFLY SURVEY

3.4.1 Dragonfly surveys will be conducted along transects shown in Appendix 1 during surveys all dragonflies seen will be identified and counted as accurately as possible.

3.5 BUTTERFLY SURVEY

3.5.1 Butterfly surveys will be conducted along transects shown in Appendix 1 during surveys all butterflies seen will be identified and counted as accurately as possible.

3.6 AQUATIC FAUNA SURVEY

3.6.1 Freshwater fishes and macro-invertebrates will be recorded by direct observation. All species trapped/recorded will be enumerated and identified (to the lowest taxonomic level possible), and the species of conservation importance photographed.

4 RESULT

This monitoring survey started on 8th June 2021, a sunny day. The day and night survey covered wetland and non-wetland areas. The survey was conducted by transect and at fixed points. All species seen will be identified and counted as accurately as possible.

Mammal

There was no mammal recorded in the monitoring area.

Bird

There were a total of 21 bird individuals from 10 species recorded in the monitoring area. No Golden-headed Cisticola was observed during the bird survey. A species of conservation interests were recorded in the monitoring area:

| Halcyon smyrnensis | White-throated Kingfisher | 白胸翡翠 | Fellowes et al. (2002): LC |
|--------------------|------------------------------|------|-------------------------------|
|--------------------|------------------------------|------|-------------------------------|

Herpetofauna

There was no reptile species recorded in the monitoring area. There were 2 amphibian species recorded in the monitoring area.

Butterfly

There were a total of 7 butterfly individuals from 4 species recorded in the monitoring area.

Dragonfly

There were a total of 4 odonate individuals from 2 species recorded in the monitoring area.

Freshwater communities

There was no freshwater community recorded in the monitoring area.

5 DISCUSSION

Data analysis was carried out to compare with the biodiversity within the site boundary in the same month over years. General description of the ecological conditions is first revealed in terms of abundance as well as species richness, following by statistical analysis of the existing database. The result is considered as significant whenever the drop of diversity indexes exceeds the percentages mentioned in previous sections 2.2 and 2.3.

5.1

Total abundances and species richness in June over years were compared to show the trend. Figures 1 and 2 indicate total species richness and total abundance with the site boundary respectively.

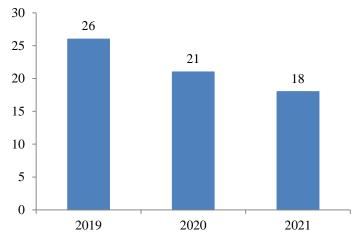

Figure 1: Bar chart showing the total species richness within site boundary from 2019 to 2021 (Actual quantity annotated at the top of each bar)

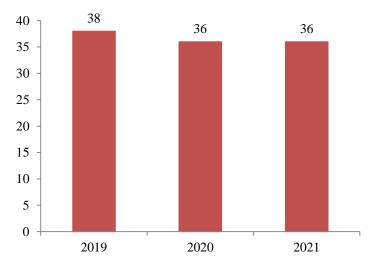

Figure 2: Bar chart showing the total abundance within site boundary from 2019 to 2021 (Actual quantity annotated at the top of each bar)

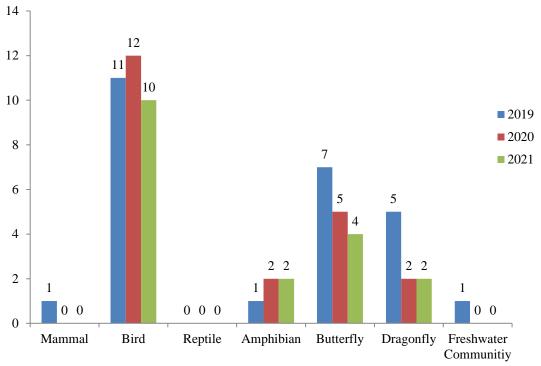

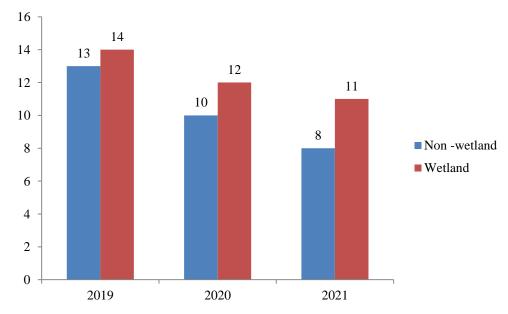

Figure 3: bar chart showing the species richness within site boundary by taxa from 2019 to 2021 (Actual quantity annotated at the top of each bar)

5.3

According to EM&A Manual, monitoring measures was determined by the species diversity of types of sensitive habitats, i.e. non-wetland and wetland habitats. Abundance and species richness by habitat type in June over years were compared in figures 4 and 5.

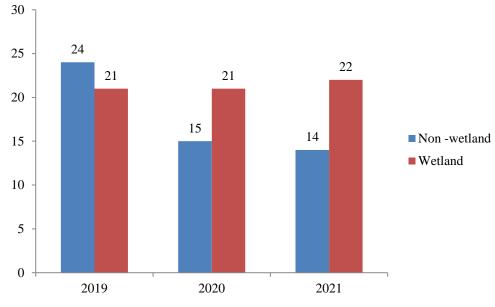

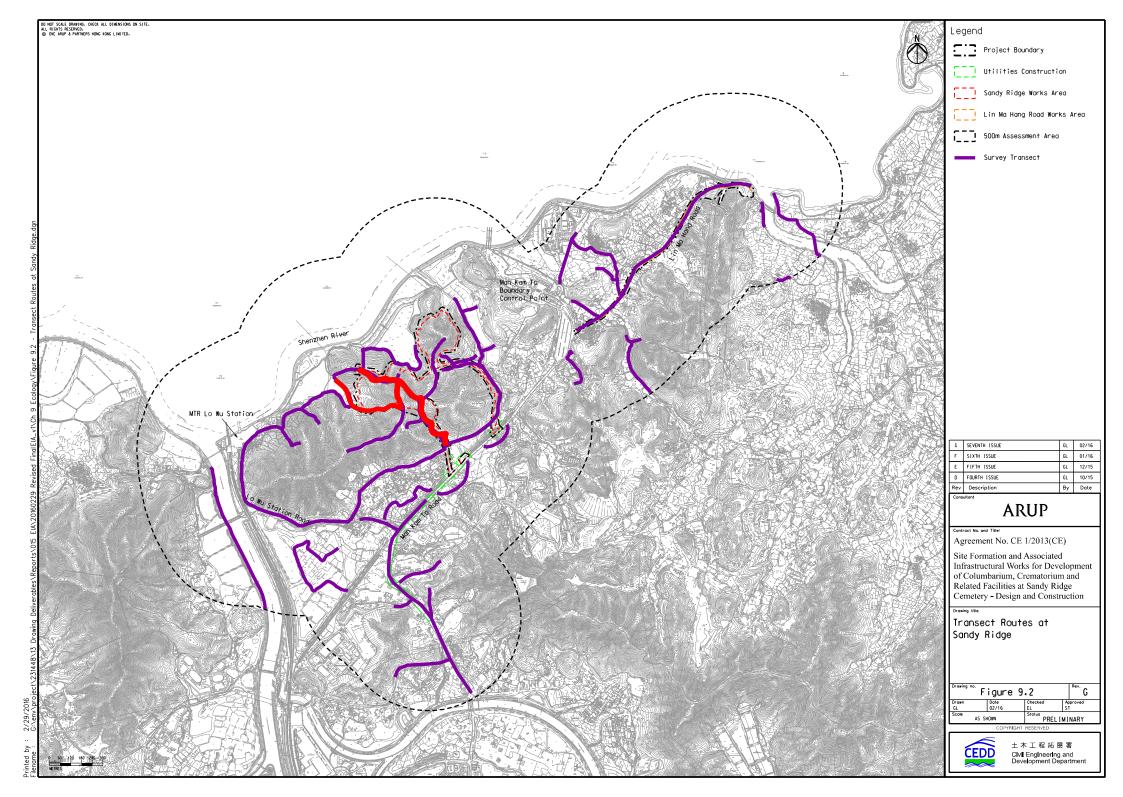

Figure 5: bar chart showing the abundance based on habitat type from 2019 to 2021 (Actual quantity annotated at the top of each bar)

5.4

After analysing survey results in June from 2019 to 2021, it is found that the species diversity reduced in wetland habitat. The reduction could be due to natural fluctuation. . Good practice during construction is required to prevent environmental contamination as well as unnecessary site clearance. Continuous monitoring is also recommended to inspect any significant decrease in species diversity.

1 INTRODUCTION

1.1 <u>BACKGROUND</u>

- 1.1.1 The main objective of the proposed site formation and associated infrastructural works for development of columbarium, crematorium (C&C) and related facilities at Sandy Ridge Cemetery is to increase the public cremation services and supply of public niches to meet the future demand.
- 1.1.2 The project includes site formation and associated works for development of C&C facilities at the Sandy Ridge Cemetery, road works within Sandy Ridge Cemetery, widening a section of Lin Ma Hang Road (from 6.5m to 7.3m), provision of off-site pick-up/drop-off points for shuttle buses as well as barging point at Siu Lam, Lok On Pai.
- 1.1.3 The Environmental Impact Assessment (EIA) report, including Environmental Monitoring and Audit Manual (EM&A Manual), was approved with conditions on 8 August 2016 (Register No.: AEIAR-198/2016). EPD issued an Environmental Permit (EP) for the Project (EP-534/2017) on 7 April 2017, variation of EP (EP-534/2017/A) were issued on 24 December 2018.
- 1.1.4 According to Clause 3.1 of the EP (EP-534/2017/A), "The Permit Holder shall implement the EM&A programme in accordance with the procedures and requirements as set out in the EM&A Manual. Any changes to the programme shall be justified by the ET Leader and verified by the IEC as conforming to the information and requirements contained in the EM&A Manual before submission to the Director for approval".
- 1.1.5 This Ecologically Sensitive Habitats Monitoring Methodology articulates the protocol of monitoring the ecology of concerned habitats as specified in EM&A Manual.

1.2 <u>OBJECTIVE</u>

- 1.2.1 According to approved EIA report (AEIAR-198/2016), habitat types within project boundary comprise of watercourse, grassland, upland grassland, plantation, woodland and developed area. Natural habitats were of moderate ecological value in terms of species diversity, species rarity, species abundance, ecological linkage as well as nursery. Moreover, 0.3ha of wet woodland on the northern side of Sandy Ridge was deemed habitat with high ecological value. Four types of habitats were regarded as ecologically sensitive habitats, namely wet woodland, watercourses, upland grassland and woodland. Considering human disturbance in upcoming construction and operation phases, ecologically sensitive habitats shall be monitored in accordance with EM&A Manual.
- 1.2.2 The objective of ecologically sensitive habitats monitoring is to evaluate the effectiveness of measures to minimize impacts on concerned habitats from disturbance and pollution.

2 ECOLOGICALLY SENSITIVE HABITATS

2.1 DESCRIPTION OF HABITATS

2.1.1 In order to monitor the effectiveness of the measures to the minimise impact on ecologically sensitive habitats from disturbance and pollution, monthly monitoring during construction and operation phases is required as specified in EM&A Manual. Standard faunal transect and sampling surveys cover both wetland and non-wetland habitats:

| Wetland habitats | Non-wetland habitats | |
|------------------|----------------------|--|
| Wet Woodland | Upland Grassland | |
| Watercourses | Woodland | |

- 2.1.2 Wet woodland is small patch present on northwest of the project boundary, and is confined by the marsh area to the north and the secondary woodland to the east, south and south-west parts. A number of mature trees *Cleistocalyx nervosum* and *Acronychia pedunculata* form the tree canopy, with other self-sown shrubs (including *Psychotria asiatica, Ligustrum sinense* and *Glochidion lanceolarium*) and trees (*Aporosa dioica* and *Litsea monopetala*). Whilst botanically it comprises of naturally regenerated secondary woodland and ground level are a series of small braided streams and weep points which even during the dry season remain wet. This creates a rather uncommon habitat in Hong Kong offering suitable conditions for a good assemblage of common wetland species. The wet woodland provides a good assemblage of micro-habitats, which is relatively undisturbed and has good linkages to other natural habitats. Several species of conversation importance were recorded in EIA report from this habitat: East Asian Porcupine, Leopard Cat, Red Muntjac, Two-striped Grass Frog, Small Snakehead, *Somanniathelphusa zanklon*, Dancing Shadow-emerald.
- 2.1.3 Seasonal watercourse running west to east in the eastern part of the area inside the Project boundary is shallower in gradient than those running off the hillside. This seasonal watercourse is heavily vegetated with wetland-associated herbs including *Commelina diffusa*, *Polygonum chinense*, *Colocasia esculenta* and *Dracaena sanderiana*. A mature tree of *Aquilaria sinensis* was recorded at the bank of the seasonal watercourse to the west of the Sandy Ridge Cemetery Office. Seasonal watercourses are restricted to the steeper slopes within the project boundary and are characterised by being entirely dry for much of the dry season. However, endemic crab *S. zanklon* population is supported by ephemeral watercourses close to the project boundary.
- 2.1.4 Upland grassland is the major habitat within the project boundary. The semi-natural habitat is dominated by typical upland grassland species: fern *Dicranopteris pedata*, grass *Neyraudia reynaudiana*, *Miscanthus floridulus*, climbing vines *Smilax china*, *Smilax glabra*, and shrubs such as *Rhodomyrtus tomentosa*, *Breynia fruticosa* and *Helicteres angustifolia*. Approximately 30 flowering spikes of two orchid species Bamboo Orchid and Toothed Habenaria were recorded near the hill top in the northern part of this upland grassland. Golden-headed Cisticola, which is considered as Local Concern by Fellowes *et al.* (2002), was also recorded in upland grassland on Sandy Ridge, including a proved breeding record of fledged young in September 2013. In addition, numerous species of conservation interest were recorded in EIA report, such as East Asian Porcupine, Leopard Cat, Red Muntjac, Great Swift, Tamil Grass Dart, Small Three-ring and Small Grass Yellow.

2.1.5 Scattered patches of woodland are present throughout the assessment area, with the largest contiguous block located immediately to the east of the project boundary. These woodlands are relatively young with single-layered of canopy dominants (~10 – 15m tall) including *A. dioica, Bridelia tomentosa, Cinnamomum burmannii, Daphniphyllum calycinum, Litsea glutinosa, Rhus succedanea,* and *Zanthoxylum avicennae*. Such areas comprise secondary woodland which is largely derived from natural regeneration and colonisation of trees as a result of seed dispersal by birds and/or bats. A mature tree of *A. sinensis* is located at the woodland edge at the central part of the Project according to EIA report.

2.2 MONITORING MEASURES OF WETLAND HABITATS

- 2.2.1 Wetland habitats include wet woodland and watercourses. Monitoring surveys using standardised quantitative methodology will be conducted at fixed points. For seasonal watercourse, survey shall be conducted whenever the habitat appears.
- 2.2.2 Measures to respond to decreases in numbers of aquatic fauna using the wetland habitats and action and limit levels to trigger these measures are detailed in Table 1.

| Action Level | Response | Limit Level | Response |
|----------------|-----------------------------|-------------|-----------------------------|
| Reduction in | Investigate cause and if | Reduction | Investigate cause and if |
| taxa diversity | cause identified as related | in taxa | cause identified as related |
| by 30% | to the project instigate | diversity | to the project instigate |
| | remedial action to remove | by 50% | remedial action. |
| | or reduce source of | | |
| | disturbance. | | |

Table 1 Action and Limit Levels and Responses to Evidence of Declines in Aquatic Fauna

2.3 MONITORING MEASURES OF NON-WETLAND HABITATS

- 2.3.1 Non-wetland habitats consist of upland grassland and woodland. Monthly quantitative surveys of non-aquatic fauna will be conducted using standard route transect counts.
- 2.3.2 Measures to respond to decreases in numbers of non-aquatic fauna using the non-wetland habitats and action and limit levels to trigger these measures are detailed in Table 2.

| Action Level | Response | Limit Level | Response |
|-------------------|-----------------------------|--------------|-----------------------------|
| Reduction in | Investigate cause and if | Reduction | Investigate cause and if |
| species diversity | cause identified as related | in species | cause identified as related |
| by 30% | to the project instigate | diversity by | to the project instigate |
| | remedial action to remove | 50% | remedial action. |
| | or reduce source of | | |
| | disturbance. | | |

Table 2 Action and Limit Levels and Responses to Evidence of Declines in Non-Aquatic Fauna

3 METHODOLOGY

The ecological survey includes all taxa being investigated in EIA report. Table 3 summarizes schedule of faunal surveys.

| Month | Jan | Feb | Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec |

Table 3 Survey Schedule

3.1 MAMMAL SURVEY

3.1.1 Mammal surveys will be conducted along the transects shown in Appendix 1 during both daytime and night time periods. Along with direct observations, other field signs, such as scats and tracks, will be searched and recorded if present.

3.2 BIRD SURVEY

3.2.1 Bird surveys will be conducted along the transects shown in Appendix 1 during the surveys, species and their vocalizing individuals recorded will be enumerated and recorded according to the habitat(s) they are utilising.

3.3 HERPETOFAUNA SURVEY

3.3.1 Reptile and amphibian surveys will be conducted along transects shown in Appendix 1 during surveys careful searches of appropriate microhabitats and refugia for reptiles and their vocalizing individuals will be undertaken and all reptiles observed will be identified and counted.

3.4 DRAGONFLY SURVEY

3.4.1 Dragonfly surveys will be conducted along transects shown in Appendix 1 during surveys all dragonflies seen will be identified and counted as accurately as possible.

3.5 BUTTERFLY SURVEY

3.5.1 Butterfly surveys will be conducted along transects shown in Appendix 1 during surveys all Butterflies seen will be identified and counted as accurately as possible.

3.6 AQUATIC FAUNA SURVEY

3.6.1 Freshwater fishes and macro-invertebrates will be recorded by direct observation. All species trapped/recorded will be enumerated and identified (to the lowest taxonomic level possible), and the species of conservation importance photographed.

4 RESULT

This monitoring survey started on 8th June 2021. A sunny day. The day and night survey covered wetland and non-wetland areas. The survey was conducted by transect and at fixed point. All species seen will be identified and counted as accurately as possible.

Mammal

There was no mammal recorded in the monitoring area.

Bird

There were total of 23 bird individuals from 9 species recorded in the monitoring area. 2 species of conservation interests were recorded in the monitoring area:

| Milvus migrans | Black Kite | 黑鳶 |
|--------------------|----------------|------|
| Centropus sinensis | Greater Coucal | 褐翅鴉鵑 |

Herpetofauna

There was one reptile individuals from one species recorded in the monitoring area. There was no amphibian recorded in the monitoring area.

Butterfly

There were 5 butterfly individuals from 3 species recorded in the monitoring area.

■ Dragonfly

There were 10 odonate individuals from 4 species recorded in the monitoring area.

Freshwater communities

There were 2 species of freshwater fish recorded in the monitoring area.

5 DISCUSSION

Data analysis was carried out to compare with the biodiversity within the site boundary in the same month over years. General description of the ecological conditions is first revealed in terms of abundance as well as species richness, following by statistical analysis of the existing database. The result is considered as significant whenever the drop of diversity indexes exceeds the percentages mentioned in previous sections 2.2 and 2.3.

5.1

Total abundances and species richness in June over years were compared to show the trend. Figures 1 and 2 indicate total species richness and total abundance with the site boundary respectively.

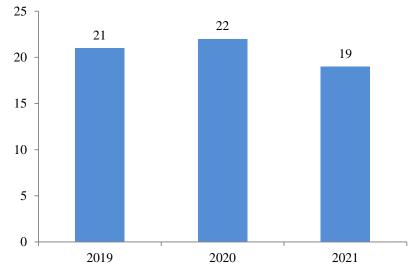

Figure 1: bar chart showing the total species richness within site boundary from 2019 to 2021 (Actual quantity annotated at the top of each bar)

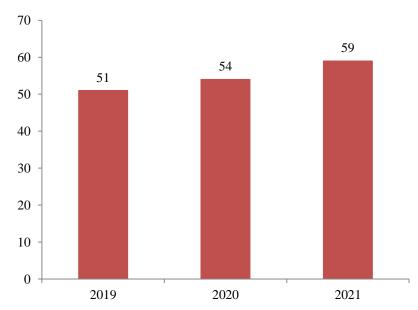

Figure 2: bar chart showing the total abundance within site boundary from 2019 to 2021 (Actual quantity annotated at the top of each bar)

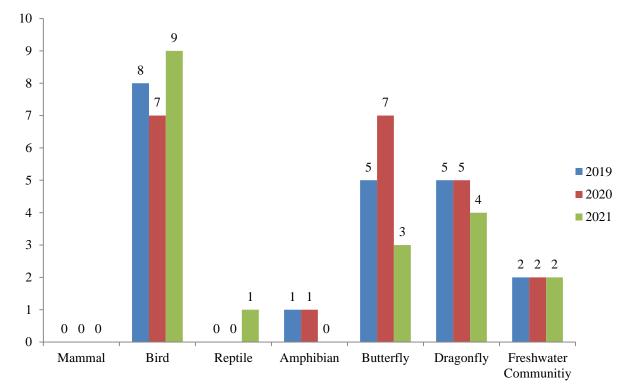

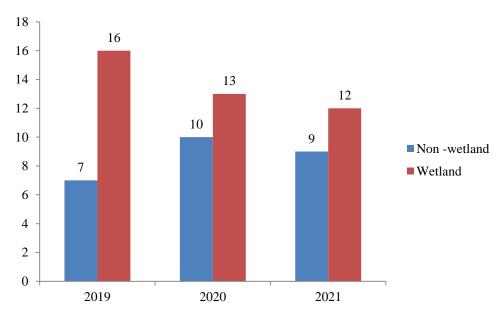

Figure 3: bar chart showing the species richness within site boundary by taxa from 2019 to 2021 (Actual quantity annotated at the top of each bar)

5.3

According to EM&A Manual, monitoring measures was determined by the species diversity of types of sensitive habitats, i.e. non-wetland and wetland habitats. Abundance and species richness by habitat type in June over years were compared in figures 4 and 5.

Muni Arborist

Agreement No. CE1/2013 (CE) Site Formation and Associated Infrastructural Works for Development of Columbarium, Crematorium and Related Facilities at Sandy Ridge Cemetery – Design and Construction Monthly Report of Ecologically Sensitive Habitats Monitoring

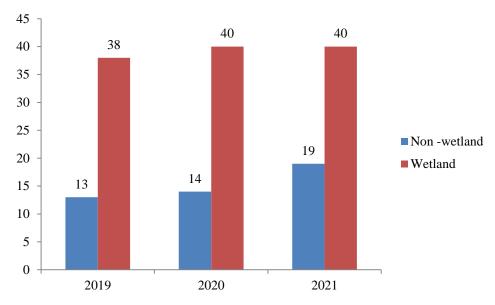

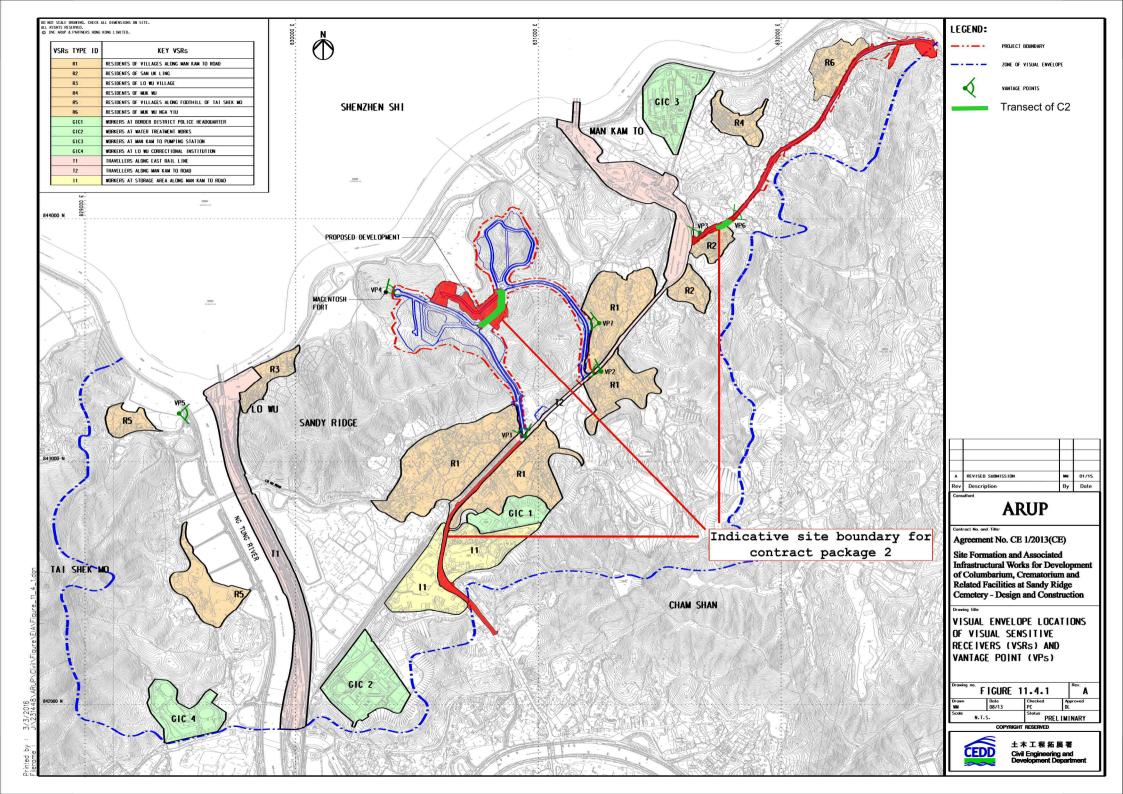

Figure 5: bar chart showing the abundance based on habitat type from 2019 to 2021 (Actual quantity annotated at the top of each bar)

5.4 After analysing survey results in June 2019 to 2021, there was no significant drop in species diversity for both non-wetland and wetland habitats, but the species richness in both non-wetland and wetland area were slightly decreased, it could be due to natural fluctuation. However, a good practice during construction is required to prevent environmental contamination as well as unnecessary site clearance. Moreover, continuous monitoring is required to inspect any significant reduction of species diversity.

| 1.6 | Are the woodland, plantation and other vegetation being protected and preserved in accordance with DEVB TC(W) No. 07/2015(E.g. Set up Tree Protection Zone)? | ~ | | | | | |
| 1.7 | Are the trees which are in direct conflict with the development proposal being transplanted as far as practical in accordance with and DEVB TC(W) No. 07/2015? | ~ | | | | | |
| 1.8 | Are compensatory planting for trees being provided to compensate the trees felled in accordance with DEVB TC(W) No. 07/2015? | ~ | | | | | |
| 1.9 | Are precautionary control measures to protect natural streams and rivers from adverse impact being implemented in accordance with ETWWB TCW No. 5/2005? (E.g. Construction debris and spoil should be covered up and properly disposed) | ~ | | | | | |
| 1.10 | Is light and glare control such as hooding being implemented during construction and operation to minimize light pollution and night time glare? (E.g. All security floodlights for construction sites should be equipped with adjustable shield, frosted diffusers and reflective covers) | ~ | | | | | |

Summary / Remarks:

Follow up actions taken by Contractor for previous comments:

N/A

New observation:

- 1. Formation of slope near retain trees was observed.
- 2. Tree protection zone for transplanted tree T2465 was missing.

Reminders:

- 1. Contractor is reminded to set up TPZ of proper size and with appropriate material around retain trees according to approved method statement.
- 2. Contractor is reminded to prevent the construction material pile within TPZ and ensure no works is allowed within the TPZ.
- 3. Transplanted trees T2465, T2468 and T2928 were in fair health condition with normal foliage color and density. Contractor is reminded to provide proper maintenance according to approved method statement.

Notes: (1) The waste flow table should cover the whole construction period of the Contract.

(2) The original estimates of the C&D materials should be the estimates at contract commencement and should not be altered during construction.

(3) Inert C&D materials that are specified in the Contract to be imported for use at the Site shall be separately indicated.

(4) The yearly estimates of the C&D materials should be updated as appropriate taking into account the latest works programme etc.

(5) Plastics refer to plastic bottles/containers, plastic sheets/foam from packaging material.

(6) Broken concrete for recycling into aggregates.

| 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 1 | 0 |

Notes:

(1) The performance targets are given in PS clause 6(14) above.

(2) The waste flow table shall also include C&D materials that are specified in the Contractor to be imported for use at the Site.

(3) Plastic refer to plastic bottles/containers, plastic sheets/foam from packaging material.

(4) The Contractor shall also submit the latest forecast of the total amount of C&D materials expected to be generated from the Works, together with a breakdown of the nature

- Hard Rocks and Large Broken Concrete = Cannot be defined at this stage
- Imported Fill = Estimated by the Contractor
- Metal = Estimated by the Contractor
- Paper/cardboard packaging = Estimated by the Contractor
- Plastics = Estimated by the Contractor

- Chemical Waste = Estimated by the Contractor (Spent lubricating oil, assume density 0.9kg/L)

- Other, e.g. general refuse = Estimated by the Contractor

Appendix N

Implementation Schedule for Environmental Mitigation Measures

Note: Chapters 1 to 3 of the EIA report present the background information of the Project, identified concurrent projects, objectives and scope for various environmental aspects, and description on alternative options and construction description. Chapters 4 to 12 of the EIA report present the EIA findings and mitigation measures are described below with cross-reference to the EIA report. Chapters 13 to 15 describe the environmental monitoring requirements and conclusion.

| EIA Ref. | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved | | | | | | |
|--|--|--|-------------------------|------------------------------|-------------------------|---|--|--|--|--|--|--|
| Common Mitigation Measures (Applicable to ALL Project Components, including DPs and Non-DPS) | | | | | | | | | | | | |
| Construction D | ust Impact | | | | | | | | | | | |
| S4.4.5.2 | The contractor shall follow the procedures and requirements given in the Air Pollution Control (Construction Dust) Regulation | Minimise dust impact at the nearby sensitive receivers | Contractor | All construction sites | Construction phase | APCO To control the dusi impact to meet HKAQO and TM-EIAC criteria | | | | | | |
| S4.4.5.3 | Water spraying every hour for all active works area. | Minimise dust impact at the nearby sensitive receivers | Contractor | All construction sites | Construction phase | APCO To control the dust impact to meet HKAQO and TM-EIAO criteria | | | | | | |
| S4.4.5.2 | Any excavated or stockpile of dusty material should be covered entirely by impervious sheeting or sprayed with water to maintain the entire surface wet and then removed or backfilled or reinstated where practicable within 24 hours of the excavation or unloading; Any dusty materials remaining after a stockpile is removed should be wetted with water and cleared from the surface of roads; A stockpile of dusty material should not be extended beyond the pedestrian barriers, fencing or traffic cones; The load of dusty materials on a vehicle leaving a construction site should be covered entirely by impervious sheeting to ensure that the dusty materials do not leak from the vehicle; Vehicle wheel washing facilities should be provided at each construction | Minimise dust impact at the nearby sensitive receivers | Contractor | All construction sites | Construction phase | APCO To control the dust impact to meet HKAQO and TM-EIAO criteria | | | | | | |

| EIA Ref. | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|----------|--|--|-------------------------|----------------------|-------------------------|---|
| | site exit. Immediately before leaving the construction site, every vehicle should be washed to remove any dusty materials from its body and wheels; | | | | | |
| | • When there are open excavation and reinstatement works, hoarding of not less than 2.4m high should be provided as far as practicable along the site boundary. Good site practice shall also be adopted by the Contractor to ensure the conditions of the hoardings are properly maintained throughout the construction period; | | | | | |
| | • The portion of any road leading only to construction site that is within 30m of a vehicle entrance or exit should be kept clear of dusty materials; | | | | | |
| | • Surfaces where any pneumatic or power-driven drilling, cutting, polishing or other mechanical breaking operation takes place should be sprayed with water or a dust suppression chemical continuously; | | | | | |
| | • Any area that involves demolition activities should be sprayed with water or a dust suppression chemical immediately prior to, during and immediately after the activities so as to maintain the entire surface wet; | | | | | |
| | • Any skip hoist for material transport should be totally enclosed by impervious sheeting; | | | | | |
| | • Every stock of more than 20 bags of cement or dry pulverised fuel ash (PFA) should be covered entirely by impervious sheeting or placed in an area sheltered on the top and the 3 sides; | | | | | |
| | • Loading, unloading, transfer, handling or storage of bulk cement or dry PFA should be carried out in a totally enclosed system or facility, and any vent or exhaust should be fitted with an effective fabric filter or equivalent air pollution control system; | | | | | |
| | • Exposed earth should be properly treated by compaction, turfing, hydroseeding, vegetation planting or sealing with latex, vinyl, bitumen, shortcrete or other suitable surface stabiliser within six months after the last construction activity on the construction site or part of the construction site where the exposed earth lies. | | | | | |

| EIA Ref. | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|----------|--|--|-------------------------|---|-------------------------|---|
| S4.4.5.1 | Implement regular dust monitoring under EM&A programme during the construction stage. | Monitoring of dust impact | Contractor | Selected representative dust monitoring station | Construction phase | • TM-EIAO |
| S4.4.5.3 | All road surface within the barging facilities will be paved. Dust enclosures will be provided for the loading ramp, installation of 3-sided screen with top cover and the provision of water sprays at the discharge point would be provided. Vehicles will be required to pass through designated wheel wash facilities. Continuous water spray at the loading point. | Minimise dust impact at the nearby sensitive receivers | Contractor | Barging point at Siu Lam | Construction phase | • TM-EIAO |

| EIA Ref. | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved | | | |
|--------------------|---|---|-------------------------|---|-------------------------|--|--|--|--|
| Construction Noise | onstruction Noise | | | | | | | | |
| \$5.5.5.3 | Implement the following good site management practices: only well-maintained plant should be operated on-site and plant should be serviced regularly during the construction programme; machines and plant (such as trucks, cranes) that may be in intermittent use should be shut down between work periods or should be throttled down to a minimum; plant known to emit noise strongly in one direction, where possible, be orientated so that the noise is directed away from nearby NSRs; silencers or mufflers on construction equipment should be properly fitted and maintained during the construction works; mobile plant should be sited as far away from NSRs as possible and practicable; material stockpiles, mobile container site office and other structures should be effectively utilised, where practicable, to screen noise from onsite construction activities. | Control construction noise | Contractor | All construction sites | Construction phase | • Annex 5, TM-EIAO | | | |
| S5.5.5.5 | Adopt quiet plants during the construction of viaduct, widening of Sha Ling Road, construction of platform for crematorium and widening of Lin Ma Hang Road. The quiet plants should be made reference to the PME listed in the TM or the QPME/ other commonly used PME listed in EPD web pages or taken from BS5228: Part 1: 2009 Noise Control on Construction and Open Sites as far as possible. | Reduce the noise levels of plant items | Contractor | Works area for construction of viaduct, widening of Sha Ling Road, construction of platform for crematorium and widening of Lin Ma Hang Road | | • Annex 5, TM-EIAO | | | |

| EIA Ref. | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|-------------------------|---|---|-------------------------|---|---|--|
| S5.5.5.6 | Install temporary noise barriers (in the form of site hoardings, approx. 2.4m high) located on the site boundaries between noisy construction activities and NSRs. The conditions of the hoardings shall be properly maintained throughout the construction period. | Reduce the construction noise levels at low-level zone of NSRs through partial screening. | Contractor | All construction sites where practicable | Construction phase | • Annex 5, TM-EIAO |
| S5.5.5.7 – S5.5.5.12 | Install movable noise barriers (typical design is wooden framed barrier with a small-cantilevered upper portion of superficial density no less than 7kg/m^2 on a skid footing with 25mm thick internal sound absorptive lining), acoustic mat or full enclosure, screen the noisy plants including air compressors, generators etc. | Screen the noisy plant items to be used at all construction sites | Contractor | All construction sites where practicable | Construction phase | • Annex 5, TM-EIAO |
| \$5.5.5.13 | Sequencing operation of construction plants where practicable. | Operate sequentially within the same work site to reduce the construction noise | Contractor | All construction sites where practicable | Construction phase | • Annex 5, TM-EIAO |
| S13.2.1.1 – S13.4.1.2 | Implement a noise monitoring under EM&A programme. | Monitor the construction noise levels at the selected representative locations | Contractor | Selected representativ e noise monitoring station | Construction phase | • TM-EIAO |
| Operational Noise (Road | d Traffic Noise) | | | 1 | L | |
| S5.6.6.4 | Provide a series of noise mitigation measures including absorptive noise barriers and low noise road surfacing materials along Lin Ma Hang Road and Sha Ling Road before operation of the proposed project for existing and planned representative NSRs. Locations of noise mitigation measures are stated as following: <i>For existing representative NSRs</i> Approx. 12m of absorptive noise barrier 2.5m above road level along Sha Ling Road (MM1); Approx. 92m of absorptive noise barrier 2.5m above road level along Sha Ling Road (MM2); | Reduce operation noise from road traffic | Contractor | Refer to Figures 5.6.9 – 5.6.13 of the EIA Report | Prior to operation of the Project for existing representative NSRs. While for barriers to protect planned representative NSRs, it should constructed before intake of planned representative NSRs. | |

| EIA Ref. | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|----------|---|---|-------------------------|----------------------|-------------------------|--|
| | • Approx. 28m of absorptive noise barrier 3m above road level along Project Road near Sha Ling Road (MM3); | | | | | |
| | • Approx. 51m of absorptive noise barrier 3m above road level along Project Road near Sha Ling Road (MM4); | | | | | |
| | • Approx. 25m of absorptive noise barrier 4m above road level along Lin Ma Hang Road near San Uk Ling (MM5); | | | | | |
| | Approx. 21m of absorptive noise barrier 4m above road level along Lin Ma Hang Road near San Uk Ling (MM6); | | | | | |
| | • Approx. 14m of absorptive noise barrier 4m above road level along Lin Ma Hang Road near San Uk Ling (MM7); | | | | | |
| | Approx. 18m of absorptive noise barrier 3m above road level along Lin Ma Hang Road near San Uk Ling (MM8); | | | | | |
| | • Approx. 42m of absorptive noise barrier 3m above road level along temporary pullover space opposite San Uk Ling (MM9); | | | | | |
| | Approx. 93m of absorptive noise barrier 3m above road level along Lin Ma Hang Road opposite San Uk Ling (MM10); | | | | | |
| | • Approx. 185m of low noise surfacing materials along Lin Ma Hang Road near San Uk Ling (MM11); | | | | | |
| | For planned representative NSRs | | | | | |
| | Approx. 36m of absorptive noise barrier 5m above road level along Lin Ma Hang Road near Muk Wu Nga Yiu (MM12); | | | | | |
| | Approx. 47m of absorptive noise barrier 5m above road level along Lin Ma Hang Road near Muk Wu Nga Yiu (MM13); | | | | | |
| | Approx. 31m of absorptive noise barrier 5m above road level along Lin Ma Hang Road near Muk Wu Nga Yiu (MM14); | | | | | |
| | Approx. 31m of absorptive noise barrier 5m above road level along Lin Ma Hang Road near Muk Wu Nga Yiu (MM15); | | | | | |
| | Approx. 41m of absorptive noise barrier 5m above road level along Lin Ma Hang Road near Muk Wu Nga Yiu (MM16); | | | | | |

| EIA Ref. | Recommended Mitigation Measures | ObjectivesoftheRecommendedMeasures &Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|----------|--|--|-------------------------|----------------------|-------------------------|--|
| | • Approx. 340m of low noise surfacing materials along Lin Ma Hang Road near Muk Wu Nga Yiu (MM17). | | | | | |

| EIA Ref. | Recommended Mitigation Measures | ObjectivesoftheRecommendedMeasures&Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|-------------------------|---|--|-------------------------|--|-------------------------|---|
| Water Quality (Construc | tion Phase) | | | | | |
| S6.4.4.1 – S6.4.4.3 | In accordance with the Practice Note for Professional Persons on Construction Site Drainage, Environmental Protection Department, 1994 (ProPECC PN1/94), construction phase mitigation measures shall include the following: General Site Operation At the start of site establishment, perimeter cut-off drains to direct offsite water around the site should be constructed with internal drainage works and erosion and sedimentation control facilities implemented. Channels (both temporary and permanent drainage pipes and culverts), earth bunds or sand bag barriers should be provided on site to direct stormwater to silt removal facilities. The design of the temporary on-site drainage system will be undertaken by the contractor prior to the commencement of construction; Diversion of natural stormwater should be avoided as far as possible. The design of temporary on-site drainage should prevent runoff going through site surface, construction machinery and equipment in order to avoid or minimise polluted runoff. Sedimentation tanks with sufficient capacity, constructed from pre-formed individual cells of approximately 6 to 8 m³ capacities, are recommended as a general mitigation measure which can be used for settling surface runoff prior to disposal. The system capacity shall be flexible and able to handle multiple inputs from a variety of sources and suited to applications where the influent is pumped; The dikes or embankments for flood protection should be implemented around the boundaries of earthwork areas. Temporary ditches should be incorporated in the permanent drainage channels to enhance deposition rates; The design of efficient silt removal facilities should be based on the | To minimise water quality impact from construction site runoff and general construction activities | Contractor | All construction sites where applicable | Construction phase | • Water Pollution Control Ordinance • ProPECC PN1/94 • TM-EIAO • TM-DSS |
| | guidelines in Appendix A1 of ProPECC PN 1/94. The detailed design of | | | | | |

| EIA Ref. | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|----------|---|---|-------------------------|----------------------|-------------------------|--|
| | the sand/silt traps shall be undertaken by the contractor prior to the commencement of construction; | | | | | |
| | • Construction works should be programmed to minimise surface excavation works during the rainy seasons (April to September). All exposed earth areas should be completed and vegetated as soon as possible after earthworks have been completed. If excavation of soil cannot be avoided during the rainy season, or at any time of year when rainstorms are likely, exposed slope surfaces should be covered by tarpaulin or other means; | | | | | |
| | • If the excavation of trenches in wet periods is necessary, it should be dug and backfilled in short sections wherever practicable. Water pumped out from trenches or foundation excavations should be discharged into storm drains via silt removal facilities; | | | | | |
| | • All drainage facilities and erosion and sediment control structures should be regularly inspected and maintained to ensure proper and efficient operation at all times and particularly following rainstorms. Deposited silt and grit should be removed regularly and disposed of by spreading evenly over stable, vegetated areas; | | | | | |
| | • All open stockpiles of construction materials (for example, aggregates, sand and fill material) of more than 50m ³ should be covered with tarpaulin or similar fabric during rainstorms. Measures should be taken to prevent the washing away of construction materials, soil, silt or debris into any drainage system; | | | | | |
| | • Manholes (including newly constructed ones) should always be covered and temporarily sealed so as to prevent silt, construction materials or debris being washed into the drainage system and storm runoff being directed into foul sewers; | | | | | |
| | • Precautions be taken at any time of year when rainstorms are likely, actions to be taken when a rainstorm is imminent or forecasted, and actions to be taken during or after rainstorms are summarised in Appendix A2 of ProPECC PN 1/94. Particular attention should be paid to the control of silty surface runoff during storm events, especially for areas located near steep slopes; | | | | | |

| EIA Ref. | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|---------------------|--|---|-------------------------|---|-------------------------|--|
| | All vehicles and plant should be cleaned before leaving a construction site to ensure no earth, mud, debris and the like is deposited by them on roads. An adequately designed and sited wheel washing facilities should be provided at every construction site exit where practicable. Washwater should have sand and silt settled out and removed at least on a weekly basis to ensure the continued efficiency of the process. The section of access road leading to, and exiting from, the wheel-wash bay to the public road should be paved with sufficient backfall toward the wheel-wash bay to prevent vehicle tracking of soil and silty water to public roads and drains; Oil interceptors should be provided in the drainage system downstream of any oil/fuel pollution sources. The oil interceptors should be emptied and cleaned regularly to prevent the release of oil and grease into the storm water drainage system after accidental spillage. A bypass should be provided for the oil interceptors to prevent flushing during heavy rain; Construction solid waste, debris and rubbish on site should be collected, handled and disposed of properly to avoid water quality impacts; All fuel tanks and storage areas should be provided with locks and sited on sealed areas, within bunds of a capacity equal to 110% of the storage capacity of the largest tank to prevent spilled fuel oils from reaching water sensitive receivers nearby; Regular environmental audit on the construction site should be carried out in order to prevent any malpractices. Notices should be posted at conspicuous locations to remind the workers not to discharge any sewage or wastewater into the water bodies, marsh and ponds; Adopt best management practices. | | | | | |
| S6.4.4.4 – S6.4.4.5 | Sewage from workforce Portable chemical toilets and sewage holding tanks are recommended for handling the construction sewage generated by the workforce. A licensed contractor should be employed to provide appropriate and adequate portable toilets and be responsible for appropriate disposal and maintenance; | To minimise water quality from sewage effluent | Contractor | All construction sites where practicable | Construction phase | Water Pollution Control Ordinance TM-DSS |

| Ecology (Construction | Phase) | | | | | |
| \$9.7.2.3 | Preparation and submission of Upland Grassland Reinstatement Plan to EPD for agreement. | An Upland Grassland Reinstatement Plan will be prepared by a qualified ecologist/botanist with full details of the findings of a baseline grassland survey, the practical details and methodology of the physical excavation, transport and storage or turves/topsoil and their subsequent reinstatement once the receptor sites have been established, along with an implementation programme of reinstatement, post- reinstatement monitoring and maintenance programme. A contingency plan should be proposed in the Grassland Reinstatement Plan so as to describe the action and limit levels and the action plan if certain performance criteria (such as area of preferred habitat) are not met during the monitoring and maintenance period. | Project Proponent/ Detailed Design Consultant (qualified ecologist/ botanist) for Upland Grassland Reinstatement Plan | Engineered slopes of Crematorium Indicative locations for Grassland Reinstatement should be referred to Figure 9.11 of the EIA Report | Prior to construction phase | Reinstatement and establishment requirements to be detailed in Upland Grassland Reinstatement Plan TM-EIAO |
| S9.7.2.5 – S9.7.2.6 | Preparation and submission of a Vegetation Survey Report and Transplantation Proposal (if needed as concluded in the Vegetation Survey Report) to EPD for agreement. | The Vegetation Survey will report the presence, as well as update the conditions, number, locations and habitat types of any identified floral species of conservation importance to be impacted by the development, | Project Proponent/ Detailed Design Consultant (qualified ecologist/ botanist) for | Within the Project Area where applicable | Prior to construction phase | • Survey findings and transplantation methodology to be detailed in Vegetation Survey Report and Transplantation Plan |

| EIA Ref. | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|-------------------------------------|---|---|---|---|--|---|
| | | and evaluate suitability and/or practicality of transplantation. The Transplantation Proposal will recommend locations of the receptor site(s), transplantation methodology, implementation programme of transplantation and post-transplantation monitoring and maintenance programme. | Vegetation Survey Report and Transplantation Proposal. | | | respectively. • TM-EIAO. |
| \$9.7.5.3 – \$9.7.5.5, \$9.8.1.6 | Preparation and submission of Enhancement Woodland Proposal to EPD for agreement. | Recommend appropriate enhancement planting programme, planting and post-transplantation monitoring methodology, action plan for monitoring the enhancement planting and maintenance programme. | Project Proponent/ Detailed Design Consultant (qualified ecologist/ botanist) for Wooded Area Proposal. | Filled slope west of the platform, and north west of the platform in the valley below MacIntosh Fort Indicative locations for Enhancement Woodland should be referred to Figure 9.11 of the EIA Report | Prior to construction phase | Enhancement planting and establishment requirements to be detailed in Wooded Enhancement Proposal. TM-EIAO |
| S9.7.3.1 – S9.7.3.3 | Indirect impacts due to potential changes in water quality, hydrology and sedimentation could occur to a series of downstream watercourses and wetland systems (including the wet woodland, marsh and mitigation ponds) during both the construction (for the Platform and LMHR widening works) and operational stages. Generally, indirect water impact to any aquatic fauna during the construction phase should easily be avoided by implementing water control measures (ETWB TCW No. 5/2005) to avoid direct or indirect impacts any watercourses and good site practices (further details are discussed in Section 6 of the EIA Report). | Minimise the indirect impacts to Water Quality and Hydrology | Contractor /detailed design consultant. | On the edge of any active works area, 30m from the watercourse | Prior to commencement and during construction phase | • ETWB TCW No. 5/2005 • TM-EIAO |

| EIA Ref. | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|---------------------|---|--|---------------------------------|---------------------------|--|--|
| | In addition, construction phase impacts on the watercourses, riparian corridor and fauna using these areas will be minimised by erection of a 2m high, solid, dull green site boundary fence on the edge of any active works area, 30m from the watercourse. Where this is not practicable due to site constraints, demarcation fencing will need to be erected to prevent unauthorised encroachment into the riparian corridor by constructions works and traffic. Detailed mitigation measures will be designed at the detailed design stage. | | | | | |
| S9.7.3.4 – S9.7.3.6 | Mitigation for noise disturbance (details refer to \$5.5.5 to \$5.6.6 of this table). Site formation and construction are tentatively proposed to cover a 65-month period from mid 2017 to late 2022. As a precautionary approach, consideration should be given at the detailed design stage to avoid the use of highly reflective materials in the design and implementing the use of opaque materials, fritting, breaking up external reflections with stickers or plastic wrap and/or any other bird-friendly design for noise barriers. Works will be restricted to daytime and any construction lighting should be designed and positioned as to not impact on adjacent ecologically sensitive areas. | The construction work and site formation will be phased in order to reduce overall noise disturbance impacts in particular areas. Collisions usually occurs as a result of birds perceiving a clear path through an object that is transparent or appears to be transparent at some distance, or if the noise barrier is highly reflective which would appear to be composed of the adjacent natural vegetation. Furthermore, mitigation measures to control noise disturbance during this phase will involve the selection of quieter plant, use of movable noise barriers and erection of hoarding and fencing to demarcate the site boundary | Contractor Project Proponent | All construction sites | Prior to commencement and during construction phase | • TM-EIAO. |

| EIA Ref. | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|------------|---|---|-------------------------|---------------------------|--|--|
| \$.9.7.3.7 | In order to demonstrate ecological awareness and to minimise the risk of indirect impacts from water pollution and hill fires, a series of good site practices should be adopted by site staff throughout the construction phase at each works site. These are as follows: Put up signs to alert site staff about any locations which are ecologically sensitive and measures to prevent accidental impacts; Erection of temporary geotextile silt or sediment fences/oil traps around any earth-moving works to trap any sediments and prevent them from entering watercourses; Prohibition of soil storage against trees or close to waterbodies; Delineation of works site to prevent encroachment onto adjacent habitats and fence off areas which have some ecological value; No smoking, hot works or sources of fire close to upland grassland; No on-site burning of waste; and Waste and refuse in appropriate receptacles. | Minimise impacts on hydrological condition and water quality of hillside watercourses and reduce chances of hillfires. | Contractor | All construction sites | Prior to commencement and during construction phase | • TM-EIAO. |
| S.9.7.3.9 | Precautionary checks by a suitably experienced ecologist of the vegetation for the presence of nesting birds should be carried out in the breeding season (February to July) before vegetation clearance. These impacts can be avoided by conducting vegetation clearance during the non-breeding season (tentatively August-January) and phased through the project period to minimise impacts. | Minimise the impacts to breeding birds within the works areas. | Contractor | All construction sites | Prior to site clearance | • TM-EIAO • WAPO |

| EIA Ref. | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|---------------------|---|---|--|---|---|--|
| S9.7.2 | Establishment, maintenance and monitoring of a Upland Grassland Reinstatement Area | Reinstatement of upland grassland and to maintain connectivity in Sandy Ridge. | Project Proponent / Contractor / Maintenance Authority | Engineered slopes of Crematorium Indicative locations for Grassland Reinstatement should be referred to Figure 9.11 of the EIA Report | Operational phase | Monitoring methodology and successfulness of survival of upland grassland should follow Upland Grassland Reinstatement Plan. TM-EIAO. |
| S9.7.5.3 – S9.7.5.6 | Establishment, maintenance and monitoring of an enhancement woodland | Recommend appropriate enhancement planting programme, planting and post- transplantation monitoring methodology, action plan for monitoring the enhancement planting and maintenance programme. | Project Proponent/ Detailed Design Consultant (qualified ecologist/ botanist) for Wooded Area Proposal. | Filled slope west of the platform, and north west of the platform in the valley below MacIntosh Fort Indicative locations for Enhancement Woodland should be referred to Figure 9.11 of the EIA Report | Operational phase | Enhancement planting and establishment requirements to be detailed in Wooded Area Proposal. TM-EIAO. |
| S9.7.4.1 – S9.7.4.5 | Mitigation for Impacts to Water Quality and Hydrology (Operational Phase) Stormwater drainage system will be further developed in detailed design stage to collect dusty materials from water collected from the platform and associated road system. Silt traps will be installed to ensure removal of dusty materials. Regular cleaning will be conducted to avoid debris entering downstream rivers during first flush; and The proposed small diameter bore pile system at the foundation of the proposed platform structure. | Specific mitigation measures will be implemented to prevent indirect impacts wetland habitats and fauna. Mitigation measures are to be further developed in the detailed design stage to address any water quality impacts due to the drainage from the proposed platform, and any erosion issues due to the drainage from the | Detailed Design Consultant | Wet woodland (and further down the marsh and mitigation ponds) and the seasonal watercourse to the east of the Project boundary | Detailed Design phase/Operational phase | • TM-EIAO |

| EIA Ref. | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|-----------------------|--|--|---|---------------------------|---|--|
| | | proposed platform. The surface runoff collected on the platform will be captured by a stormwater drainage system, which will be further developed at the detailed design stage The proposed small diameter bore pile system at the foundation of the proposed platform structure would allow a notional free area of about 87 – 91% for groundwater to pass through | | | | |
| \$9.7.4.6 – \$9.7.4.7 | <u>Minimise the potential indirect light disturbance on the Street Lighting on</u> <u>fireflies surrounding the Project Site during operational phase</u> It is considered that at the detailed design stage, street lighting of similar lux/light intensity as to what is currently present is utilised. Furthermore, as a precautionary measure, it is suggested that deflectors are fixed to the back of the street lights to prevent additional light reaching the marsh and causing adverse impacts to fireflies. | Reduce light pollution and impact on the nearby habitats and their associated wildlife groups, particularly nocturnal fireflies. | Detailed Design/ Consultant/ Operator | The whole Project area | Detailed Design phase/Operational phase | • TM-EIAO |
| S9.7.4.9 – S9.7.4.9 | The increase in visitors to the columbarium allows greater public access to the upland grassland of Sandy Ridge and in turn, the potential for hill fires is also increased. Fires may emanate from discarded cigarettes and from specific practices during festivals or grave-sweeping. In order to reduce the risk of hill fires, sufficient educational signage should be displayed throughout the columbarium warning people of the risks of fire and strictly prohibits practices that could cause hill fires. This will require input in the detailed design phase. | Minimise the risk of hill fires. | Detailed Design/ Consultant/ Operator | The whole Project area | Detailed Design phase/Operational phase | • TM-EIAO |

| S11.8.1.3, Table 11.9 | CM8 - Implementing precautionary control measures during construction stage accordingly to ETWB TCW No. 5/2005 – Protection of natural streams/rivers from adverse impacts arising from construction works to avoid direct or indirect impacts any watercourses and good site practices. | Minimize landscape impact | Funded by CEDD and implemented by Contractor | Work site/ during construction | Design and Construction phase | • ETWB TCW No. 5/2005 – Protection of natural streams/rivers from adverse impacts arising from construction works |
| S11.8.1.3, Table 11.9 | OM1 – Compensatory Woodland Planting - The arrangement of compensatory planting (e.g. areas of woodland to be compensated and space to be allowed within the Project Site) will be subject to detailed engineering design, landscape design and planting plan, and is recommended to be implemented prior to the construction activities as far as practical. | Compensate the loss of landscape greenery and enhance the overall visual value of the site. | Funded by CEDD and implemented by Contractor | Within Project Site | Prior to Construction phase | DEVB TC(W) 07/2015 – Tree Preservation Latest recommended horticultural practices from Greening, Landscape and Tree Management (GLTM) Section, DevB DEVB TCW No. 06/2015 – Maintenance of Vegetation and Hard Landscape Features |

| EIA Ref. | Recommended Mitigation Measures | ObjectivesoftheRecommendedMeasures&Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|-----------------------|--|--|--|------------------------|-------------------------|---|
| S11.8.1.3, Table 11.9 | OM2 – Compensatory Tree Planting for Plantation and Other Vegetated Areas - Compensatory planting should be provided in accordance with DEVB TCW No. 07/2015 to compensate for those trees felled. According to the preliminary design, compensatory trees will be planted on the cut/fill slopes, along new roads and in car parks. The selection of planting species shall be made with reference to the species identified in the future Detailed Tree Survey and be native to Hong Kong or the South China region. | Compensate the loss of landscape greenery and enhance the overall visual value of the site. | Funded by CEDD and implemented by Contractor | Within Project Site | Construction phase | DEVB TC(W) 07/2015 – Tree Preservation Latest recommended horticultural practices from Greening, Landscape and Tree Management (GLTM) Section, DevB DEVB TCW No. 06/2015 – Maintenance of Vegetation and Hard Landscape Features |
| S11.8.1.3, Table 11.9 | OM3 – Amenity Planting and aesthetic streetscape design of hard landscaping for Pedestrian Walkway, Roadside - Roadside amenity planting should be provided along Sha Ling Road, Lin Ma Hang Road, as well as the internal road within Sandy Ridge columbarium and crematorium site; to enhance the landscape quality of the existing and proposed transport routes. Climbers are proposed to cover vertical, hard surfaces of the piers of the proposed viaducts, and also the newly formed retaining wall within the site. Shade tolerant plants will be planted, where light is sufficient, to improve aesthetic value of areas under viaducts. | Minimise visual impact and also enhance landscape. | Funded by CEDD and implemented by Contractor | Within Project Site | Construction phase | Guidelines on Greening of Noise Barriers, issued April 2012, GLTMS, DevB DEVB TCW No. 06/2015 – Maintenance of Vegetation and Hard Landscape Features |
| S11.8.1.3, Table 11.9 | OM4 – Greening Works and Contour Grading Works on Cut/ Fill Slopes - Greening works such as hydroseeding/ terraces of shrub or tree planting will be provided where slope gradient allows, according to Geotechnical Engineering Office (GEO) Publication No.1/2011 Technical Guidelines on Landscape Treatment for Slopes. | Minimise landscape and visual impact | Funded by CEDD and implemented by Contractor | Within Project Site | Construction phase | Geotechnical Engineering Office (GEO) Publication No.1/2011 Technical Guidelines on Landscape Treatment for Slopes. |

| EIA Ref. | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|-----------------------|--|--|--|---|---|--|
| S11.8.1.3, Table 11.9 | OM5 – Landscape design treatment to be provided by relevant government department. | Mitigate the loss of greenery and enhance the overall landscape and visual value | Funded by FEHD and implemented by Contractor | Within Project Site | After handover to the relevant department | - |
| S11.8.1.3, Table 11.9 | OM6 – Architectural and chromatic treatment of the hard architectural and engineering structures and facilities. | Mitigate the loss of greenery and enhance the overall landscape and visual value | Funded by FEHD and implemented by Contractor | Within Project Site | After handover to the relevant department | - |
| S11.8.1.3, Table 11.9 | OM7 – Aesthetic design of the proposed noise barriers. | Mitigate the visual impact | Funded by CEDD and implemented by Contractor | Along Sha Ling Road and Lin Ma Hang Road | Construction phase | • WBTC No. 36/2004 - ACABAS - submission is required to ACABAS for approval of any bridges and associated structures within the public highway system. |
| S11.8.1.3, Table 11.9 | OM8 - Silt traps should also be incorporated into design of road gullies for the natural water stream(s). | Minimise the landscape impact on natural stream | Funded by CEDD and implemented by Contractor | Within Project Site | Construction Phase | |

Notes:

(a) A detailed Tree Survey Report showing all identified valuable trees and OVT will be undertaken in a separate Tree Preservation and Removal Proposal.

(b) Wood resulting from tree removal should be recycled as mulch or soil conditioner for re-use within the Project or in other projects as far as possible e.g. for the construction of soft landscape work, were practical.

(c) Contractor is responsible for landscaping during the agreed establishment and maintenance period. Other designated management and maintenance agents to take up maintenance and management of landscaping after end of agreed period.

(d) Highways Department (HyD) is responsible for maintenance and management of landscaping of public road side slope, Leisure and Cultural Services Department (LCSD) is responsible for the management and maintenance of soft landscapes along non-expressway public roads outside Country Park and Food and Environmental Hygiene Department (FEHD) is responsible for maintenance and management of landscaping of other areas allocated to FEHD.

- (e) The landscape mitigation treatment of the future development site shall follow the below frameworks:
 - Buffer planting shall be provided to soften the edge of the site.
 - Aesthetic landscape treatment including both soft and hard landscape features shall be provided.
 - Vertical greening shall be provided as far as practicable.
 - At-grade tree planting shall be provided as far as possible while planting space is allowed, to enhance the overall environment.
 - Architectural design shall blend in with the surrounding environment.
 - Overall greening ratio shall comply with TC(W) No.3/2012 Site coverage of Greenery for Government Building Projects.

| Recommended Mitigation Measures Recommended Measures & Main Concerns to address Agent Timing Stage / or standards to be achieved |
|--|
|--|

The compensatory woodland planting shall be included woodland mixed whips, seeding, and shrubs. The principle of the location shall be the extension of the existing woodland, as well as the original lost woodland location. The proposal will be agreed with AFCD, the woodland enhancement planting shall refer to Chapter 9.
