Attn: Mr. SHUM Ngai Hung, Steven

14 September 2022 By e-mail

Dear Sirs,

Site Formation and Associated Infrastructural Works for Development of Columbarium, Crematorium and Related Facilities at Sandy Ridge Cemetery Monthly Environmental Monitoring & Audit Report (No.49) – August 2022

We confirmed that the captioned report has complied with the requirement set out in the EM&A Manual, we hereby certify the captioned report pursuant to Specific Condition 3.4 of the Environmental Permit No. FEP-01/534/2017/A and EP-534/2017/A.

Should you have any queries, please feel free to contact the undersigned at Tel: 2959-6059 or Fax: 2959-6079 or Email: twtam@fordbusiness.com.

Yours sincerely, For and on Behalf of

Action-United Environmental Services & Consulting (AUES)

T. W. Tam

Environmental Team Leader

Attention: Mr. HO Man-to

14 September 2022

Dear Sir.

Site Formation and Associated Infrastructural Works for Development of Columbarium at Sandy Ridge Cemetery

Monthly Environmental Monitoring and Audit Report (No. 49) August 2022

I refer to the email of the ET on 14/08/2022 regarding the captioned Monthly Report. According to Section 3.4 of the EP-534/2017/A and the FEP-01/534/2017/A, I hereby verify the Monthly EM&A Report for August 2022 (Version 2) with Ref. No. TCS00881/18/600/R0674v2.

You are required to follow up the comments from EPD and IEC on the relevant EPs requirement and provide supplementary information of this report for our further review as soon as possible.

Yours faithfully,

CH Leung

Leung CH Jacky

Independent Environmental Checker

EXECUTIVE SUMMARY

ES.01. This is the **49**th Monthly Environmental Monitoring and Audit (EM&A) Report summarizing the monitoring results and inspection findings under the Project for the period from **1**st to **31**st **August 2022** (the Reporting Month).

ENVIRONMENTAL MONITORING AND AUDIT ACTIVITIES

ES.02. In the Reporting Month, the major construction works under the Project included Contract CV/2016/10 (hereinafter named "Contract 1") and Contract CV/2017/02 (hereinafter named "Contract 2"). Environmental monitoring activities under the EM&A programme in this Reporting Month are summarized in the following table.

Table ES-1 Summary of EM&A Programme in the Reporting Month

Issues	Environmental Monitoring	Monitorin	Total Occasions/	
issues	Parameters / Inspection	CV/2016/10	CV/2017/02	dates
Air Ouglity	1-hour TSP	ASR-1	ASR-2	45
Air Quality	24-hour TSP	ASK-1	ASR-3	15
Construction Noise	L _{eq (30min)} Daytime	CN-1 CN-2	CN-3 CN-4	16
Water Quality	In-situ measurement and Water sampling	M3	M1, M2 and M4	14 (#)
Ecology	Sensitive Habitat	Transect within site area of CV/2016/10		23 rd August 2022
Landscape & Visual	Site Inspection	Site area of CV/2016/10	Site area of CV/2017/02	30 th August 2022
Inspection	Environmental Team (ET) Regular Environmental Site Inspection		Site area of	5
& Audit	Independent Environmental Checker (IEC) Monthly Environmental Site Audit		CV/2017/02	2

Remarks: (#) The channel of M2 was dried up / too shallow on 1 to 3 Aug as well as 22 to 31 August 2022 2022 and representative water sampling were unable be carried out.

BREACH OF ACTION AND LIMIT (A/L) LEVELS

ES.01. In the Reporting Month, no exceedance of air quality and noise monitoring was recorded. For water quality monitoring, there were 22 Limit level non-project related exceedances recorded and Notification of Exceedance (NOE) has been issued by ET. The statistics of environmental exceedance and investigation of exceedance are summarized in the following table.

Table ES-2 Breach of Action and Limit (A/L) Levels in the Reporting Month

Environmental	Monitoring	Action	I imit	Event & Action		
Issues	Monitoring Parameters	Action Lim Level Leve		Investigation Findings	Corrective Actions	
Air Quality	1-hour TSP	0	0	-	-	
Air Quality	24-hour TSP	0	0	-	-	
Construction Noise	Leq _{30min} Daytime	0	0	-	-	
	DO	0	0	ı	-	
Water Quality	Turbidity	0	9	Not	The Contractor was reminded	
water Quality	Suspended Solids (SS)	0	13	Not project-related	to fully implement the water quality mitigation measures	

ES.02. In the Reporting Month, a total of 22 Limit level water quality exceedances, namely 9 exceedances of turbidity and 13 exceedances of SS were recorded. According to the weather information from the HKO, there was heavy rainstorm intermittently during the days of exceedance recorded. Under the impact of rainstorm, the water quality of the watercourse was deteriorated by the stirred up sediment and runoff from the surrounding environment. Weekly site inspection revealed that water

quality mitigation measures were in place and the site conditions were generally in order. It was concluded that the exceedances were likely related to the impact of rainstorm and not caused by the work under the project.

- ES.03. Monthly ecological monitoring for sensitive habitat for area of Contract 1 and Contract 2 were undertaken on 23rd August 2022. After analysing survey results in August from 2019 to 2022, there was no significant drop in species richness and abundance for wetland and non-wetland habitat for area of Contract 1, but there was a decrease in species richness and abundance for wetland and non-wetland habitats for area of Contract 2. Yet, good site practice during construction, with reference to EM&A Manual, is required to prevent or alleviate environmental impacts. For instance, the size of work areas should be minimized and disturbed areas should be reinstated immediately after completion of construction works. Unnecessary site clearance should be avoided as well. In addition, implementing proper waste disposal is necessary to reduce contamination to water and soil. Continuous monitoring is also recommended to inspect any significant decrease in species diversity.
- ES.04. There was no precautionary check for the presence of nesting birds conducted outside the concerned breeding season (February to July).
- ES.05. Landscape and visual inspection at both Contracts were undertaken on 30th August 2022. The Contractor was reminded to prevent the construction material pile within Tree Protection Zone and ensure no works is allowed within the TPZ.

ENVIRONMENTAL COMPLAINT

- ES.06. In the Reporting Month, an environmental complaint was referred by EPD on 12 August concerning that the soil/ muddy water from construction site at Lin Ma Hang Road near Contract 2. Investigation was conducted by Environmental Team according to the complaint handling procedure in accordance with the EM&A Manual. Investigation result revealed that the current site areas on Lin Ma Hang Road under Contract 2 were generally in order and no noticeable dust and muddy discharge problem was observed. Having noticed adverse environmental impact arising from other private owner depots on Lin Ma Hang Road, it is considered that the complaint is unlikely attributed to the works under the Project.
- ES.07. The statistics of summons or successful prosecutions are summarized in the following tables.

Table ES-3 Environmental Complaint Summaries in the Reporting Month

D M	D 4: M 41		Environmental Complaint Statistics		
Reporting Month		Frequency	Cumulative	Complaint Nature	
	Contract 1	0	2	(1) Air Quality (1) Noise	
1 st – 31 st August 2022	Contract 2	1	4	(1) Water (1) Air Quality (1) Noise (1) soil/ muddy water	

NOTIFICATION OF SUMMONS AND SUCCESSFUL PROSECUTIONS

ES.08. No environmental summons or successful prosecution was recorded in this Reporting Month. The statistics of summons or successful prosecutions are summarized in the following tables.

Table ES-4 Environmental Summons Summaries in the Reporting Month

Donouting Mo	Environmental Summons Statistics			
Reporting Month		Frequency	Cumulative	Summons Nature
1 st – 31 st August 2022	Contract 1	0	0	NA
1 – 31 August 2022	Contract 2	0	0	NA

Table ES-5 Environmental Prosecution Summaries in the Reporting Month

Deporting Month	Environmental Prosecution Statistics			
Reporting Month	Frequency	Cumulative	Prosecution Nature	

1 st – 31 st August 2022	Contract 1	0	0	NA
	Contract 2	0	0	NA

ES.09. In addition, no complaint and emergency event relating to violation of environmental legislation for illegal dumping and landfilling was received.

REPORTING CHANGE

ES.010. No reporting change was made in the Reporting Month.

SITE INSPECTION

ES.011. In the Reporting Month, joint site inspections for Contract 1 to evaluate the site environmental performance were carried out by the Resident Engineer, ET and the Contractor of the Contract 1 on 4^{th} , 11^{th} , 18^{th} , 26^{th} and 30^{th} August 2022. Moreover, joint site inspections for Contract 2 by the RE, ET and the Contractor of Contract 2 were carried out on 4^{th} , 11^{th} , 18^{th} , 26^{th} and 30^{th} August 2022. IEC attended joint site inspection for both Contracts on 18^{th} and 30^{th} August 2022. No non-compliance was noted during the site inspections.

FUTURE KEY ISSUES

- ES.012. During wet season, the Contractors are reminded to pay special attention on water quality mitigation measures and should fully implement the measures as recommended in the EM&A Manual, in particular to prevent surface runoff and other pollutants from flowing to local stream and Conservation Area.
- ES.013. Air quality mitigation measures such as wheel wash facilities, watering of haul roads, loose soil construction surface and covering of dusty materials with tarpaulin sheet should be implemented as far as practicable.
- ES.014. Construction noise would be a key environmental issue during construction phase of the Project. Noise mitigation measures such as using quiet plants and mobile noise barriers should be implemented in accordance with the EM&A requirement.

1. INTRODUCTION

1.1PROJECT BACKGROUND

1.1.1 Civil Engineering and Development Department (CEDD) is the Project Proponent for the Project "Site Formation and Associated Infrastructural Works for Development of Columbarium, Crematorium and Related Facilities at Sandy Ridge Cemetery". The Project is a Designated Project to be implemented under Environmental Permit No. EP-534/2017/A and FEP-01/534/2017/A. The layout plan of the Project is shown in Appendix A. Major works to be executed under the Project shall include to the following:

Designated Works under EP-534/2017/A

- (i) Site formation of about 5.5 hectares of land and associated drainage, sewerage and landscape works for development of Columbarium and Crematorium facilities at the Sandy Ridge Cemetery;
- (ii) Construction of a new road (about 800m) connecting the Crematorium and Man Kam To Road and the pick-up/drop-off point at Man Kam To Road;
- (iii) Widening two sections of the existing Sha Ling Road (about 900m and 500m respectively);
- (iv) Widening of about 1.4km of the existing Lin Ma Hang Road; and
- (v) Improvement works to the existing barging point at Siu Lam (the barging point is rejected by Tuen Mun DC and no improvement works required)

Designated Works under FEP-01/534/2017/A

- (i) Site formation works for a formed platform of about 1.8 hectares and associated drainage, sewerage and landscape works for development of Columbarium at the Sandy Ridge Cemetery;
- (ii) Construction of the pick-up/drop-off point at Man Kam To Road;
- (iii) Widening of 900m of the existing Sha Ling Road;
- (iv) Improvement works to the existing barging point at Siu Lam (the barging point is rejected by Tuen Mun DC and no improvement works required)
- 1.1.2 To facilitate the Project management, the Project works were separated into three Contracts to be executed which are described in below sub-sections.
- 1.1.3 Contract No. CV/2016/10 Site Formation and Associated Infrastructural Works for Development of Columbarium at Sandy Ridge Cemetery (hereinafter named "Contract 1"):-
 - Site formation of about 1.77 ha of land for the proposed pick-up and drop-off area for shuttle bus operation;
 - Upgrading of a section of 900m existing Sha Ling Road from 3m wide carriageway to 7.3m wide carriageway with footpath at both sides;
 - Construction of one EVA with a total length of about 160m;
 - Construction of noise barriers along Sha Ling Road;
 - Modification of junction between Man Kam To Road and Sha Ling Road;
 - Construction of a new pick up / drop off point at Man Kam To Road;
 - Relocation and construction of a new refuse collection point near junction between Man Kam To Road and Sha Ling Road;
 - Associated geotechnical works including cut and fill slopes, soil nailing works and retaining structures;
 - Associated drainage, sewerage and waterworks along Sha Ling Road; and
 - Associated landscaping works.
- 1.1.4 Contract No. CV/2017/02 Infrastructural Works at Man Kam To Road and Lin Ma Hang Road for Development of Columbarium at Sandy Ridge Cemetery (hereinafter named "Contract 2"):-
 - Construction of a new road connecting Columbarium site to Crematorium site;
 - Construction of one EVA with a total length of about 300m;
 - Widening of a section of 1.4 km long Lin Ma Hang Road (between Man Kam To Road and Ping Yuen River) from 6m wide carriageway to 7.3m with 2m width footpath on both sides;
 - Provision of a pair of lay-by at Lin Ma Hang Road;
 - Construction of a new vehicular access connecting the Sheung Shui Landmark North PTI and Lung Sum Avenue;

- Construction of covered walkway along Fanling Station Road;
- Removal of planters and central divider along Fanling Station Road and San Wan Road;
- Associated drainage, sewerage, waterworks and utility works along Man Kam To Road and Lin Ma Hang Road;
- Associated geotechnical works including cut and fill slopes, soil nailing works and retaining structures; and
- Associated landscaping works.
- 1.1.5 CEDD Contract No. (to be confirmed):-
 - Site Formation for the platform of the columbarium site;
 - Construction of two 2 at-grade access roads;
 - Construction of road junction between Man Kam To Road and the new access road;
 - Associated drainage, sewerage and waterworks along the two new access roads;
 - Associated geotechnical works including cut and fill slopes, soil nailing works and retaining structures; and
 - Associated landscaping works
- 1.1.6 Hsin Chong Tsun Yip Joint Venture (hereafter referred as "HCTYJV") has been awarded Contract 1 on 5 December 2017. According to the Contract requirement, HCTYJV shall take over the responsibility for part of the Environmental Permit No. EP-534/2017 for ease of management, therefore application for Further Environmental Permit was submitted by HCTYJV to EPD on 26 January 2018 and Further Environmental Permit No. FEP-01/534/2017 was granted to HCTYJV by EPD on 23 February 2018. Furthermore, EPD issued Environmental Permit No. FEP-01/534/2017/A on 24 December 2018.
- 1.1.7 Sang Hing Civil Contractors Company Limited (hereinafter referred as "Sang Hing") was awarded Contract 2 on 23 May 2018. The Contract Works is a Designated Project as under Environmental Permit (EP) No. EP-534/2017. Furthermore, EPD issued Environmental Permit No. EP-534/2017/A on 24 December 2018.
- 1.1.8 Action-United Environmental Services & Consulting (AUES) has been commissioned by the Contractors as an Environmental Team (ET) to implement the Environmental Monitoring and Audit (EM&A) programme in accordance with the approved EM&A Manual as well as the associated duties. As part of the EM&A programme, baseline monitoring to determine the ambient environmental conditions was completed before construction work commencement. The Baseline Monitoring Report (air, noise and water) certified by ET Leader (ETL) and verified by Independent Environmental Checker (IEC) was submitted to Environmental Protection Department (EPD) and it was approved by EPD on 25 October 2018.
- 1.1.9 Major construction work of Contract 1 and Contract 2 was commenced on 16 August 2018 and 5 November 2018 respectively.
- 1.1.10 This is the 49th Monthly EM&A Report summarizing the monitoring results and inspection findings for the period from 1st to 31st August 2022.

1.2 REPORT STRUCTURE

1.2.1 The Monthly EM&A Report is structured into the following sections:-

Section 1 *Introduction*

Section 2 *Project Organization and Construction Progress*

Section 3 *Summary of Monitoring Requirements*

Section 4 *Air Quality Monitoring Results*

Section 5 *Noise Monitoring Results*

Section 6 Water Quality Monitoring Results

Section 7 *Ecology Monitoring Results*

Section 8 *Landscape & Visual*

Section 9 *Waste Management*

Section 10 *Site Inspections*

Section 11 Environmental Complaints and Non-Compliance
 Section 12 Implementation Status of Mitigation Measures
 Section 13 Conclusions and Recommendation

2. PROJECT ORGANIZATION AND CONSTRUCTION PROGRESS

2.1 CONSTRUCTION CONTRACT PACKAGING

- 2.1.1 To facilitate the project management and implementation, the Project was divided by the following contracts:
 - Contract 1 (Contract No. CV/2016/10)
 - Contract 2 (Contract No. CV/2017/02)
 - Contract 3 (Contract No. TBA)
- 2.1.2 Organization structure and contact details of relevant parties with respect to on-site environmental management are shown in *Appendix B*.

2.2 CONSTRUCTION PROGRESS

2.2.1 The three-month rolling construction programme for Contract 1 and Contract 2 are enclosed in *Appendix C*. Construction activities of the Contract 1 and Contract 2 undertaken in the Reporting Month are presented below. The tentative construction activities are summarised in Section 12.2

Contract 1 (CV/2016/10)

- U-channel construction works at Fill Slope FS13
- Paving block installation works
- Compaction works at footpath and carriageway
- U-channel and planter wall construction works at Cut Slope CS1
- Drill holes for planting works and fill top soil at CS11,12
- Laying bitumen works

Contract 2 (CV/2017/02)

- Construction of Manhole, gullies, drainage pipe at Lin Ma Hang Road between CH0-50 Southbound & CH505-565 Northbound & CH890-960 Northbound
- Pipe Jacking works for DN400 watermain in approx. CH0-300 at Man Kam To Road
- DN400 DI Watermain reinstatement works in approx. CH700-1040 at Man Kam To Road North Slow Lane
- Construction of road works at Sandy Ridge Road E, Road F, Road B
- Fanling Station Road Covered Walkway
- Lung Sum Avenue road surface modification works

2.3 SUMMARY OF ENVIRONMENTAL SUBMISSIONS

2.3.1 Summary of the relevant permits, licenses, and/or notifications on environmental protection for the Project in this Reporting Month is presented in *Tables 2-1 and 2-2*.

Table 2-1 Status of Environmental Licenses and Permits for Contract 1

Item	Description	License/ Permit ref no.	License/ Permit Status
1	Air Pollution Control	Ref. no. 428909	Valid
	(Construction Dust) Regulation	Acknowledged by EPD on 20/12/2017	
2	Chemical waste Producer	WPN: 5231-641-H3937-01	Valid
	Registration	Issued by EPD on 27/03/2018	
3	Water Pollution Control	License no. WT00030795-2018	Valid
	Ordinance	Issued date: 9/5/2018	
		Expire Date: 31/5/2023	
4	Billing Account for Disposal	Account no.: 7029769	Valid
	of Construction Waste		

Table 2-2 Status of Environmental Licenses and Permits for Contract 2

Item	Description	License/ Peri	mit ref no.	License/ Permit Status
1	Air Pollution Control (Construction Dust) Regulation	Ref. no. 440406 Acknowledged by EPD on 14/12/2018	Man Kam To Road (near Sha Ling Road to Kong Nga Po Road	Valid
		Ref. no. 440405 Acknowledged by EPD on 14/12/2018	Fanling Station Road	Valid
		Ref. no. 440404 Acknowledged by EPD on 14/12/2018	Sa Ling Road (Sandy Ridge Cemetery)	Valid
		Ref. no. 440401 Acknowledged by EPD on 14/12/2018	Lin Ma Hang Road (San Uk Ling – Muk Wu Nga Yiu)	Valid
		Ref. no. 440402 Acknowledged by EPD on 14/12/2018	Lung Sum Avenue (near Landmark North)	Valid
2	Chemical waste Producer Registration	WPN: 5213-641-S4151-01 Issued by EPD on 04/02/20)19	Valid
3	Water Pollution Control Ordinance	License no: WT00032936-2018 Issued date: 16/01/2019 Expire Date: 31/01/2024	Man Kam To Road & Lin Ma Hang Road, Man Kam To	Valid
		License no: WT00033335-2019 Issued date: 29/03/2019 Expire Date: 31/03/2024	Columbarium at Sandy Ridge Cemetery	Valid
		License no: WT00034717-2019 Issued date: 9/10/2019 Expire Date: 31/10/2024	Fanling Station Road	Valid
4	Billing Account for Disposal of Construction Waste	Account no.: 7031098		Valid
5	Construction Noise Permit	GW-RN0562-22 (1 Aug – 30 Nov 2022)		Valid
5a	Construction Noise Permit	GW-RN0563-22 (14 Jul – 13 Oct 2022)		Valid

2.4 SUMMARY OF SUBMISSION UNDER THE ENVIRONMENTAL PERMIT REQUIREMENTS

2.4.1 *Tables 2-3 to 2-4* summarized the submission status under the EP and/or FEP stipulation in the Reporting Month.

Table 2-3 Status of Submission as under FEP

Item	EP and / or FEP Stipulation	Description	Status
1			Submitted and no approval is required.
		and iii) IEC and the supporting team	required.
2		construction works; and ii) Location	Submitted and no approval is required.
_		plan of all construction works	
3	Condition 2.12 of FEP	Contamination Assessment Plan (CAP)	Approved by EPD on 27 May

Item	EP and / or FEP Stipulation	Description	Status
			2019
4	Condition 2.13 of FEP	Grassland Reinstatement Plan	Pending approval

			and no approval is required.

3. SUMMARY OF IMPACT MONITORING REQUIREMENT

3.1 GENERAL

- 3.1.1 The EM&A requirements are set out in the Approved EM&A Manual. Environmental issues such as air quality, construction noise, water quality and ecology were identified as the key issues during the construction phase of the Project.
- 3.1.2 A summary of construction phase EM&A requirements are presented in the sub-sections below.

3.2 MONITORING PARAMETERS

- 3.2.1 The EM&A impact monitoring shall cover the following environmental aspect:
 - Air quality;
 - Construction noise;
 - Water quality;
 - Ecology; and
 - Landscape and visual
- 3.2.2 A summary of the monitoring parameters is presented in *Table 3-1* below

Table 3-1 Summary of EM&A Requirements

Environmental Issue	Parameters	
Air Quality	• 1-hour TSP;	
(• 24-hour TSP	
Noise	• Leq _(30min) during normal working hours.; and	
TVOISC	 Leq_(15min) during the construction works undertaken in Restricted Hours 	
	In-situ Measurements	
	 Dissolved Oxygen Concentration (mg/L) & Saturation (%); 	
	• Temperature (°C);	
	• Turbidity (NTU);	
Water Ovality	• Salinity (ppm)	
Water Quality	• pH unit;	
	• Water depth (m); and	
	• Stream Flow Velocity (m/sec).	
	Laboratory Analysis	
	• Suspended Solids (mg/L)	
Ecology	Ecologically sensitive habitats (wetland habitats and non-wetland habitats)	

3.3 MONITORING LOCATIONS

- 3.3.1 According to the Approved EM&A Manual of the Project *Site Formation and Associated Infrastructural Works for Development of Columbarium, Crematorium and Related Facilities at Sandy Ridge Cemetery*, the designated monitoring locations for air quality, noise, water quality and ecology under the monitoring programme, is shown in *Appendix D*.
- 3.3.2 Since the Project was divided into three Works Contracts and all Contracts will be commenced at different time, the construction phase impact monitoring will only be performed at the Contract-related monitoring stations upon commencement of each Contract Works.

Air Quality

3.3.3 There were three (3) designated air quality monitoring stations recommended in the Approved EM&A Manual Section 5.6.1.1. There was proposed relocation of air quality monitoring location ASR-3 in October 2018 since the landlord refused to set up the HVS at his premises and nearby Conservation Area due to noise nuisance and Muk Wu Nga Yiu House No. 2A was proposed as alternative location ASR-3a. The proposal dated on 9 November 2018 which verified by IEC was submitted to EPD for approval. Based on rationale in Section 3.3.2, the Contract-related air quality monitoring location for construction phase were summarized in *Table 3-2* and illustrated in *Appendix D*.

Table 3-2 Designated Air Quality Monitoring Location under the Project

Location ID	Description in EM&A Manual	Location	Related Work Contract
ASR-1	Village House along Man Kam To	Sha Ling Village House No.6	Contract 1
	Road		
ASR-2	Village House at San Uk Ling	San Uk Ling Village House No.1	Contract 2
ASR-3	Village House at Muk Wu Nga Yiu	Muk Wu Nga Yiu House No.28	Contract 2
ASR-3a (#)	Village House at Muk Wu Nga Yiu	Muk Wu Nga Yiu House No.2A	Contract 2

Remark: (#) There was proposed relocation of air quality monitoring location ASR-3 in October 2018. The proposal dated on 9 November 2018 after verified by IEC was submitted to EPD for approval.

- 3.3.4 If the designated monitoring location is required to relocate, alternative monitoring location shall agree with IEC and seek for EPD approval which shall meet the following criteria:
 - i) Be at the site boundary or such locations close to the major dust emission source;
 - ii) Close to the sensitive receptors;
 - iii) Take into account the prevailing meteorological conditions;
 - iv) For monitoring location located in the vicinity of the ASRs, care shall be taken to cause minimal disturbance to the occupants during monitoring.
 - v) When positioning the HVS, the following points shall be noted:
 - a. a horizontal platform with appropriate support to secure the samples against gusty wind shall be provided;
 - b. no two samplers shall be placed less than 2m apart;
 - c. the distance between the HVS and an obstacle, such as buildings, must be at least twice the height that the obstacle protrudes above the HVS;
 - d. a minimum of 2 m separation from walls, parapets and penthouses is required for HVS at the rooftop;
 - e. a minimum of 2 m separation from any supporting structure, measures horizontally is required;
 - f. no furnace or incinerator flue is nearby;
 - g. airflow around the sampler is unrestricted;
 - h. the HVS is more than 20 m from the dripline;
 - i. any wire fence and gate to protect the HVS, shall not cause any obstruction during monitoring;
 - j. permission must be obtained to set up the HVS and to obtain access to the monitoring stations; and
 - k. a secured supply of electricity is needed to operate the HVS.

Construction Noise

3.3.5 There were four (4) designated noise monitoring locations recommended in the Approved EM&A Manual Section 6.5.1.1. Based on rationale in Section 3.3.2, the Contract-related noise quality monitoring location for construction phase were summarized in *Table 3-3* and illustrated in *Appendix D*.

Table 3-3 Designated Construction Noise Monitoring Location under the Project

Locatio n ID	Description in EM&A Manual	Location	Related Work Contract
CN-1	Village house to the west of	Village house to the west of Sha Ling	Contract 1
	Sha Ling Road	Road (free field condition)	
CN-2	Village house to the north of	Sha Ling Village House No. 25 (free	Contract 1
	Man Kam To Road	field condition)	& 3
CN-3	Village house near San Uk	San Uk Ling Village House No. 18 (free	Contract 2
	Ling	field condition)	
CN-4	Village house of Muk Wu	Muk Wu Village House No. 267 (1m	Contract 2
		façade from the building)	

Water Quality

3.3.6 There were four (4) water quality monitoring locations recommended in the Approved EM&A Manual Section 7.6.1.2. The locations and coordinates of water quality monitoring were listed in *Table 3-4*. Based on rationale in Section 3.3.2, the Contract-related water quality monitoring location for construction phase were summarized in *Table 3-4* and illustrated in *Appendix D*.

Table 3-4 Designated Water Quality Monitoring Stations under the Project

Proposed	Co-ore	dinates	Description	Related Work
Location ID	North	East	Description	Contract
M1	843 431	831 308	Midstream of Nam Hang Stream	Contract 2
M2	843 840	831 101	Downstream of Nam Hang Stream	Contract 2
M3	843 509	830 040	Wetland in the Conservation Area near Yuen Leng Chai	Contract 1
M4	843 997	831 783	Watercourse across Lin Ma Hang Road, running from east of San Uk Ling to Man Kam To Boundary Control Point	Contract 2

3.4 MONITORING FREQUENCY AND PERIOD

3.4.1 The requirements of impact monitoring were stipulated in *Sections 5.8.1.1*, *6.7.1.1* and *7.8.1.4* of the approved *EM&A Manual* and presented as follows.

Air Quality Monitoring

- 3.4.2 Monitoring frequency for air quality impact monitoring is as follows:
 - 1-Hour TSP 3 sets of 1-hour TSP monitoring shall be carried out once every six days during construction periods
 - 24-Hour TSP 24-hour TSP monitoring shall be carried out every six days during construction periods

Noise Monitoring

3.4.3 Noise impact monitoring shall be carried out once per week during construction periods. The noise measurement for the time period between 0700 and 1900 hours shall be measured in terms of L_{eq} (30 minutes) or 6 sets of L_{eq} (5mins).

Water Quality Monitoring

3.4.4 The monitoring frequency shall be 3 days per week during construction phase and the interval between two sets of monitoring shall not be less than 36 hours.

3.5 MONITORING EQUIPMENT

3.5.1 The monitoring equipment using for the EM&A program as proposed by the ET shall be verified by the IEC.

Air Quality Monitoring

- 3.5.2 The 24-hour and 1-hour TSP levels shall be measured by following the standard high volume sampling method as set out in the *Title 40 of the Code of Federal Regulations, Chapter 1 (Part 50), Appendix B*. If ET proposes to use a direct reading dust meter to measure 1-hour TSP levels, it shall submit sufficient information to IEC for approval.
- 3.5.3 The filter paper of 24-hour TSP measurement shall be determined by HOKLAS accredited laboratory.
- 3.5.4 All equipment used by ET for air quality monitoring is listed in *Table 3-5*.

Table 3-5 Air Quality Monitoring Equipment

Equipment	Model	
24-hour TSP		
High Volume Air Sampler (HVAS)	TISCH High Volume Air Sampler, HVS Model TE-5170	
Calibration Kit	TISCH Model TE-5025A	
1-Hour TSP		
Portable Dust Meter	Laser Dust Monitor, Model AM510	

Equipment	Model
	/ Sibata LD-3 Laser Dust monitor Particle Mass Profiler &
	Counter

Wind Data Monitoring Equipment

- 3.5.5 According to the approved EM&A Manual, wind data monitoring equipment shall also be provided and set up for logging wind speed and wind direction near the dust monitoring locations. The equipment installation location shall be proposed by the ET and agreed with the IEC. For installation and operation of wind data monitoring equipment, the following points shall be observed:
 - 1) The wind sensors should be installed 10 m above ground so that they are clear of obstructions or turbulence caused by buildings.
 - 2) The wind data should be captured by a data logger. The data shall be downloaded for analysis at least once a month.
 - 3) The wind data monitoring equipment should be re-calibrated at least once every six months.
 - 4) Wind direction should be divided into 16 sectors of 22.5 degrees each.
- 3.5.6 ET has liaised with the premises owners/ landlords to grant the permission for the HVS installation. However, they rejected to set up wind data monitoring equipment installation in their premises.
- 3.5.7 Under this situation, the ET proposed to obtain representative wind data from the Hong Kong Observatory Ta Kwu Ling Weather Station. Ta Kwu Ling Station is located near the Project site which situated at the sea level above 15mPD and the wind data monitoring equipment is installed 10 m above the existing ground.

Noise Monitoring

- 3.5.8 Sound level meter in compliance with the International Electrotechnical Commission Publications 651: 1979 (Type 1) and 804: 1985 (Type 1) specifications shall be used for carrying out the noise monitoring. The sound level meter shall be checked using an acoustic calibrator. The wind speed shall be checked with a portable wind speed meter capable of measuring the wind speed in ms⁻¹ before each noise monitoring event. Noise measurements should not be made in fog, rain, wind with a steady speed exceeding 5 m s⁻¹ or wind with gusts exceeding 10 m s⁻¹.
- 3.5.9 Noise monitoring equipment used for impact monitoring is listed in *Table 3-6*.

Table 3-6 Noise Monitoring Equipment

Equipment	Model
Integrating Sound Level Meter	Rion NL-52 Sound Level Meter
Calibrator	Rion NC-74 Acoustical Calibrator
Portable Wind Speed Indicator	Testo Anemometer

3.5.10 Sound level meters listed above comply with the *International Electrotechnical Commission Publications 651:1979 (Type 1)* and *804:1985 (Type 1)* specifications, as recommended in TM issued under the NCO.

Water Quality Monitoring

3.5.11 Water quality parameters include dissolved oxygen, water temperature & depth, turbidity, salinity, pH and stream flow velocity shall be measured *in-situ*, and suspended solids shall be analyzed by a HOKLAS-accredited testing laboratory.

Dissolved Oxygen and Temperature Measurement

- 3.5.12 The dissolved oxygen (DO) measuring instruments should be portable and weatherproof. The equipment should also complete with cable and sensor, and DC power source. It should be capable of measuring:
 - A DO level in the range of 0 20 mg/L and 0 200% saturation; and
 - A temperature of 0-45 degree Celsius.

- 3.5.13 The equipment should have a membrane electrode with automatic temperature compensation complete with a cable.
- 3.5.14 Should salinity compensation not be built-in to the DO equipment, in-situ salinity should be measured to calibrate the DO measuring instruments prior to each measurement.

Turbidity Measurement

3.5.15 The turbidity measuring instruments should be a portable and weatherproof with DC power source. It should have a photoelectric sensor capable of measuring turbidity level between 0–1000 NTU (for example, Hach model 2100Q or an approved similar instrument).

Salinity Measurement

3.5.16 A portable salinometer capable of measuring salinity in the range of 0–40 parts per thousand (ppt) should be provided for measuring salinity of the water at each monitoring location.

pH Measurement

3.5.17 A portable pH meter capable of measuring a range between 0.0 and 14.0 should be provided to measure pH under the specified conditions accordingly to the APHA Standard Methods.

Water Depth Measurement

3.5.18 A portable, battery-operated echo sounder or an approved similar instrument should be used for water depths determination at each designated monitoring station.

Stream Flow Velocity Equipment

3.5.19 Since the EM&A Manuals do not specified instrument to use stream flow velocity measurement, the monitoring of stream flow velocity is therefore proposed to be conducted by using a flow probe which is a digital water velocity meter.

Water Sampling Equipment

- 3.5.20 A water sampler is required for suspended solid (SS) monitoring. A water sampler e.g. Kahlsico Water Sampler, which is a transparent PVC cylinder with capacity not less than 2 litres, will be used for water sampling if water depth over than 0.5m.
- 3.5.21 For sampling from very shallow water depths e.g. <0.5 m, water sample will be collected from water surface below 100mm using plastic bottle to avoid inclusion of bottom sediment or humus. Moreover, Teflon/stainless steel bailer or self-made sampling buckets maybe used for water sampling. The equipment used for sampling will be depended the sampling location and depth situations.

Sample Containers and Storage

- 3.5.22 Water samples for suspended solid should be stored in high density polythene bottles with no preservative added, packed in ice (cooled to 4°C without being frozen) and delivered to the laboratory within 24 hours of collection and be analyzed as soon as possible after collection.
- 3.5.23 Analysis of suspended solids should be carried out in a HOKLAS or other accredited laboratory. Water samples of about 1L should be collected at the monitoring stations for carrying out the laboratory suspended solids determination. The SS determination work should start within 24 hours after collection of the water samples. The SS analyses should follow the *APHA Standard Methods* 2540D with Limit of Reporting of 2 mg/L.
- 3.5.24 Details of the equipment used for water quality monitoring are listed in *Table 3-7* below.

Table 3-7 Water Quality Monitoring Equipment

Equipment	Model
Water Depth Detector	Tape measures

Equipment	Model
Water Sampler	A 2-litre transparent PVC cylinder with latex cups at both ends or Teflon/stainless steel bailer or self-made sampling bucket
Thermometer & DO meter	YSI Professional Plus/ YSI 550A
pH meter	AZ8685 pH meter / YSI Professional Plus / YSI Professional DSS
Turbidimeter	Hach 2100Q/ YSI Professional Plus / YSI Professional DSS
Salinometer	Atago refractometer Atago S Salinity Meter / YSI Professional Plus / YSI Professional DSS
Stream Flow Velocity	FP211 Global Flow Probe
Sample Container	High density polythene bottles (provided by laboratory)
Storage Container	'Willow' 33-litter plastic cool box with Ice pad

3.5.25 Furthermore, Suspended solids (SS) analysis was carried out by ALS Technichem (HK) Pty Ltd. Which is one a local HOKLAS-accredited laboratory

3.6 EQUIPMENT CALIBRATION

- 3.6.1 The HVAS is operated and calibrated on a regular basis in accordance with the manufacturer's instruction using Tisch Calibration Kit Model TE-5025A. Calibration would carry out at fortnightly interval. The calibration data are properly documented and the records are maintained by ET for future reference. Furthermore, Tisch Calibration Kit will be calibrated by the manufacturer in yearly basis.
- 3.6.2 The 1-hour TSP meter calibrated by a local HOKLAS-accredited laboratory would be undertaken in yearly basis. Zero response of the equipment was checked before and after each monitoring event.
- 3.6.3 The sound level meter and acoustic calibrator are calibrated and certified by a laboratory accredited under HOKLAS or any other international accreditation scheme at yearly basis.
- 3.6.4 The multi-parameter Water Quality Monitoring System is calibrated by HOKLAS accredited laboratory of three month intervals.
- 3.6.5 All updated calibration certificates of the monitoring equipment used for the impact monitoring program in this Reporting Month are attached in Appendix E.

3.7 DATA MANAGEMENT AND DATA QA/QC CONTROL

- 3.7.1 The impact monitoring data are handled by the ET's systematic data recording and management, which complies with in-house Quality Management System. Standard Field Data Sheets (FDS) are used in the impact monitoring program.
- 3.7.2 The monitoring data recorded in the equipment e.g. 1-hour TSP meter, noise meter and Multi-parameter Water Quality Monitoring System are downloaded directly from the equipment at the end of each monitoring day. The downloaded monitoring data are input into a computerized database properly maintained by the ET. The laboratory results are input directly into the computerized database and QA/QC checked by personnel other than those who input the data. For monitoring activities require laboratory analysis, the local laboratory follows the QA/QC requirements as set out under the HOKLAS scheme for all laboratory testing.

3.8 DETERMINATION OF ACTION/LIMIT (A/L) LEVELS

3.8.1 The baseline monitoring results form the basis for determining the environmental acceptance criteria for the impact monitoring. The air quality, construction noise and water quality criteria, namely Action and Limit levels were established according to Approved EM&A Manual, and they are listed in *Tables 3-8, 3-9* and *3-10* below.

Table 3-8 Action and Limit Levels for Air Quality Monitoring

Manitaning Station	Action I	Level (μg/m³)	Limit Level (µg/m³)		
Monitoring Station	1-hour TSP	24-hour TSP	1-hour TSP	24-hour TSP	
ASR-1	331	181	500	260	

Manitaring Station	Action 1	Level (μg/m³)	Limit Level (μg/m³)		
Monitoring Station	1-hour TSP	24-hour TSP	1-hour TSP	24-hour TSP	
ASR-2	316	165	500	260	
ASR-3	307	160	500	260	

Table 3-9 Action and Limit Levels for Construction Noise

Manitarina I agatian	Action Level	Limit Level in dB(A)			
Monitoring Location	Time Period: 0700-1900 hours on normal weekdays				
CN-1,CN-2, CN-3, CN-4	When one or more documented complaints are received	75 dB(A)			

Note: * Reduces to 70 dB(A) for schools and 65 dB(A) during the school examination periods.

Table 3-10 Action and Limit Levels for Water Quality

Parameter	Performance	Monitoring Location					
Farameter	criteria	M1	M2	M3	M4		
DO (mg/L)	Action Level	3.03	4.99	4.58	3.62		
DO (mg/L)	Limit Level	2.97	4.90	4.49	3.52		
Turbidity	Action Level	7.1	39.7	5.6	5.4		
(NTU)	Limit Level	7.6	42.2	5.9	5.9		
	Action Level	8.5	29.0	9.3	4.8		
SS (mg/L)	Limit Level	10.1	31.0	9.5	5.0		

Votes:

- For DO, non-compliance of the water quality limits occurs when monitoring result is lower than the limits
- For turbidity and SS, non-compliance of the water quality limits occurs when monitoring result is higher than the limits.
- 3.8.2 Should non-compliance of the environmental quality criteria occurs, remedial actions will be triggered according to the Event and Action Plan enclosed in Appendix F.

4. AIR QUALITY

4.1 MONITORING RESULTS

- 4.1.1 In the Reporting Month, air quality monitoring was performed at all designated locations. Impact monitoring schedule provided to all relevant parties was shown in Appendix G.
- 4.1.2 In this Reporting Month, there were 5 sessions of 24-hour TSP and 15 sessions of 1-hour TSP undertaken at each designated station for air quality monitoring. The air quality monitoring results are summarized in *Tables 4-1* to 4-3. The database of 24-hour TSP is shown in *Appendix H* and the graphical plots of monitoring result are shown in *Appendix I*.

Table 4-1 Summary of Air Quality Monitoring Results at ASR-1 under Contract 1

Average	28	Average		83		
(Range)	(10 - 40)	(Range)	(61 – 113)		

4.2 AIR MONITORING EXCEEDANCE

4.2.1 As shown in *Tables 4-1 to 4-3*, the monitoring results of 24-hour and 1-hour TSP monitoring in the Reporting Month were below the Action/ Limit Level. No Notification of Exceedance (NOE) of air quality monitoring criteria was issued and therefore corrective action was not required. The meteorological data during the impact monitoring days are summarized in *Appendix J*.

5. CONSTRUCTION NOISE

5.1 MONITORING RESULTS

- 5.1.1 In the Reporting Month, noise monitoring was performed at all designated locations. Impact monitoring schedule provided to all relevant parties was shown in Appendix G.
- 5.1.2 In this Reporting Month, 4 sessions of noise monitoring were undertaken at each designated noise monitoring location. The sound level were set in a free field situation for CN1, CN2 and CN3 and therefore a façade correction of +3dB(A) has been added according to acoustical principles and EPD guidelines. The monitoring result of noise monitoring is show in *Tables 5-1 and 5-2* and the graphical plots are shown in *Appendix I*.

Table 5-1 Summary of Construction Noise Monitoring Results under Contract 1

Construction Noise Level (L _{eq30min}), dB(A)							
Date	Start Time	CN1(*)	Start Time	CN2(*)			
4-Aug-22	13:33	59	14:08	64			
13-Aug-22	9:11	61	9:57	63			
16-Aug-22	13:30	60	14:06	63			
22-Aug-22	9:06	61	9:42	62			
Limit Level	75 dB(A)						

^(*) A façade correction of +3dB(A) has been added according to acoustical principles and EPD guidelines.

Table 5-2 Summary of Construction Noise Monitoring Results under Contract 2

	Construction Noise Level (L _{eq30min}), dB(A)							
Date	Start Time CN3 (*) Start Time CN4							
4-Aug-22	14:45	60	15:24	62				
13-Aug-22	10:37	62	11:15	59				
16-Aug-22	14:42	63	15:17	64				
22-Aug-22	10:18	63	10:58	61				
Limit Level	75 dB(A)							

^(*) A façade correction of +3dB(A) has been added according to acoustical principles and EPD guidelines.

5.1.3 Prior and after noise monitoring, the accuracy of the sound level meter has been checked by an acoustic calibrator to ensure the measurement within acceptance range of ± 0.5 dB. Moreover, wind speed checked by portable wind speed meter has been performed before noise monitoring. No noise measurement was performed in fog, rain, wind with a steady speed exceeding 5 m s⁻¹ or wind with gusts exceeding 10 m s⁻¹.

5.2 Noise Monitoring Exceedance

5.2.1 As shown in *Tables 5-1 and 5-2*, no noise complaint (which triggered Action Level) and Limit Level exceedance for noise monitoring exceedance was recorded in the Reporting Month.

6. WATER QUALITY

6.1 MONITORING RESULTS

- 6.1.1 In the Reporting Month, water quality monitoring was performed at all designated locations. Impact monitoring schedule provided to all relevant parties was shown in *Appendix G*.
- 6.1.2 In the Reporting Month, a total of *14* monitoring days were carried out for water quality impact monitoring. Besides, the channel of M2 was dried up / too shallow during 1 to 3 August as well as 22 to 31 August 2022 and representative water sampling was unable be carried out. Notification for cancellation of monitoring had been provided to relevant parties in the following days of the events.
- 6.1.3 The monitoring result of key parameters including Dissolved Oxygen, Turbidity and Suspended Solids are summarized in *Tables 6-1* and *6-2*. Detailed monitoring results including in-situ measurements and laboratory analysis data are shown in *Appendix H* and graphical plots for monitoring result are shown in *Appendix I*.

Table 6-1 Summary of Water Quality Monitoring Results – M3 under Contract 1

		Parameters	
Date	DO (Averaged) (mg/L)	Turbidity (Averaged) (NTU)	Suspended Solids (Averaged) (mg/L)

6.2WATER QUALITY MONITORING EXCEEDANCE

6.2.1 In this Reporting Month, there were a total of **22** water quality exceedances recorded. The summary of non-compliance of water quality performance is shown in *Table 6-4*. Investigation concluded that the exceedances were not project-related, therefore, increase of monitoring frequency (from Event and Action Plan) is not required according to EM&A Manual 7.8.1.3.

Table 6-4 Action and Limit (A/L) Levels Exceedance Record

Station	n DO		Turbidity		SS		To Excee	tal dance	Project Related exceedance		
	Action	Limit	Action	Limit	Action	Limit	Action	Limit	Action	Limit	
M1	0	0	0	5	0	5	0	10	0	0	
M2	0	0	0	1	0	5	0	6	0	0	
M3	0	0	0	0	0	0	0	0	0	0	
M4	0	0	0	3	0	3	0	6	0	0	

6.2.2 Notification of Exceedance and the investigation for exceedance in the Reporting Month is summarized in *Table 6-5*. The investigation reports for exceedance were shown in *Appendix Q*.

Table 6-5 Summary of Investigation of Water Quality Exceedance in the Reporting Month

Date of	Exceeded	Exceeded	Cause of Water Quality Exceedance
Exceedance	Location	Parameter	Cause of Water Quanty Exceedance
5 Aug 2022	M1, M2 & M4	Turbidity & Suspended Solids	According to the weather data from Observatory, there was heavy rainstorm on 5 August 2022, in which Amber Rainstorm Warning Signals were issued at 4:08 and 13:08 on 5 August 2022 respectively. Under the influence of rain, the water quality of seasonal watercourse was inevitably be affected by the stirred up sediment and erosion from the surrounding environment even outside the construction site. In view of the geographical location of Contract 2, M1 is located at upstream of Nam Hang Stream and outside site boundary of Contract 2, it acts as upstream of M2 and there was no works carried out near M1. Construction of footpath at TTA3 was conducted near M4 on Lin Ma Hang Road, there was no discharge in view of the work nature and no adverse water quality impact was observed after rainy day. Construction of road works was conducted on Sandy Ridge, most of area was hard paved and no adverse water quality impact was observed after rainy day. Contribution of polluted water to Nam Hang Road to M2 through seasonal channel was unlikely. In our investigation, there were no active work conducted near M1 and no adverse water quality impact observed at site areas during site inspection. In view of the current site condition, it was considered that all the exceedances were

Date of Exceedance	Exceeded Location	Exceeded Parameter	Cause of Water Quality Exceedance
			likely related to the impact of rainstorm and not caused by the work under the project.
	M1 & M4	Turbidity & Suspended Solids	According to the weather data from Observatory, there was successive heavy rainstorm on 10 to 12 August 2022, in which Amber Rainstorm Warning Signals were issued at 12:15 on 12 August 2022. Under the influence of rain, the water quality of seasonal watercourse was inevitably be affected by the stirred up sediment and erosion from the
10 August	M2	Suspended Solids	surrounding environment even outside the construction site. In view of the geographical location of Contract 2, M1 is located at upstream of Nam Hang Stream and outside site boundary of Contract 2, it acts as upstream of M2 and there was no works carried out near M1. Construction of footpath at TTA3 was conducted near M4 on Lin Ma Hang Road, there was no discharge in view of the work nature and no
12 August	Suspended Solids		adverse water quality impact was observed after rainy day. Construction of road works was conducted on Sandy Ridge, most of area was hard paved and no adverse water quality impact was observed after rainy day. Contribution of polluted water to Nam Hang Road to M2 through seasonal channel was unlikely. In our investigation, there were no active work conducted near M1 and no adverse water quality impact observed at site areas during site inspection. In view of the current site condition, it was considered that all the exceedances were likely related to the impact of rainstorm and not caused by the work under the project.
17 August	M1	Turbidity & Suspended Solids	According to the weather data from Observatory, there was successive heavy rainstorm on 17 to 19 August 2022, in which Amber Rainstorm Warning Signals were issued at 16:10 on 17 August 2022.
19 August	M2	Suspended Solids	In view of the geographical location of Contract 2, M1 is located at upstream of Nam Hang Stream and outside site boundary of Contract 2, it acts as upstream of M2 and there was no works carried out near M1. Construction of footpath at TTA3 was conducted near M4 on Lin Ma Hang Road, there was no discharge in view of the work nature and no adverse water quality impact was observed after rainy day. Construction of road works was conducted on Sandy Ridge, most of area was hard paved and no adverse water quality impact was observed after rainy day. Contribution of polluted water to Nam Hang Road to M2 through seasonal channel was unlikely. In our investigation, there were no active work conducted near M1 and no adverse water quality impact observed at site areas during site inspection. In view of the current site condition, it was considered that all the exceedances were likely related to the impact of rainstorm and not caused by the work under the project.

7. ECOLOGY MONITORING

7.1 REQUIREMENT

- 7.1.1 According to approved EIA report (AEIAR-198/2016), habitat types within project boundary comprise of watercourse, grassland, upland grassland, plantation, woodland and developed area. Natural habitats were of moderate ecological value in terms of species diversity, species rarity, species abundance, ecological linkage as well as nursery. Moreover, 0.3ha of wet woodland on the northern side of Sandy Ridge was deemed habitat with high ecological value. Four types of habitats were regarded as ecologically sensitive habitats, namely wet woodland, watercourses, upland grassland and woodland. Considering human disturbance in upcoming construction and operation phases, ecologically sensitive habitats shall be monitored in accordance with EM&A Manual.
- 7.1.2 The objective of ecologically sensitive habitats monitoring is to evaluate the effectiveness of measures to minimize impacts on concerned habitats from disturbance and pollution. In order to monitor the effectiveness of the measures to the minimize impact on ecologically sensitive habitats from disturbance and pollution, monthly monitoring during construction and operation phases is required as specified in EM&A Manual. Standard faunal transect and sampling surveys cover both wetland habitats (wet woodland and watercourse) and non-wetland habitats (upland grassland and woodland).

7.2 METHODOLOGY

7.2.1 Wetland habitats include wet woodland and watercourses. Monitoring surveys using standardized quantitative methodology will conduct at fixed points. For seasonal watercourse, the survey will be conducted whenever the habitat appears. Measures to respond to decreases in numbers of aquatic fauna using the wetland habitats and Action/Limit levels to trigger these measures are detailed in *Table 7-1*.

Table 7-1 Action and Limit Levels for Wet Woodland Habitats Monitoring

Action Level	Response	Limit Level	Response
Reduction in	Investigate cause and if	Reduction in	Investigate cause and if cause
taxa diversity by	cause identified as related	taxa diversity by	identified as related to the

	remedial action to remove		action.
	or reduce source of		
	disturbance.		

Remarks: Action and Limit Levels and Responses to Evidence of Declines in Aquatic Fauna

7.2.2 Non-wetland habitats consist of upland grassland and woodland. Monthly quantitative surveys of non-aquatic fauna will be conducted using standard route transect counts. Measures to respond to decreases in numbers of non-aquatic fauna using the non-wetland habitats and Action/Limit levels to trigger these measures are detailed in *Table 7-2*.

Table 7-2 Action and Limit Levels for Non-Wet Woodland Habitats Monitoring

	remedial action to remove		action.
	or reduce source of		
	disturbance.		

Remarks: Action and Limit Levels and Responses to Evidence of Declines in Non-Aquatic Fauna

7.2.3 The ecological survey includes all taxa being investigated in accordance with EIA report. Schedule of faunal surveys in each year during construction phase is presented in *Table 7-3*.

Table 7-3 Schedule of Faunal Surveys in each year During Construction Phase

Month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Mammals												
Birds (day)				V		V	V		V	V	V	V

Month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Birds (night)												
Herpetofauna					V		√					
Dragonflies			V	V	V	V	V					
Butterflies					V							
Aquatic fauna			V	V	V	V	V			V		V

Mammal Survey

7.2.4 Mammal surveys will be conducted along the proposed transects (shown in *Appendix K* - Ecological Survey Reports) in during both daytime and night time periods. Along with direct observations, other field signs, such as scats and tracks, will be searched and recorded if present.

Bird Survey

7.2.5 Bird surveys will be conducted along the transects (shown in *Appendix K* - Ecological Survey Reports) during the surveys, species and their vocalizing individuals recorded will be enumerated and recorded according to the habitat(s) they are utilizing.

Herpetofauna Survey

7.2.6 Reptile and amphibian surveys will be conducted along transects (shown in *Appendix K* - Ecological Survey Reports) during surveys careful searches of appropriate microhabitats and refugia for reptiles and their vocalizing individuals will be undertaken and all reptiles observed will be identified and counted.

Dragonfly and Butterfly Survey

7.2.7 Dragonfly and Butterfly surveys will be conducted along transects (shown in *Appendix K* - Ecological Survey Reports) during surveys all dragonflies and Butterflies seen will be identified and counted as accurately as possible.

Aquatic Fauna Survey

- 7.2.8 Freshwater fishes and macro-invertebrates will be recorded by direct observation. All species trapped/recorded will be enumerated and identified (to the lowest taxonomic level possible), and the species of conservation importance photographed.
- 7.2.9 After each ecological monitoring survey, a monthly report of the survey result and data collected will be provided with reference to EM&A Manual. An annual analysis of data will be carried out in order to study if there is any significant reduction in taxa diversity and abundance.

7.3 ECOLOGICAL MONITORING SURVEY FINDINGS (CONTRACT 1)

7.3.1 In the Reporting Month, ecological monitoring was undertaken on 23rd August 2022, a sunny day. The day survey covered wetland and non-wetland areas. The survey was conducted by transect and at fixed points. All species seen would be identified and counted as accurately as possible. Results of the monitoring survey are presented below:

Monitoring Result for Contract 1

<u>Mammal</u>

7.3.2 There was no mammal species recorded in the monitoring area.

Birds

7.3.3 There were a total of 34 bird individuals from 10 species recorded in the monitoring area. No Golden-headed Cisticola was observed during the bird survey. Two species of conservation interests was recorded in this survey: Chinese Hwamei (*Garrulax canorus*) 畫眉 and Great Coucal (*Centropus sinensis*) 褐翅鴉鵑.

Herpetofauna

7.3.4 There was no reptile species recorded in monitoring area. There was no amphibian species recorded in the monitoring area.

Butterfly

7.3.5 There were a total of 9 butterfly individuals from 5 species recorded in the monitoring area.

Dragonfly

7.3.6 There were a total of 7 odonate individuals from 4 species recorded in the monitoring area. One species of conservation interests was recorded in this survey: Scarlet Basker (*Urothemis signata*) 赤斑曲鈎脈蜻.

Aquatic Fauna Survey (Freshwater communities)

- 7.3.7 There were 2 freshwater community recorded in the monitoring area.
- 7.3.8 The summaries of faunal survey result are shown in *Tables 7-4* and *7-5*.

Table 7-4 Result of Faunal Survey under Contract 1

Discussion

7.3.9 After analysing survey results in August from 2019 to 2022, there was no significant drop in species richness and abundance for wetland habitat. Yet, good site practice during construction, with reference to EM&A Manual, is required to prevent or alleviate environmental impacts. For instance, the size of work areas should be minimized and disturbed areas should be reinstated immediately after completion of construction works. Unnecessary site clearance should be avoided as well. In addition, implementing proper waste disposal is necessary to reduce contamination to water and soil. Continuous monitoring is also recommended to inspect any significant decrease in species diversity.

7.4ECOLOGICAL MONITORING SURVEY FINDINGS (CONTRACT 2)

7.4.1 In the Reporting Month, ecological monitoring was undertaken at work area of Contract 2 on 23rd

August 2022, a sunny day. The day and night survey covered wetland and non-wetland areas. The survey was conducted by transect and at fixed point. All species seen would be identified and counted as accurately as possible. Results of the monitoring survey are presented below:

Monitoring Result for Contract 2

Mammal

7.4.2 There was no mammal recorded in the monitoring area

Birds

7.4.3 There were a total of 18 bird individuals from 5 species recorded in the monitoring area. No Golden-headed Cisticola was observed during the bird survey.

Herpetofauna

7.4.4 There was no reptile recorded in the monitoring area. There was one amphibian recorded in the monitoring area.

<u>Butterfly</u>

7.4.5 There was a total of 3 butterfly individual from 2 species recorded in the monitoring area.

Dragonfly

7.4.6 There were a total of 3 odonate from 2 species recorded in the monitoring area.

Aquatic Fauna Survey (Freshwater communities)

- 7.4.7 There were 2 species of freshwater fish were recorded in the monitoring area.
- 7.4.8 The summaries of faunal survey result are shown in *Tables 7-6* and *7-7*.

Discussion

- 7.4.9 After analysing survey results in August 2019 to 2022, there was a decrease in species richness and abundance for wetland and non-wetland habitats. Still, a good site practice during construction, with reference to EM&A Manual, is still required to prevent or alleviate environmental impacts. For instance, the size of work areas should be minimized and disturbed areas should be reinstated immediately after completion of construction works. Unnecessary site clearance should be avoided as well. In addition, implementing proper waste disposal is necessary to reduce contamination to water and soil. Continuous monitoring is also recommended to inspect any significant decrease in species diversity.
- 7.4.10 The detailed Ecological Survey Reports for Contract 1 and Contract 2 are attached in *Appendix K*.
- 7.4.11 The tentative ecology inspection and monitoring in the next Reporting Month (September 2022) is scheduled on 15^{th} September 2022.

^{+:} Species appeared but uncountable.

7.5 MONITORING OF FLORA SPECIES OF CONSERVATION INTEREST UNDER CONTRACT 1

- 7.5.1 According to the approved vegetation survey report and transplantation proposal under FEP-01/534/2017/A, an individual of flora species of conservation interest (the transplanted T-2928) was identified and transplanted to the receptor site.
- 7.5.2 According to approved vegetation survey report and transplantation proposal, post-transplantation monitoring was conducted once per week in the first three months after the transplantation in Oct 2018 and once in each of the following month in the remaining establishment period for 12 month. During the remaining construction phase of the project, the transplanted T-2928 would be monitored on quarterly basis.
- 7.5.3 A landscape sub-contractor was employed by the Contractor to monitor the health condition of transplanted species and provide advice on necessary weeding, fertilizing and pest control. The monitoring records were submitted to ET and IEC for review and record. Moreover, inspection of the transplanted T-2928 was undertaken by ET as part of the weekly site inspection. No construction activity and disturbance were observed at the location of the transplanted T-2928. The health condition of the transplanted T-2928 was fair with normal foliage color and density.

7.6 MEASURE FOR PROTECTION OF NESTING BIRD

- 7.6.1 Pursuant to FEP-01/534/2017/A condition 2.19 and EP-534/2017/A condition 2.20, precautionary checks for the presence of nesting birds shall be carried out in the breeding season (February to July) before vegetation clearance.
- 7.6.2 There was no precautionary check for the presence of nesting birds conducted outside the concerned breeding season (February to July).

8. LANDSCAPE AND VISUAL

8.1 REQUIREMENT

- 8.1.1 The EIA has recommended EM&A for landscape and visual resources to be undertaken during the design, construction and operational stages of the project. The design, implementation and maintenance of landscape mitigation measures is a key aspect of this and should be checked to ensure that they are fully realized and that potential conflicts between the proposed landscape measures and any other project works let its are resolved at the earliest possible date and without compromise to the intention of the mitigation measures. In addition, implementation of the mitigation measures recommended by the EIA will be monitored through the site audit programme.
- 8.1.2 A number of mitigation measures to ameliorate the landscape and visual impacts of the Project implementation is summarized in the EMIS of *Appendix 13.1* of the EIA Report.
- 8.1.3 The landscape and visual mitigation measures proposed should be incorporated in the landscape and engineering design. Mitigation measures to be implemented during construction should be adopted from the start of construction and be in place throughout the entire construction period. Mitigation measures to be implemented during operation should be integrated into the detailed design and built as part of the construction works so that they are in place on commissioning of the Project. Tree transplantation and compensatory planting should be carried out as early as possible in the Project with transplantation carried out prior to construction starting in any particular area.
- 8.1.4 During construction phase, Landscape & Visual Monitoring of the contractor's operations should be conducted monthly and reported by ET, and countersigned by IEC.

8.2 FINDINGS / DEFICIENCIES DURING SITE INSPECTION IN THE REPORTING MONTH

8.2.1 In the Reporting Month, landscape & visual inspection was carried out by the Registered Landscape Architect for works area of Contract 1 and Contract 2 on 30th August 2022. The findings / reminders recorded during the inspection are presented in *Tables 8-1 and 8-2*.

Table 8-1 Landscape & Visual Inspection Finding for Contract 1

	Zundscape & Visual Inspection I maing for Contract I				
Date	Findings and Reminder	Follow-Up Status			
30 th August 2022	1. Transplanted tree T2468, with sprase foliage, brown foliage and small foliage size was found removed. According to Contractor, it was found collapsed due to typhoon.	No action required.			
	2. The Contractor is reminded to set up TPZ of proper size and with appropriate material around retain trees according to approved method statement.	Reminded only			
	3. The Contractor is reminded to prevent the construction material pile within TPZ and ensure no works is allowed within the TPZ.	Reminder only			
	4. Transplanted tree T2465 and T2928 were in fair health condition with normal foliage color and density. Contractor is reminded to provide proper maintenance according to the method statement.	Reminder only			

Table 8-2 Landscape & Visual Inspection Finding for Contract 2

Date	Findings and Reminder	Follow-Up Status
30 th August 2022	1. Contractor is reminded to set up TPZ of proper size and with appropriate material around retain trees according to approved method statement. Contractor should prevent any construction material pile within TPZ and ensure no works is allowed within the TPZ.	Reminder only

8.2.2 Inspection checklist of Landscape & Visual signed by RLA is attached in *Appendix L*.

9. WASTE MANAGEMENT

9.1 GENERAL WASTE MANAGEMENT

9.1.1 Waste management was carried out by an on-site Environmental Officer or an Environmental Supervisor from time to time in accordance with the Waste Management Plan (WMP).

9.2 RECORDS OF WASTE QUANTITIES

- 9.2.1 All types of waste arising from the construction work are classified into the following:
 - Construction & Demolition (C&D) Material;
 - Chemical Waste;
 - General Refuse; and
 - Excavated Soil.
- 9.2.2 The quantities of waste for disposal in this Reporting Month are summarized in *Table 9-1* and *9-2* and the Monthly Summary Waste Flow Table is shown in *Appendix M*. Whenever possible, materials were reused on-site as far as practicable.

Table 9-1 Summary of Quantities of Inert C&D Materials

	Contract 1		Contract 2		
Type of Waste	Quantity	Disposal Location	Quantity	Disposal Location	
Total generated C&D Materials (Inert) ('000m³)	0.615		606.890 (#)		
Reused in this Contract (Inert) ('000m ³)	0.115		0		
Reused in other Projects (Inert) ('000m³)	0		0	1	
Disposal as Public Fill (Inert) ('000m ³)	0.500	Tuen Mun Area 38	606.890 (#)	Tuen Mun Area 38	

Remark: the unit is '000kg

Table 9-2 Summary of Quantities of C&D Wastes

	Con	Contract 1		Contract 2	
Type of Waste	Quantity	Disposal Location	Quantity	Disposal Location	
Recycled Metal ('000kg)	0		0		
Recycled Paper / Cardboard Packing ('000kg)	0		0		
Recycled Plastic ('000kg)	0		0		
Chemical Wastes ('000kg)	0		0		
General Refuses ('000m ³)	0.002	NENT Landfill	2.06	NENT Landfill	

Remark: the unit is '000kg

9.2.3 Since canteen and/or kitchen are not allowed setting on the Project site, no domestic wastewater was generated from the Project.

10. SITE INSPECTION

10.1 REQUIREMENT

10.1.1 According to the approved EM&A Manual, environmental site inspection should be led by RE and attended by the Contractor and ET at least once per week. Regular environmental site inspections shall be carried out to assess the environmental performance.

10.2 FINDINGS / DEFICIENCIES DURING SITE INSPECTION IN THE REPORTING MONTH

Contract 1

10.2.1 In the Reporting Month, joint site inspections for Contract 1 to evaluate the site environmental performance were carried out by the RE, ET and the Contractor on 4th, 11th, 18th, 26th and 30th August 2022 and IEC attended joint site inspection on 18th and 30th August 2022. No non-compliance was noted in the Reporting Month. The findings / deficiencies that observed during the weekly site inspection are listed in Table 10-1.

Table 10-1 Site Observations for the Works of Contract 1

Date	Findings / Deficiencies	Follow-Up Status		
4 th August 2022	• The Contractor was advised to put chemical container inside drip tray or remove it.	• The chemical container was removed.		
11 th August 2022	• The Contractor was reminded to maintain good housekeeping.	Reminder only.		
18 th August 2022	 Free-standing chemical containers were observed on the ground. The Contractor was advised provide drip tray or remove it. The Contractor was advised clean oil stains on site. 	 The chemical containers on the ground were removed. Oil leakage on the ground was cleaned. 		
26 th August 2022	• The Contractor was reminded to remove accumulated water inside drip tray of generator regularly.	Reminder only.		
30 th August 2022	 Oil& water mixture was found inside drip tray. The Contractor should clean up the mixture. (at fill slope 13 opposite) The Contractor was reminded to maintain the tree protection zone properly. 	The oil & water mixture was cleaned. Reminder only.		

Contract 2

10.2.2 In the Reporting Month, joint site inspections for Contract 2 to evaluate the site environmental performance carried out by the RE, ET and the Contractor was on 4th, 11th, 18th, 26th and 30th August 2022 and IEC attended joint site inspection on 18th and 30th August 2022. No non-compliance was noted in the Reporting Month. The findings / deficiencies that observed during the weekly site inspection are listed in *Table 10-2*.

Table 10-2 Site Observations for the Works of Contract 2

Date	Findings / Deficiencies	Follow-Up Status
4 th August 2022	No adverse environmental issue was observed.	• N/A
11 th August 2022	No adverse environmental issue was observed.	• N/A
18 th August 2022	• The Contractor was advised to clean sedimentation tank regularly at jacking pit 2.	The sedimentation tank was cleaned up.
26 th August 2022	No adverse environmental issue was observed.	• N/A
30 th August 2022	• The Contractor was reminded to provide water quality mitigation measures properly.	Reminder only.

11. ENVIRONMENTAL COMPLAINT AND NON-COMPLIANCE

11.1 Environmental Complaint, Summons and Prosecution

- 11.1.1 In the Reporting Month, no summons and prosecution was lodged for the Contract. However, a public complaint was received from EPD on 14 July concerning that the soil/ muddy water from construction site at Lin Ma Hang Road near Contract 2. Investigation was conducted by ET according to the complaint handling procedure in accordance with the EM&A Manual.
- 11.1.2 According to the information and photo provided, the suspected site near lamppost N4221 is the Aggregate Stockpile Area (ASA) belongs to Sang Hing. The ASA is for stockpiling of aggregate only and there is no construction activities carried out within the ASA. The current site activities conducted on Lin Ma Hang Road under Contract 2 are located at TTA1 to TTA3 for road widening and footpath construction, and the current site areas on Lin Ma Hang Road under Contract 2 are generally in order and no noticeable dust and muddy discharge problem was observed during site inspection. For the concerned ASA under management of Sang Hing, the unused aggregate have been covered by impervious sheeting to prevent generation of muddy water, and Sang Hing was reminded to provide proper environmental mitigation measures within the ASA.
- 11.1.3 Having noticed the adverse environmental impact arising from other private owner depots on Lin Ma Hang Road, it is considered that the complaint is unlikely attributed to the works under the Project. Nevertheless, Sang Hing was reminded to fully implement the dust mitigation measures as far as practicable. The ET will closely inspect the implementation of mitigation measures during regularly site inspection and give advice on enhancement measures, where necessary. The complaint log for the Project and investigation report for the complaint is shown in *Appendix N*.
- 11.1.4 The statistical summary table of the environmental complaint, summons and prosecution are presented in *Tables 11-1*, *11-2* and *11-3*.

Table 11-1 Statistical Summary of Environmental Complaints

Donouting Mon	41.	Environmental Complaint Statistics					
Reporting Mon	ıtn	Frequency	Cumulative	Complaint Nature			
1 st – 31 st August 2022	Contract 1	0	2	(1) Air Quality (1) Noise			
1 st – 31 st August 2022	Contract 2	1	4	(1) Water (1) Air Quality (1) Noise (1) Soil/ muddy water			

Table 11-2 Statistical Summary of Environmental Summons

Donouting Mon	4h	Environmental Summons Statistics						
Reporting Mon	ltii	Frequency	Complaint Nature					
1 st – 31 st August 2022	Contract 1	0	0	NA				
1 st – 31 st August 2022	Contract 2	0	0	NA				

Table 11-3 Statistical Summary of Environmental Prosecution

Donouting Mon	41.	E	Environmental Prosecution Statistics						
Reporting Mon	un	Frequency	Complaint Nature						
1 st – 31 st August 2022	Contract 1	0	0	NA					
1 st – 31 st August 2022	Contract 2	0	0	NA					

11.1.5 In addition, no complaints received and emergency event relating to violation of environmental legislation for illegal dumping and landfilling were received.

12. IMPLEMENTATION STATUS OF MITIGATION MEASURES

12.1 GENERAL REQUIREMENTS

- 12.1.1 The environmental mitigation measures that recommended in the Implementation Schedule for Environmental Mitigation Measures (ISEMM) in the approved EM&A Manual covered the issues of dust, noise, water and waste.
- 12.1.2 The Works of Contract 1 and Contract 2 under the Project shall be implementing the required environmental mitigation measures according to the approved EM&A Manual subject to the site condition. Environmental mitigation measures implemented in this Reporting Month is summarized in *Table 12-1*. The status of the Environmental mitigation measures are presented in *Appendix O*.

Table 12-1 Environmental Mitigation Measures

Issues	Environmental Mitigation Measures
Water	• Provided efficient silt removal facilities to reduce SS level before effluent
Quality	discharge.
	• Provided ditches, earth bunds or sand bag barriers to minimize polluted runoff.
	• Temporary drainage was provided to prevent runoff going through site surface
	and minimize polluted runoff.
	• Provided perimeter cut-off drains at site boundaries to intercept storm runoff from
	crossing the site.
	• Exposed slopes surface were compacted and covered with tarpaulin or similar
	means.
A: 0 1:	Provided portable chemical toilets on site.
Air Quality	Maintain damp / wet surface on access road.
	Maintain low vehicular speed within the works areas.
	Provided vehicle wheel washing facilities at each construction site exit;
	Provided water spraying every hour for all active works area.
	Stockpiles of dusty material were covered with impervious sheeting. Provided to the state of the state
	• Provided workers to clear dusty materials at the vehicle entrance or exit regularly.
	• Stockpile more than 20 bags of cement or dry pulverized fuel ash (PFA) has been
	covered entirely by impervious sheeting or placed in an area sheltered on the top and the 3 sides.
Noise	D
Noise	• Restricted operation time of plants from 07:00 to 19:00 on any working day except for Public Holiday and Sunday.
	77 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
	 Reep good maintenance of plants. Placed noisy plants away from residence and school.
	 Provided noise barriers or hoarding to enclose the noisy plants or works.
	• Shut down the plants when not in used.
Waste and	Provided on-site sorting prior to disposal.
Chemical	 Followed requirements and procedures of the "Trip-ticket System"
Management	Predicted required quantity of concrete accurately.
Tranagement	• Collected the unused fresh concrete at designated locations in the sites for
	subsequent disposal.
Ecology	 Implementing water control measures (ETWB TCW No. 5/2005) to avoid direct
20108)	or indirect impacts any watercourses and impact to any aquatic fauna during the
	construction phase.
	• Demarcation fencing has been erected to prevent unauthorised encroachment into
	the riparian corridor by constructions works and traffic.
	• The construction work and site formation have been phased in order to reduce
	overall noise disturbance impacts in particular areas.
	Works have been restricted to daytime and any construction lighting was designed
	and positioned as to not impact on adjacent ecologically sensitive areas.
Canana 1	The site was generally kept tidy and clean.
General	• Environmental Permit was displayed at site entrance.

12.2 TENTATIVE CONSTRUCTION ACTIVITIES IN THE COMING MONTH

- 12.2.1 According to the information provided by HCTYJV, the forthcoming construction activities for Contract 1 are listed below:
 - Concrete pavement at RCP
 - Paving block installation works
 - Drill holes for planting works and fill top soil at CS13
 - Compaction works at footpath
 - U-channel and planter wall construction works at Fill Slope FS17
 - Laying bitumen works
- 12.2.2 According to the information provided by Sang Hing, the forthcoming construction activities for Contract 2 are listed below:
 - Construction of Manhole, gullies, drainage pipe at Lin Ma Hang Road between CH0-50 Southbound & CH505-565 Northbound & CH890-960 Northbound.
 - Pipe Jacking works for DN400 watermain in approx. CH0-300 at Man Kam To Road
 - DN400 DI Watermain reinstatement works in approx. CH700-1040 at Man Kam To Road North Slow Lane
 - Construction of road works at Sandy Ridge Road E, Road F, Road B
 - Fanling Station Road Covered Walkway
 - Lung Sum Avenue road surface modification works

12.3 KEY ISSUES FOR THE COMING MONTH

12.3.1 The construction activities are illustrated in *Appendix P*. Key issues to be considered in the coming month for the works of Contract 1 and 2 shown in *Table 12-2* and *Table 12-3*.

Table 12-2 Work Undertaken and Illustrations of Mitigation Measures for Contract 1

1 able 12-2 W	ork Undertake	en and mustrations of Mitigation Measures for Contract 1
Description of Construction Activities	Used on PME	Environmental Mitigation Measures
Compact works at footpath on Sandy Ridge	 Compaction roller 	 Provided efficient silt removal facilities to reduce SS level before effluent discharge. Provided ditches, earth bunds or sand bag barriers to minimize polluted runoff.
Drill holes for planting works and fill top soil at CS13	 Driller Crane lorry	 Exposed slopes surface were compacted and covered with tarpaulin or similar means. Maintain damp / wet surface on access road.
Paving block installation works	Crane lorryCompaction roller	 Maintain low vehicular speed within the works areas. Provided vehicle wheel washing facilities at each construction site exit; Provided water spraying for all active works area, in particular
Utilities laying works	ExcavatorCompaction roller	for the soil nail works. • Stockpiles of dusty material were covered with impervious sheeting.
Slope drain works at Cut Slope CS13		 Provided workers to clear dusty materials at the vehicle entrance or exit regularly.
Compact works at footpath at Sha Ling Road near Man Kam To Road	• Compaction roller	 Stockpile more than 20 bags of cement or dry PFA has been covered entirely by impervious sheeting or placed in an area sheltered on the top and the 3 sides. Restricted operation time of plants from 07:00 to 19:00 on any

Description of Construction Activities	Used on PME	Environmental Mitigation Measures
Drainage and	 Dump truck 	working day except for Public Holiday and Sunday.
sewerage works at	 Excavator 	 Keep good maintenance of plants.
RCP at Sha Ling	Crane	 Placed noisy plants away from residence and school.
Road near Man Kam To Road	Lorry	 Provided noise barriers or hoarding to enclose the noisy plants or works.
Kaiii 10 Koau		
		• Shut down the plants when not in used.

Implementing water control measures (ETWB TCW No. 5/2005) to avoid direct or indirect impacts any watercourses and impact to any aquatic fauna during the construction phase. Demarcation fencing has been erected to prevent unauthorised encroachment into the riparian corridor by constructions works and traffic. The construction work and site formation have been phased in order to reduce overall noise disturbance impacts in particular areas. Works have been restricted to daytime and any construction lighting was designed and positioned as to not impact on adjacent
		ecologically sensitive areas.The site was generally kept tidy and clean.

12.3.1 The Contractors are reminded to pay special attention on water quality mitigation measures and should fully implement the measures as recommended in the EM&A Manual, in particular to prevent surface runoff and other pollutants from flowing to local stream and Conservation Area.

13. CONCLUSIONS AND RECOMMENTATIONS

13.1 CONCLUSIONS

- 13.1.1 This is the 49th Monthly EM&A Report presenting the monitoring results and inspection findings for the period of 1st to 31st August 2022.
- 13.1.2 In the Reporting Month, no 24-hour or 1-hour TSP monitoring result that triggered the Action or Limit Levels was recorded. No NOEs or the associated corrective action was therefore required.
- 13.1.3 In the Reporting Month, no noise complaint (which triggered Action Level) was received and no Limit Level exceedance for noise monitoring exceedance was recorded.
- 13.1.4 In the Reporting Month, a total of 22 Limit level water quality exceedances, namely 9 exceedances of turbidity and 13 exceedances of SS were recorded. According to the weather information from the HKO, there was heavy rainstorm intermittently during the days of exceedance recorded. Under the impact of rainstorm, the water quality of the watercourse was deteriorated by the stirred up sediment and runoff from the surrounding environment. Weekly site inspection revealed that water quality mitigation measures were in place and the site conditions were generally in order. It was concluded that the exceedances were likely related to the impact of rainstorm and not caused by the work under the project.
- 13.1.5 Monthly ecological monitoring for sensitive habitat for area of Contract 1 and Contract 2 were undertaken on 23rd August 2022. After analysing survey results in August from 2019 to 2022, there was no significant drop in species richness and abundance for wetland and non-wetland habitat for area of Contract 1, but there was a decrease in species richness and abundance for wetland and non-wetland habitats for area of Contract 2. Yet, good site practice during construction, with reference to EM&A Manual, is required to prevent or alleviate environmental impacts. For instance, the size of work areas should be minimized and disturbed areas should be reinstated immediately after completion of construction works. Unnecessary site clearance should be avoided as well. In addition, implementing proper waste disposal is necessary to reduce contamination to water and soil. Continuous monitoring is also recommended to inspect any significant decrease in species diversity.
- 13.1.6 There was no precautionary check for the presence of nesting birds conducted outside the concerned breeding season (February to July).
- 13.1.7 Landscape and visual inspection at both Contracts were undertaken on 30th August 2022. The Contractor was reminded to prevent the construction material pile within Tree Protection Zone and ensure no works is allowed within the TPZ.
- 13.1.8 In the Reporting Month, no environmental summons and prosecution were received. In addition, no complaints received and emergency events relating to violation of environmental legislation for illegal dumping and landfilling were received.
- 13.1.9 In the Reporting Month, an environmental complaint was referred by EPD on 12 August concerning that the soil/ muddy water from construction site at Lin Ma Hang Road near Contract 2. Investigation was conducted by Environmental Team according to the complaint handling procedure in accordance with the EM&A Manual. Investigation result revealed that the current site areas on Lin Ma Hang Road under Contract 2 were generally in order and no noticeable dust and muddy discharge problem was observed. Having noticed adverse environmental impact arising from other private owner depots on Lin Ma Hang Road, it is considered that the complaint is unlikely attributed to the works under the Project.
- 13.1.10 In the Reporting Month, joint site inspections for Contract 1 to evaluate the site environmental performance were carried out by the Resident Engineer, ET and the Contractor of the Contract 1 on 4th, 11th, 18th, 26th and 30th August 2022. Moreover, joint site inspections for Contract 2 by the RE, ET and the Contractor of Contract 2 were carried out on 4th, 11th, 18th, 26th and 30th August 2022. IEC attended the both Contract joint site inspection on 18th and 30th August 2022. No non-compliance was noted during the site inspections.

13.2 RECOMMENDATIONS

- 13.2.1 During wet season, the Contractors are reminded to pay special attention on water quality mitigation measures and should fully implement the measures as recommended in the EM&A Manual, in particular to prevent surface runoff and other pollutants from flowing to local stream and Conservation Area.
- 13.2.2 Air quality mitigation measures such as wheel wash facilities, watering of haul roads, loose soil construction surface and covering of dusty materials with tarpaulin sheet should be implemented as far as practicable.
- 13.2.3 Construction noise would be a key environmental issue during construction phase of the Project. Noise mitigation measures such as using quiet plants and mobile noise barriers should be implemented in accordance with the EM&A requirement.

CONTACT : MR BEN TAM WORK ORDER : HK2210522

CLIENT : ACTION-UNITED ENVIRONMENTAL

SERVICES & CONSULTING

ADDRESS : RM A 20/F., GOLD KING IND BLDG, NO. 35-41 SUB-BATCH :

TAI LIN PAI ROAD, KWAI CHUNG, N.T.

DATE RECEIVED : 18-MAR-2022

DATE OF ISSUE : 28-MAR-2022

PROJECT : ---- NO. OF SAMPLES : 1

CLIENT ORDER :---

General Comments

 Sample(s) was/ were submitted by client. Sample(s) arrived laboratory in ambient condition. The result(s) related only to the item(s) tested.

Sample information (Project name, Sample ID, Sampling date/time, etc.) is provided by client.

Calibration was subcontracted to and analysed by Action United Environmental Services & Consulting.

Equipment Verification Report (TSP)

Equipment Calibrated:

Type: Laser Dust monitor

Manufacturer: Sibata LD-3B

Serial No. 2X6145

Equipment Ref: EQ105

Standard Equipment:

Standard Equipment: Higher Volume Sampler (TSP)

Location & Location ID: AUES office (calibration room)

Equipment Ref: HVS 018 & HVS 019

Last Calibration Date: 5 November 2021 & 13 December 2021

Equipment Verification Results:

Verification Date: 20 December 2021 & 7 January 2022

Date	Hour	Time	Mean Temp °C	Mean Pressure (hPa)	Concentration in ug/m³ (Standard Equipment)	Total Count (Calibrated Equipment)	Count/Minute (Total Count/min)
7 Jan 22	2hr	11:55 ~ 13:55	18.6	1021.6	55.1	2445	20.4
7 Jan 22	2hr27mins	14:23 ~ 16:50	18.6	1021.6	54.8	2316	15.8
7 Jan 22	2hr09mins	16:50 ~ 18:59	18.6	1021.6	56.5	2504	19.4
20 Dec 21*	45mins	10:15 ~ 11:00	20.5	1008.7	472.0	9410	209.1
20 Dec 21*	31mins	11:05 ~ 11:36	20.5	1008.7	187.2	3955	129.2

^(*) Suspended particle was added into calibration room of HVS019 for high concentration test.

Sensitivity Adjustment Scale Setting (Before Calibration)

Sensitivity Adjustment Scale Setting (After Calibration)

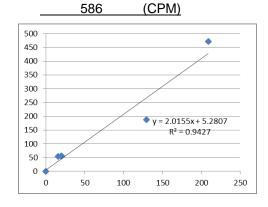

586 (CPM)

Linear Regression of Y or X

Slope (K-factor): $2.0155 (\mu g/m^3)/CPM$

Correlation Coefficient (R) 0.9709

Date of Issue 15 January 2022

Remarks:

- 1. **Strong** Correlation (R>0.8)
- 2. Factor 2.0155 (µg/m³)/CPM should be apply for TSP monitoring

*If R<0.5, repair or re-verification is required for the equipment

NO. 35-41 TAI LIN PAI ROAD, KWAI CHUNG, N.T.

LABORATORY:

HONG KONG

DATE RECEIVED:

20-Jun-2022

DATE OF ISSUE:

27-Jun-2022

SPECIFIC COMMENTS

Equipment information (Brand name, Model No., Serial No. and Equipment No.) is provided by client.

The performance of the equipment stated in this report is checked with independent reference material and results compared against a calibrated secondary source.

The "Tolerance Limit" quoted is the acceptance criteria applicable for similar equipment used by the laboratory or quoted from relevant international standards.

The "Next Calibration Date" is recommended according to best practice principle as practised by the laboratory or quoted from relevant international standards.

The validity of equipment/ meter performance only applies to the result(s) stated in the report.

Equipment Type:

Multifunctional Meter

Service Nature:

Performance Check

Scope:

Conductivity, Dissolved Oxygen, pH Value, Turbidity, Salinity and Temperature

Brand Name/ Model No.:

[YSI]/ [Professional DSS]

Serial No./ Equipment No.:

[17B102764/17B100758]/ [EQW019]

Date of Calibration:

23-June-2022

GENERAL COMMENTS

This report superseded any previous report(s) with same work order number.

Ms. Lin Wai Yu, Iris

Assistant Manager - Inorganics

Event and Action Plan of Air Quality, Noise and Water Quality

Event and Action Plan for air quality

T. 4		Actio		
Event	ET	IEC	ER	Contractor
Action level exceedance for one sample	1. Identify source, investigate the causes of exceedance and propose remedial measures; 2. Inform IEC and ER; 3. Repeat measurement to confirm finding; 4. Increase monitoring frequency to daily.	Check monitoring data submitted by ET; Check Contractor's working method.	1. Notify Contractor	Rectify any unacceptable practice; Amend working methods if appropriate.
Action level exceedance for two or more consecutive samples	1. Identify source; 2. Inform IEC and ER; 3. Advise the ER on the effectiveness of the proposed remedial measures; 4. Repeat measurements to confirm findings; 5. Increase monitoring frequency to daily; 6. Discuss with IEC and Contractor on remedial actions required; 7. If exceedance continues, arrange meeting with IEC and ER; 8. If exceedance stops, cease additional monitoring.	Check monitoring data submitted by ET; Check Contractor's working method; Discuss with ET and Contractor on possible remedial measures; Advise the ET on the effectiveness of the proposed remedial measures; Supervise Implementation of remedial measures.	Confirm receipt of notification of failure in writing; Notify Contractor; Ensure remedial measures properly implemented.	Submit proposals for remedial to ER within 3 working days of notification; Implement the agreed proposals; Amend proposal if appropriate.
Limit level exceedance for one sample	 Identify source, investigate the causes of exceedance and propose remedial measures; Inform ER, Contractor and EPD; Repeat measurement to confirm finding; Increase monitoring frequency to daily; Assess effectiveness of Contractor's remedial actions and keep IEC, EPD and ER informed of the results. 	 Check monitoring data submitted by ET; Check Contractor's working method; Discuss with ET and Contractor on possible remedial measures; Advise the ER on the effectiveness of the proposed remedial measures; Supervise implementation of remedial measures. 	Confirm receipt of notification of failure in writing; Notify Contractor; Ensure remedial measures properly implemented.	Take immediate action to avoid further exceedance; Submit proposals for remedial actions to IEC within 3 working days of notification; Implement the agreed proposals; Amend proposal if appropriate.
Limit level exceedance for two or more consecutive samples	Notify IEC, ER, Contractor and EPD; Identify source; Repeat measurement to confirm findings; Increase monitoring frequency to daily; Carry out analysis of Contractor's working procedures to determine possible mitigation to be implemented; Arrange meeting with IEC and ER to discuss the remedial actions to be taken; Assess effectiveness of Contractor's remedial actions and keep IEC, EPD and ER informed of the results; If exceedance stops, cease additional monitoring.	Discuss amongst ER, ET, and Contractor on the potential remedial actions; Review Contractor's remedial actions whenever necessary to assure their effectiveness and advise the ER accordingly; Supervise the implementation of remedial measures.	Confirm receipt of notification of failure in writing; Notify Contractor; In consultation with the IEC, agree with the Contractor on the remedial measures to be implemented; Ensure remedial measures properly implemented; If exceedance continues, consider what portion of the work is responsible and instruct the Contractor to stop that portion of work until the exceedance is abated.	1. Take immediate action to avoid further exceedance; 2. Submit proposals for remedial actions to IEC within 3 working days of notification; 3. Implement the agreed proposals; 4. Resubmit proposals if problem still not under control; 5. Stop the relevant portion of works as determined by the ER until the exceedance is abated.

Note: ET – Environmental Team IEC – Independent Environmental Checker ER – Engineer's Representative

Event and Action Plan for Water Quality

Event			Action						
Event	ET	IEC	ER	Contractor 1. Identify source(s) of impact; 2. Inform the ER and confirm notification of the non-compliance in writing; 3. Rectify unacceptable practice; 4. Check all plant and equipment; 5. Consider changes of working methods; 6. Discuss with ER, ET and IEC and purpose remedial measures to IEC and ER; and 7. Implement the agreed mitigation measures.					
Action level exceedance for one sampling day	Inform IEC, Contractor and ER; Check monitoring data, all plant, equipment and Contractor's working methods; and Discuss remedial measures with IEC and Contractor and ER.	Discuss with ET, ER and Contractor on the implemented mitigation measures; Review proposals on remedial measures submitted by Contractor and advise the ER accordingly; and Review and advise the ET and ER on the effectiveness of the implemented mitigation measures.	Discuss with IEC, ET and Contractor on the implemented mitigation measures; Make agreement on the remedial measures to be implemented; Supervise the implementation of agreed remedial measures.						
Action level exceedance for more than one consecutive sampling days	Repeat in-situ measurement on next day of exceedance to confirm findings; Inform IEC, contractor and ER; Check monitoring data, all plant, equipment and Contractor's working methods; Discuss remedial measures with IEC, contractor and ER Ensure remedial measures are implemented	Discuss with ET, Contractor and ER on the implemented mitigation measures; Review the proposed remedial measures submitted by Contractor and advise the ER accordingly; and Review and advise the ET and ER on the effectiveness of the implemented mitigation measures.	Discuss with ET, IEC and Contractor on the proposed mitigation measures; Make agreement on the remedial measures to be implemented; and Discuss with ET, IEC and Contractor on the effectiveness of the implemented remedial measures.	I. Identify source(s) of impact; Inform the ER and confirm notification of the non-compliance in writing; Rectify unacceptable practice; Check all plant and equipment and consider changes of working methods; Discuss with ET, IEC and ER and submit proposal of remedial measures to ER and IEC within 3 working days of notification; and Implement the agreed mitigation measures.					
Limit level exceedance for one sampling day	Repeat measurement on next day of exceedance to confirm findings; Inform IEC, contractor and ER; Rectify unacceptable practice; Check monitoring data, all plant, equipment and Contractor's working methods; Consider changes of working methods; Discuss mitigation measures with IEC, ER and Contractor; and Ensure the agreed remedial measures are implemented	 Discuss with ET, Contractor and ER on the implemented mitigation measures; Review the proposed remedial measures submitted by Contractor and advise the ER accordingly; and Review and advise the ET and ER on the effectiveness of the implemented mitigation measures. 	Discuss with ET, IEC and Contractor on the implemented remedial measures; Request Contractor to critically review the working methods; Make agreement on the remedial measures to be implemented; and Discuss with ET, IEC and Contractor on the effectiveness of the implemented remedial measures.	 Identify source(s) of impact; Inform the ER and confirm notification of the non-compliance in writing; Rectify unacceptable practice; Check all plant and equipment and consider changes of working methods; Discuss with ET, IEC and ER and submit proposal of additional mitigation measures to ER and IEC within 3 working days of notification; and Implement the agreed remedial measures. 					
Limit level exceedance for more than one consecutive sampling days	1. Inform IEC, contractor and ER; 2. Check monitoring data, all plant, equipment and Contractor's working methods; 3. Discuss mitigation measures with IEC, ER and Contractor; 4. Ensure mitigation measures are implemented; and 5. Increase the monitoring frequency to daily until no exceedance of Limit Level for two consecutive days	Discuss with ET, Contractor and ER on the implemented mitigation measures; Review the proposed remedial measures submitted by Contractor and advise the ER accordingly; and Review and advise the ET and ER on the effectiveness of the implemented mitigation measures.	Discuss with ET, IEC and Contractor on the implemented remedial measures; Request Contractor to critically review the working methods; Make agreement on the remedial measures to be implemented; Discuss with ET and IEC on the effectiveness of the implemented mitigation measures; and Consider and instruct, if necessary, the Contractor to slow down or to stop all or part of the construction activities until no exceedance of Limit level.	1. Identify source(s) of impact; 2. Inform the ER and confirm notification of the non-compliance in writing; 3. Rectify unacceptable practice; 4. Check all plant and equipment and consider changes of working methods; 5. Discuss with ET, IEC and ER and submit proposal of additional mitigation measures to ER and IEC within 3 working days of notification; and 6. Implement the agreed remedial measures; and 7. As directed by the ER, to slow down or stop all or part of the construction activities until no exceedance of Limit level.					

Note: ET – Environmental Team IEC – Independent Environmental Checker ER – Engineer's Representative Each step of actions required shall be implemented within 1 working day unless otherwise specified or agreed with EPD.

1 INTRODUCTION

1.1 <u>BACKGROUND</u>

- 1.1.1 The main objective of the proposed site formation and associated infrastructural works for development of columbarium, crematorium (C&C) and related facilities at Sandy Ridge Cemetery is to increase the public cremation services and supply of public niches to meet the future demand.
- 1.1.2 The project includes site formation and associated works for development of C&C facilities at the Sandy Ridge Cemetery, road works within Sandy Ridge Cemetery, widening a section of Lin Ma Hang Road (from 6.5m to 7.3m), provision of off-site pick-up/drop-off points for shuttle buses as well as barging point at Siu Lam, Lok On Pai.
- 1.1.3 The Environmental Impact Assessment (EIA) report, including Environmental Monitoring and Audit Manual (EM&A Manual), was approved with conditions on 8 August 2016 (Register No.: AEIAR-198/2016). EPD issued an Environmental Permit (EP) for the Project (EP-534/2017) on 7 April 2017. A Further Environment Permit (FEP) for the Project (FEP-01/534/2017) was issued on 23 February 2018, variation of EP (EP-534/2017/A) and variation of FEP (FEP-01/534/2017/A) were issued on 24 December 2018.
- 1.1.4 According to Clause 3.1 of the FEP (FEP-01/534/2017/A), "The Permit Holder shall implement the EM&A programme in accordance with the procedures and requirements as set out in the EM&A Manual. Any changes to the programme shall be justified by the ET Leader and verified by the IEC as conforming to the information and requirements contained in the EM&A Manual before submission to the Director for approval".
- 1.1.5 This Ecologically Sensitive Habitats Monitoring Methodology articulates the protocol of monitoring the ecology of concerned habitats as specified in EM&A Manual.

1.2 **OBJECTIVE**

- 1.2.1 According to approved EIA report (AEIAR-198/2016), habitat types within project boundary comprise of watercourse, grassland, upland grassland, plantation, woodland and developed area. Natural habitats were of moderate ecological value in terms of species diversity, species rarity, species abundance, ecological linkage as well as nursery. Moreover, 0.3ha of wet woodland on the northern side of Sandy Ridge was deemed habitat with high ecological value. Four types of habitats were regarded as ecologically sensitive habitats, namely wet woodland, watercourses, upland grassland and woodland. Considering human disturbance in upcoming construction and operation phases, ecologically sensitive habitats shall be monitored in accordance with EM&A Manual.
- 1.2.2 The objective of ecologically sensitive habitats monitoring is to evaluate the effectiveness of measures to minimize impacts on concerned habitats from disturbance and pollution.

2 ECOLOGICALLY SENSITIVE HABITATS

2.1 <u>DESCRIPTION OF HABITATS</u>

2.1.1 In order to monitor the effectiveness of the measures to the minimise impact on ecologically sensitive habitats from disturbance and pollution, monthly monitoring during construction and operation phases is required as specified in EM&A Manual. Standard faunal transect and sampling surveys cover both wetland and non-wetland habitats:

Wetland habitats	Non-wetland habitats
Wet Woodland	Upland Grassland
Watercourses	Woodland

- 2.1.2 Wet woodland is small patch present on northwest of the project boundary, and is confined by the marsh area to the north and the secondary woodland to the east, south and south-west parts. A number of mature trees *Cleistocalyx nervosum* and *Acronychia pedunculata* form the tree canopy, with other self-sown shrubs (including *Psychotria asiatica*, *Ligustrum sinense* and *Glochidion lanceolarium*) and trees (*Aporosa dioica* and *Litsea monopetala*). Whilst botanically it comprises of naturally regenerated secondary woodland and ground level are a series of small braided streams and weep points which even during the dry season remain wet. This creates a rather uncommon habitat in Hong Kong offering suitable conditions for a good assemblage of common wetland species. The wet woodland provides a good assemblage of micro-habitats, which is relatively undisturbed and has good linkages to other natural habitats. Several species of conversation importance were recorded in EIA report from this habitat: East Asian Porcupine, Leopard Cat, Red Muntjac, Two-striped Grass Frog, Small Snakehead, *Somanniathelphusa zanklon*, Dancing Shadow-emerald.
- 2.1.3 Seasonal watercourse running west to east in the eastern part of the area inside the Project boundary is shallower in gradient than those running off the hillside. This seasonal watercourse is heavily vegetated with wetland-associated herbs including *Commelina diffusa*, *Polygonum chinense*, *Colocasia esculenta* and *Dracaena sanderiana*. A mature tree of *Aquilaria sinensis* was recorded at the bank of the seasonal watercourse to the west of the Sandy Ridge Cemetery Office. Seasonal watercourses are restricted to the steeper slopes within the project boundary and are characterised by being entirely dry for much of the dry season. However, endemic crab *S. zanklon* population is supported by ephemeral watercourses close to the project boundary.
- 2.1.4 Upland grassland is the major habitat within the project boundary. The semi-natural habitat is dominated by typical upland grassland species: fern *Dicranopteris pedata*, grass *Neyraudia reynaudiana*, *Miscanthus floridulus*, climbing vines *Smilax china*, *Smilax glabra*, and shrubs such as *Rhodomyrtus tomentosa*, *Breynia fruticosa* and *Helicteres angustifolia*. Approximately 30 flowering spikes of two orchid species Bamboo Orchid and Toothed Habenaria were recorded near the hill top in the northern part of this upland grassland. Golden-headed Cisticola, which is considered as Local Concern by Fellowes *et al.* (2002), was also recorded in upland grassland on Sandy Ridge, including a proved breeding record of fledged young in September 2013. In addition, numerous species of conservation interest were recorded in EIA report, such as East Asian Porcupine, Leopard Cat, Red Muntjac, Great Swift, Tamil Grass Dart, Small Three-ring and Small Grass Yellow.

2.1.5 Scattered patches of woodland are present throughout the assessment area, with the largest contiguous block located immediately to the east of the project boundary. These woodlands are relatively young with single-layered of canopy dominants (~10 – 15m tall) including *A. dioica, Bridelia tomentosa, Cinnamomum burmannii, Daphniphyllum calycinum, Litsea glutinosa, Rhus succedanea*, and *Zanthoxylum avicennae*. Such areas comprise secondary woodland which is largely derived from natural regeneration and colonisation of trees as a result of seed dispersal by birds and/or bats. A mature tree of *A. sinensis* is located at the woodland edge at the central part of the Project according to EIA report.

2.2 MONITORING MEASURES OF WETLAND HABITATS

- 2.2.1 Wetland habitats include wet woodland and watercourses. Monitoring surveys using standardised quantitative methodology will be conducted at fixed points. For seasonal watercourse, survey shall be conducted whenever the habitat appears.
- 2.2.2 Measures to respond to decreases in numbers of aquatic fauna using the wetland habitats and action and limit levels to trigger these measures are detailed in Table 1.

Action Level	Response	Limit Level	Response
Reduction in	Investigate cause and if	Reduction	Investigate cause and if
taxa diversity	cause identified as related	in taxa	cause identified as related
by 30%	to the project instigate	diversity	to the project instigate
	remedial action to remove	by 50%	remedial action.
	or reduce source of		
	disturbance.		

Table 1 Action and Limit Levels and Responses to Evidence of Declines in Aquatic Fauna

2.3 MONITORING MEASURES OF NON-WETLAND HABITATS

- 2.3.1 Non-wetland habitats consist of upland grassland and woodland. Monthly quantitative surveys of non-aquatic fauna will be conducted using standard route transect counts.
- 2.3.2 Measures to respond to decreases in numbers of non-aquatic fauna using the non-wetland habitats and action and limit levels to trigger these measures are detailed in Table 2.

Action Level	Response	Limit Level	Response
Reduction in	Investigate cause and if	Reduction	Investigate cause and if
species diversity	cause identified as related	in species	cause identified as related
by 30%	to the project instigate	diversity by	to the project instigate
	remedial action to remove	50%	remedial action.
	or reduce source of		
	disturbance.

Table 3 Survey Schedule

3.1 MAMMAL SURVEY

3.1.1 Mammal surveys will be conducted along the transects shown in Appendix 1 during both daytime and night time periods. Along with direct observations, other field signs, such as scats and tracks, will be searched and recorded if present.

3.2 BIRD SURVEY

3.2.1 Bird surveys will be conducted along the transects shown in Appendix 1 during the surveys, species and their vocalizing individuals recorded will be enumerated and recorded according to the habitat(s) they are utilising.

3.3 HERPETOFAUNA SURVEY

3.3.1 Reptile and amphibian surveys will be conducted along transects shown in Appendix 1 during surveys careful searches of appropriate microhabitats and refugia for reptiles and their vocalizing individuals will be undertaken and all reptiles observed will be identified and counted.

3.4 DRAGONFLY SURVEY

3.4.1 Dragonfly surveys will be conducted along transects shown in Appendix 1 during surveys all dragonflies seen will be identified and counted as accurately as possible.

3.5 BUTTERFLY SURVEY

3.5.1 Butterfly surveys will be conducted along transects shown in Appendix 1 during surveys all butterflies seen will be identified and counted as accurately as possible.

3.6 AQUATIC FAUNA SURVEY

3.6.1 Freshwater fishes and macro-invertebrates will be recorded by direct observation. All species trapped/recorded will be enumerated and identified (to the lowest taxonomic level possible), and the species of conservation importance photographed.

4 RESULT

This monitoring survey started on 23rd August 2022, a sunny day. The day and night survey covered wetland and non-wetland areas. The survey was conducted by transect and at fixed points. All species seen would be identified and counted as accurately as possible.

Mammal

There was no mammal species recorded in the monitoring area.

■ Bird

There were a total of 34 bird individuals from 10 species recorded in the monitoring area. No Golden-headed Cisticola was observed during the bird survey. Two species of conservation interests was recorded in this survey: Chinese Hwamei (*Garrulax canorus*) 畫 眉 and Greater Coucal (*Centropus sinensis*) 褐翅鴉鵑.

■ Herpetofauna

There was no reptile species recorded in the monitoring area.

There was no amphibian species recorded in the monitoring area.

■ Butterfly

There were a total of 9 butterfly individuals from 5 species recorded in the monitoring area.

Dragonfly

There were a total of 7 odonate individuals from 4 species recorded in the monitoring area. One species of conservation interests was recorded in this survey: Scarlet Basker (*Urothemis signata*) 赤斑曲鈎脈蜻.

■ Freshwater communities

There were 2 freshwater community recorded in the monitoring area.

Picture 1

5 DISCUSSION

Data analysis was carried out to compare with the biodiversity within the site boundary in the same month over years. General description of the ecological conditions is first revealed in terms of abundance as well as species richness, following by statistical analysis of the existing database. The result is considered as significant whenever the drop of diversity indexes exceeds the percentages mentioned in previous sections 2.2 and 2.3.

5.1 Total abundance and species richness in August over years were compared to show the trends. Figures 1 and 2 indicate the total species richness and total abundance within the site boundary respectively.

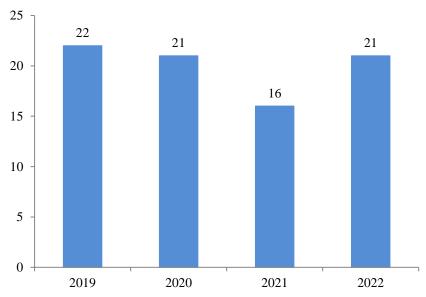

Figure 1: Bar chart showing the total species richness within site boundary from 2019 to 2022 (Actual quantity annotated at the top of each bar)

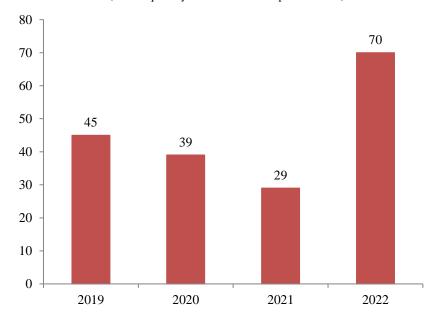

Figure 2: Bar chart showing the total abundance within site boundary from 2019 to 2022 (Actual quantity annotated at the top of each bar)

As results in section 4 were categorized by taxa, a detailed breakdown of each taxon is shown in figure 3 to further investigate the trend of specific taxa over contract period.

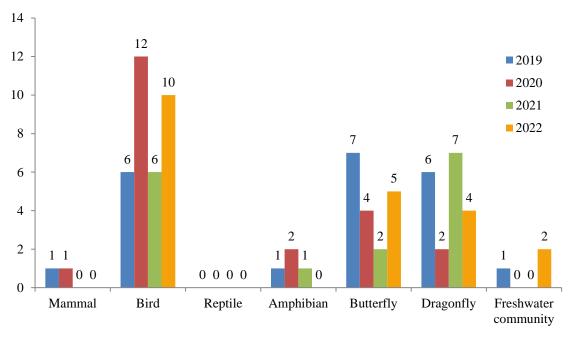

Figure 3: Bar chart showing the species richness within site boundary by taxa from 2019 to 2022 (Actual quantity annotated at the top of each bar)

5.3 According to EM&A Manual, monitoring measures was determined by the species diversity of types of sensitive habitats, i.e. non-wetland and wetland habitats. Abundance and species richness by habitat type in August over years were compared in Figures 4 and 5.

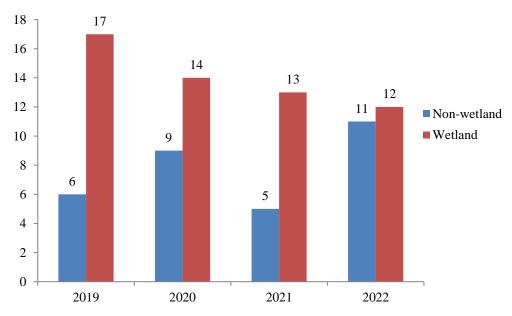

Figure 4: bar chart showing the species richness based on habitat type from 2019 to 2022 (Actual quantity annotated at the top of each bar)

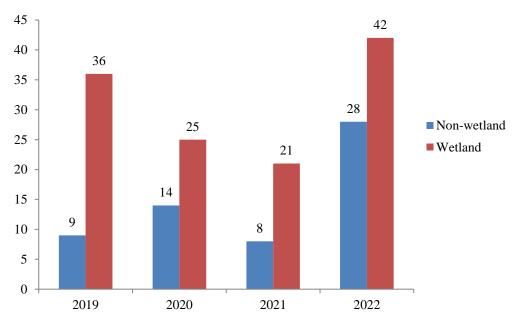

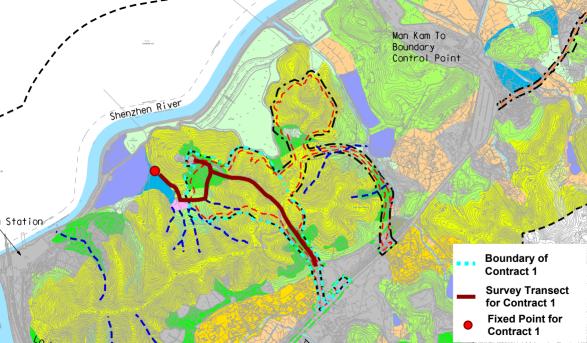

Figure 5: bar chart showing the abundance based on habitat type from 2019 to 2022 (Actual quantity annotated at the top of each bar)

After analysing survey results in August from 2019 to 2022, there was no significant drop in species richness and abundance for wetland habitat. The reduction could be due to natural fluctuation. Yet, good site practice during construction, with reference to EM&A Manual, is required to prevent or alleviate environmental impacts. For instance, the size of work areas should be minimized and disturbed areas should be reinstated immediately after completion of construction works. Unnecessary site clearance should be avoided as well. In addition, implementing proper waste disposal is necessary to reduce contamination to water and soil. Continuous monitoring is also recommended to inspect any significant decrease in species diversity.

1 INTRODUCTION

1.1 <u>BACKGROUND</u>

- 1.1.1 The main objective of the proposed site formation and associated infrastructural works for development of columbarium, crematorium (C&C) and related facilities at Sandy Ridge Cemetery is to increase the public cremation services and supply of public niches to meet the future demand.
- 1.1.2 The project includes site formation and associated works for development of C&C facilities at the Sandy Ridge Cemetery, road works within Sandy Ridge Cemetery, widening a section of Lin Ma Hang Road (from 6.5m to 7.3m), provision of off-site pick-up/drop-off points for shuttle buses as well as barging point at Siu Lam, Lok On Pai.
- 1.1.3 The Environmental Impact Assessment (EIA) report, including Environmental Monitoring and Audit Manual (EM&A Manual), was approved with conditions on 8 August 2016 (Register No.: AEIAR-198/2016). EPD issued an Environmental Permit (EP) for the Project (EP-534/2017) on 7 April 2017, variation of EP (EP-534/2017/A) were issued on 24 December 2018.
- 1.1.4 According to Clause 3.1 of the EP (EP-534/2017/A), "The Permit Holder shall implement the EM&A programme in accordance with the procedures and requirements as set out in the EM&A Manual. Any changes to the programme shall be justified by the ET Leader and verified by the IEC as conforming to the information and requirements contained in the EM&A Manual before submission to the Director for approval".
- 1.1.5 This Ecologically Sensitive Habitats Monitoring Methodology articulates the protocol of monitoring the ecology of concerned habitats as specified in EM&A Manual.

1.2 OBJECTIVE

- 1.2.1 According to approved EIA report (AEIAR-198/2016), habitat types within project boundary comprise of watercourse, grassland, upland grassland, plantation, woodland and developed area. Natural habitats were of moderate ecological value in terms of species diversity, species rarity, species abundance, ecological linkage as well as nursery. Moreover, 0.3ha of wet woodland on the northern side of Sandy Ridge was deemed habitat with high ecological value. Four types of habitats were regarded as ecologically sensitive habitats, namely wet woodland, watercourses, upland grassland and woodland. Considering human disturbance in upcoming construction and operation phases, ecologically sensitive habitats shall be monitored in accordance with EM&A Manual.
- 1.2.2 The objective of ecologically sensitive habitats monitoring is to evaluate the effectiveness of measures to minimize impacts on concerned habitats from disturbance and pollution.

2 ECOLOGICALLY SENSITIVE HABITATS

2.1 <u>DESCRIPTION OF HABITATS</u>

2.1.1 In order to monitor the effectiveness of the measures to the minimise impact on ecologically sensitive habitats from disturbance and pollution, monthly monitoring during construction and operation phases is required as specified in EM&A Manual. Standard faunal transect and sampling surveys cover both wetland and non-wetland habitats:

Wetland habitats	Non-wetland habitats
Wet Woodland	Upland Grassland
Watercourses	Woodland

- 2.1.2 Wet woodland is small patch present on northwest of the project boundary, and is confined by the marsh area to the north and the secondary woodland to the east, south and south-west parts. A number of mature trees Cleistocalyx nervosum and Acronychia pedunculata form the tree canopy, with other self-sown shrubs (including Psychotria asiatica, Ligustrum sinense and Glochidion lanceolarium) and trees (Aporosa dioica and Litsea monopetala). Whilst botanically it comprises of naturally regenerated secondary woodland and ground level are a series of small braided streams and weep points which even during the dry season remain wet. This creates a rather uncommon habitat in Hong Kong offering suitable conditions for a good assemblage of common wetland species. The wet woodland provides a good assemblage of micro-habitats, which is relatively undisturbed and has good linkages to other natural habitats. Several species of conversation importance were recorded in EIA report from this habitat: East Asian Porcupine, Leopard Cat, Red Muntjac, Two-striped Grass Frog, Small Snakehead, Somanniathelphusa zanklon, Dancing Shadow-emerald.
- 2.1.3 Seasonal watercourse running west to east in the eastern part of the area inside the Project boundary is shallower in gradient than those running off the hillside. This seasonal watercourse is heavily vegetated with wetland-associated herbs including *Commelina diffusa*, *Polygonum chinense*, *Colocasia esculenta* and *Dracaena sanderiana*. A mature tree of *Aquilaria sinensis* was recorded at the bank of the seasonal watercourse to the west of the Sandy Ridge Cemetery Office. Seasonal watercourses are restricted to the steeper slopes within the project boundary and are characterised by being entirely dry for much of the dry season. However, endemic crab *S. zanklon* population is supported by ephemeral watercourses close to the project boundary.
- Upland grassland is the major habitat within the project boundary. The semi-natural habitat is dominated by typical upland grassland species: fern *Dicranopteris pedata*, grass *Neyraudia reynaudiana*, *Miscanthus floridulus*, climbing vines *Smilax china*, *Smilax glabra*, and shrubs such as *Rhodomyrtus tomentosa*, *Breynia fruticosa* and *Helicteres angustifolia*. Approximately 30 flowering spikes of two orchid species Bamboo Orchid and Toothed Habenaria were recorded near the hill top in the northern part of this upland grassland. Golden-headed Cisticola, which is considered as Local Concern by Fellowes *et al.* (2002), was also recorded in upland grassland on Sandy Ridge, including a proved breeding record of fledged young in September 2013. In addition, numerous species of conservation interest were recorded in EIA report, such as East Asian Porcupine, Leopard Cat, Red Muntjac, Great Swift, Tamil Grass Dart, Small Three-ring and Small Grass Yellow.

2.1.5 Scattered patches of woodland are present throughout the assessment area, with the largest contiguous block located immediately to the east of the project boundary. These woodlands are relatively young with single-layered of canopy dominants (~10 – 15m tall) including *A. dioica*, *Bridelia tomentosa*, *Cinnamomum burmannii*, *Daphniphyllum calycinum*, *Litsea glutinosa*, *Rhus succedanea*, and *Zanthoxylum avicennae*. Such areas comprise secondary woodland which is largely derived from natural regeneration and colonisation of trees as a result of seed dispersal by birds and/or bats. A mature tree of *A. sinensis* is located at the woodland edge at the central part of the Project according to EIA report.

2.2 MONITORING MEASURES OF WETLAND HABITATS

- 2.2.1 Wetland habitats include wet woodland and watercourses. Monitoring surveys using standardised quantitative methodology will be conducted at fixed points. For seasonal watercourse, survey shall be conducted whenever the habitat appears.
- 2.2.2 Measures to respond to decreases in numbers of aquatic fauna using the wetland habitats and action and limit levels to trigger these measures are detailed in Table 1.

Action Level	Response	Limit Level	Response
Reduction in	Investigate cause and if	Reduction	Investigate cause and if
taxa diversity	cause identified as related	in taxa	cause identified as related
by 30%	to the project instigate	diversity	to the project instigate
	remedial action to remove	by 50%	remedial action.
	or reduce source of		
	disturbance.		

Table 1 Action and Limit Levels and Responses to Evidence of Declines in Aquatic Fauna

2.3 MONITORING MEASURES OF NON-WETLAND HABITATS

- 2.3.1 Non-wetland habitats consist of upland grassland and woodland. Monthly quantitative surveys of non-aquatic fauna will be conducted using standard route transect counts.
- 2.3.2 Measures to respond to decreases in numbers of non-aquatic fauna using the non-wetland habitats and action and limit levels to trigger these measures are detailed in Table 2.

Action Level	Response	Limit Level	Response
Reduction in	Investigate cause and if	Reduction	Investigate cause and if

Table 3 Survey Schedule

3.1 MAMMAL SURVEY

3.1.1 Mammal surveys will be conducted along the transects shown in Appendix 1 during both daytime and night time periods. Along with direct observations, other field signs, such as scats and tracks, will be searched and recorded if present.

3.2 BIRD SURVEY

3.2.1 Bird surveys will be conducted along the transects shown in Appendix 1 during the surveys, species and their vocalizing individuals recorded will be enumerated and recorded according to the habitat(s) they are utilising.

3.3 HERPETOFAUNA SURVEY

3.3.1 Reptile and amphibian surveys will be conducted along transects shown in Appendix 1 during surveys careful searches of appropriate microhabitats and refugia for reptiles and their vocalizing individuals will be undertaken and all reptiles observed will be identified and counted.

3.4 DRAGONFLY SURVEY

3.4.1 Dragonfly surveys will be conducted along transects shown in Appendix 1 during surveys all dragonflies seen will be identified and counted as accurately as possible.

3.5 BUTTERFLY SURVEY

3.5.1 Butterfly surveys will be conducted along transects shown in Appendix 1 during surveys all butterflies seen will be identified and counted as accurately as possible.

3.6 AQUATIC FAUNA SURVEY

3.6.1 Freshwater fishes and macro-invertebrates will be recorded by direct observation. All species trapped/recorded will be enumerated and identified (to the lowest taxonomic level possible), and the species of conservation importance photographed.

4 RESULT

This monitoring survey started on 23rd August 2022, a sunny day. The day and night survey covered wetland and non-wetland areas. The survey was conducted by transect and at fixed point. All species seen would be identified and counted as accurately as possible.

Mammal

There was no mammal recorded in the monitoring area.

■ Bird

There were total of 18 bird individuals from 5 species recorded in the monitoring area. No Golden-headed Cisticola was observed during the bird survey.

■ Herpetofauna

There was no reptile recorded in the monitoring area.

There were one amphibian species recorded in the monitoring area.

Butterfly

There was a total of 3 butterfly individual from 2 species recorded in the monitoring area.

■ Dragonfly

There were a total of 3 odonate from 2 species recorded in the monitoring area.

Freshwater communities

There were 2 species of freshwater fish recorded in the monitoring area.

5 DISCUSSION

Data analysis was carried out to compare with the biodiversity within the site boundary in the same month over years. General description of the ecological conditions is first revealed in terms of abundance as well as species richness, following by statistical analysis of the existing database. The result is considered as significant whenever the drop of diversity indexes exceeds the percentages mentioned in previous sections 2.2 and 2.3.

Total abundance and species richness in August over years were compared to show the trends. Figures 1 and 2 indicate total species richness and total abundance within the site boundary respectively.

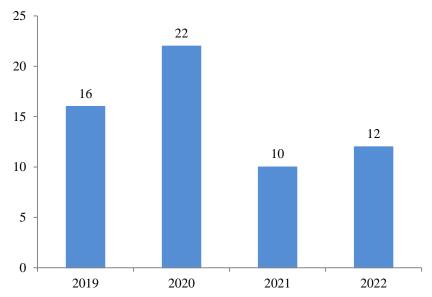

Figure 1: Bar chart showing the total species richness within site boundary from 2019 to 2022 (Actual quantity annotated at the top of each bar)

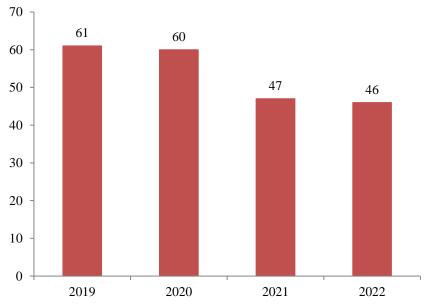

Figure 2: Bar chart showing the total abundance within site boundary from 2019 to 2022 (Actual quantity annotated at the top of each bar)

As results in section 4 were categorized by taxa, a detailed breakdown of each taxon is shown in figure 3 to further investigate the trend of specific taxa over contract period.

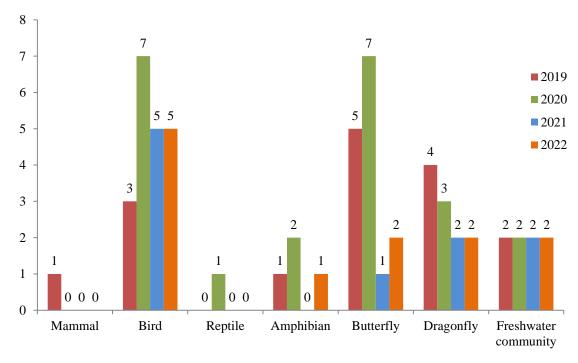

Figure 3: Bar chart showing the species richness within site boundary by taxa from 2019 to 2022 (Actual quantity annotated at the top of each bar)

5.3 According to EM&A Manual, monitoring measures was determined by the species diversity of types of sensitive habitats, i.e. non-wetland and wetland habitats. Abundance and species richness by habitat type in August over years were compared in figures 4 and 5.

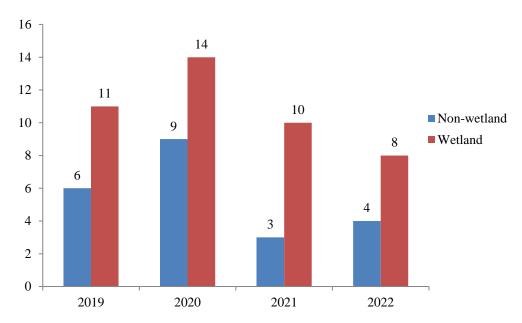

Figure 4: bar chart showing the species richness based on habitat type from 2019 to 2022 (Actual quantity annotated at the top of each bar)

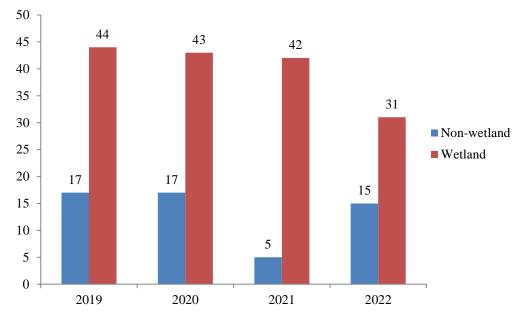

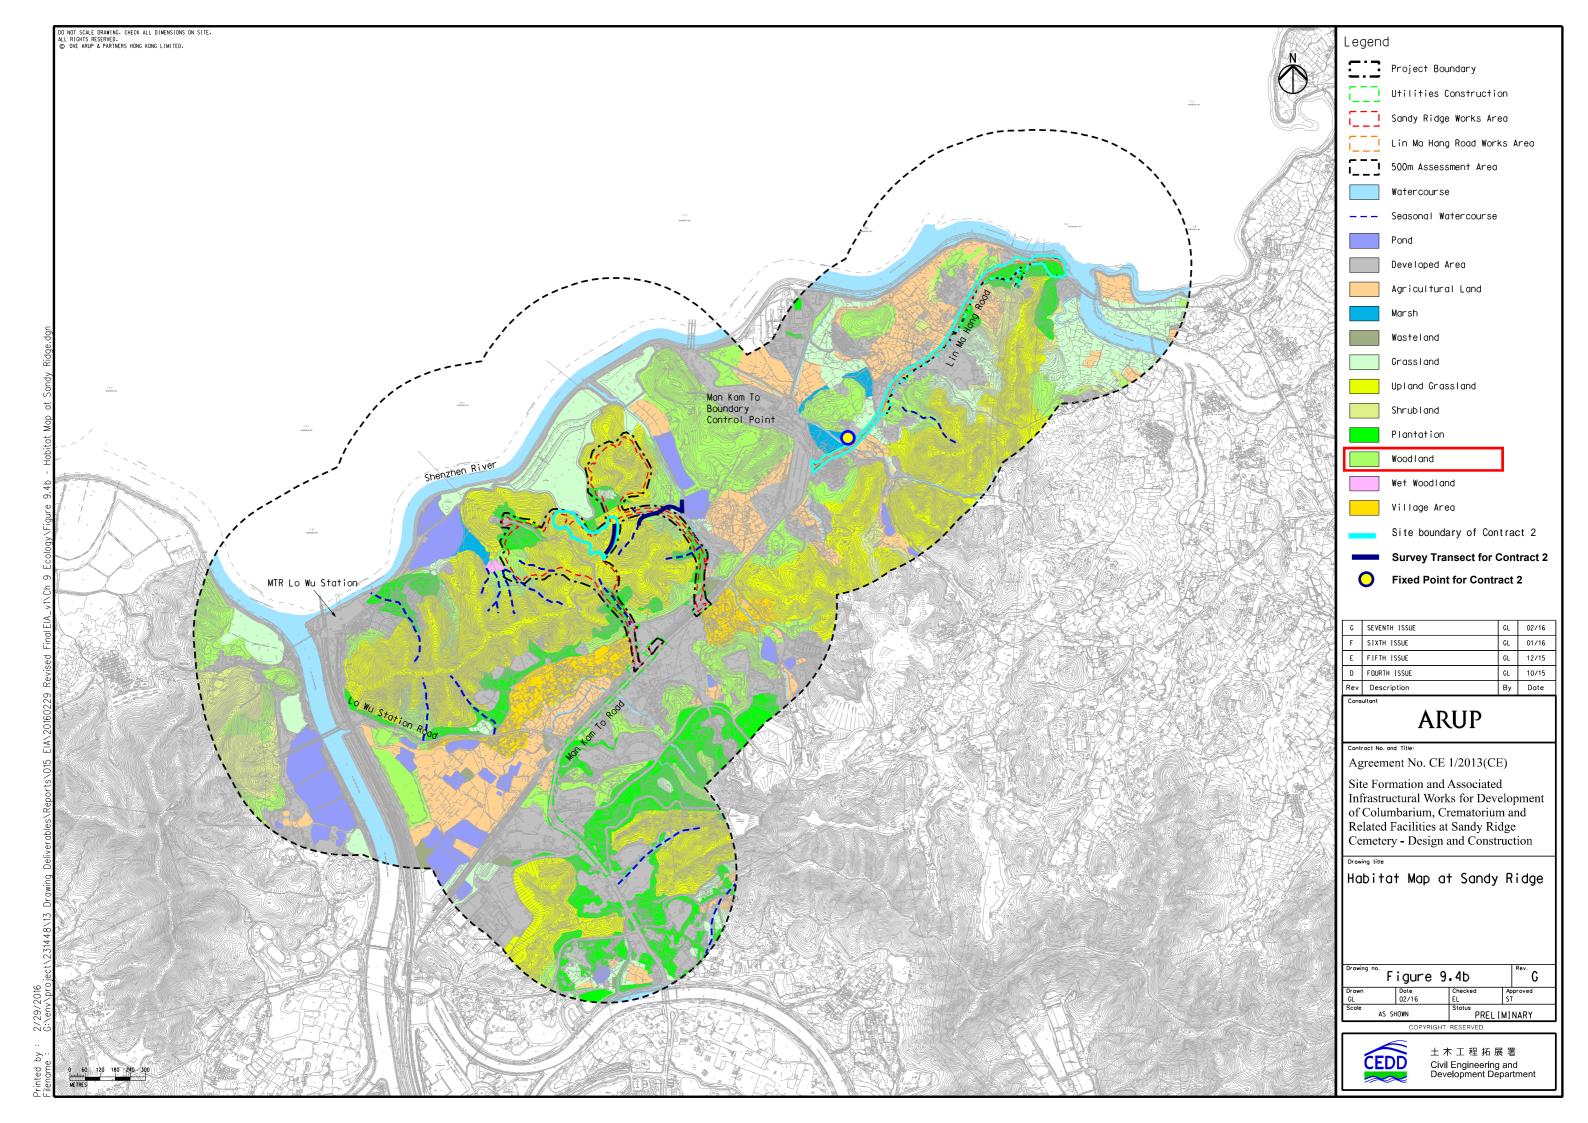

Figure 5: bar chart showing the abundance based on habitat type from 2019 to 2022 (Actual quantity annotated at the top of each bar)

After analysing survey results in August from 2019 to 2022, there was a decrease in species richness and abundance for wetland and non-wetland habitats. Still, a good site practice during construction, with reference to EM&A Manual, is required to prevent or alleviate environmental impacts. For instance, the size of work areas should be minimized and disturbed areas should be reinstated immediately after completion of construction works. Unnecessary site clearance should be avoided as well. In addition, implementing proper waste disposal is necessary to reduce contamination to water and soil. Continuous monitoring is also recommended to inspect any significant decrease in species diversity.

		Yes	No	N/A	
1	Landscape and Visual				
1.1	Is the construction period become shortened?			✓	Under review.
1.2	Is the work site confined within site boundaries and without encroaching into the landscape resources offsite?	✓			
1.3	Is the site kept clean and tidy (E.g. storage of materials, location and appearance of site accommodation being well positioned)	✓			
1.4	Is the construction site screened properly by hoardings or noise barriers in visually unobstructed colours?	✓			
1.5	Is the erosion and dust control for exposed soil well performed during excavation work? (E.g. Exposed soil shall be covered or "camouflaged" and watered frequently. Areas that are expected to be left with bare soil for a long period of time should be hydro seeded and / or covered with suitable protective fabrics.)	✓			
1.6	Are the woodland, plantation and other vegetation being protected and preserved in accordance with DEVB TC(W) No. 07/2015(E.g. Set up Tree Protection Zone)?	✓			
1.7	Are the trees which are in direct conflict with the development proposal being transplanted as far as practical in accordance with and DEVB TC(W) No. 07/2015?	✓			
1.8	Are compensatory planting for trees being provided to compensate the trees felled in accordance with DEVB TC(W) No. 07/2015?			✓	Tree planting works have not yet been commenced.
1.9	Are precautionary control measures to protect natural streams and rivers from adverse impact being implemented in accordance with ETWWB TCW No. 5/2005? (E.g. Construction debris and spoil should be covered up and properly disposed)	✓			
1.10	Is light and glare control such as hooding being implemented during construction and operation to minimize light pollution and night time glare? (E.g. All security floodlights for construction sites should be equipped with adjustable shield, frosted diffusers and reflective covers)	✓			

Summary / Remarks:

Follow up actions taken by Contractor for previous comments:

N/A

New observation:

1. Transplanted tree T2468, with sparse foliage, brown foliage and small foliage size, was found removed. According to contractor, it was found collapsed due to typhoon.

Reminders:

- 1. Contractor is reminded to set up TPZ of proper size and with appropriate material around retain trees according to approved method statement.
- 2. Contractor is reminded to prevent the construction material pile within TPZ and ensure no works is allowed within the TPZ.
- 3. Transplanted trees T2465 and T2928 were in fair health condition with normal foliage color and density. Contractor is reminded to provide proper maintenance according to approved method statement.

Site Formation and Associated Infrastructural Works for Development of Columbarium, Crematorium and Related Facilities at Sandy Ridge Cemetery

Investigation Report on Environmental Complaint / Enquires

Log No.	CV/2017/02 - 02
Received Date by ET	12 August 2022
Related Contract under Investigation	CV/2017/02 (Contract 2)
Complaint Details	要求環境署徹查麻坑路木湖路口有方違反環保條例, 此路 週邊地盤倉經常帶泥頭出 蓮麻坑路面, 造成路面全部都係泥。 把私人範圍及週邊政府範圍嘅河流堵塞, 造成嚴重水浸。 破壞環境影響生態。
Location	Sandy Ridge
Date of Complaint	14 July 2022
Environmental Aspect	Soil / muddy water
Complainant	Undisclosed
Complaint Route	EPD (EPD Ref.: N07/RN/00014141-22)
Investigation Result	1. A public complaint was received from EPD on 14 July concerning that the soil/ muddy water from construction site at Lin Ma Hang Road, and the description of complaint in relation to environmental aspect is shown in "Complaint Details" above. In EPD's inspection, it is suspected that the construction site under complaint is within the site boundary of subject project, which near lamppost N4221. (<i>Photo 1</i>) The Site Agent and Environmental Officer of Contractor of Contract 2 (Sang Hing) was contacted and reminded to cover the stockpile to prevent muddy water discharge.
	2. Following the complaint handling procedure in accordance with the EM&A Manual, the Environmental Team shall investigate if the above is related to the Site Formation and Associated Infrastructure Works for Development of Columbarium, Crematorium and Related Facilities at Sandy Ridge Cemetery.
	3. According to the information and photo provided, the suspected site near lamppost N4221 is the Aggregate Stockpile Area (ASA) belongs to Sang Hing. The ASA is for stockpiling of aggregate only and there is no construction activities carried out within the ASA. The current site activities conducted on Lin Ma Hang Road under Contract 2 are located at TTA1 to TTA3 for road widening and footpath construction. The complaint location and current site activities on Lin Ma Hang Road under Contract 2 are illustrated in <i>Figures 1 to 3</i> .
	4. Joint site inspections have been carried out by RE, Sang Hing and ET on weekly basis for the implementation status of mitigation measures and audit the site practice of Contractors. The observations and respective environmental mitigation measures are summarized in below.
	(a) Road widening, drainage construction and noise barrier were conducted at TTA3 on Lin Ma Hang Road. No noticeable dust impact and muddy water discharge was observed during inspection on 12 August 2022. (<i>Photos 2 & 3</i>)
	(b) Footpath construction was conducted at TTA2 on Lin Ma Hang

Site Formation and Associated Infrastructural Works for Development of Columbarium, Crematorium and Related Facilities at Sandy Ridge Cemetery

Investigation Report on Environmental Complaint / Enquires

- Road. No noticeable dust impact and muddy water discharge was observed during inspection on 12 August 2022. (*Photos 4 & 5*)
- (c) Soil nail work was conducted at TTA1 on Lin Ma Hang Road. The finished slope was fully compacted and no noticeable dust impact and muddy water discharge was observed during inspection on 12 August 2022. (*Photo 6*)
- (d) There was no construction activities carried out within the ASA. The unused aggregate have been covered by impervious sheet to prevent muddy water discharge. (*Photo 7*)
- (e) As advised by Sang Hing, there were several private owner depots located on Lin Ma Hang Road, and carrying of mud from the private owner depots were observed occasionally. Moreover, one of the private owner depot (outside the boundary of the project) is located adjacent to the river course, which likely causing concern of blockage the rivers, flooding and environment problems. (*Photos 8 to 9*)
- 5. In our investigation, the current site areas on Lin Ma Hang Road under Contract 2 are generally in order and no noticeable dust and muddy discharge problem was observed during site inspection. For the concerned ASA under management of Sang Hing, the unused aggregate have been covered by impervious sheeting to prevent generation of muddy water, and Sang Hing was reminded to provide proper environmental mitigation measures within the ASA. Having noticed the adverse environmental impact arising from other private owner depots on Lin Ma Hang Road, it is considered that the complaint is unlikely attributed to the works under the Project.
- 6. Nevertheless, Sang Hing was reminded to fully implement the dust mitigation measures as far as practicable. The ET will closely inspect the implementation of mitigation measures during regularly site inspection and give advice on enhancement measures, where necessary.

Photo Record

Photo 1

Photo of complaint location as provided by EPD. The suspected site near lamppost N4221 is the Aggregate Stockpile Area belongs to Sang Hing.

Photo 3

Road widening, drainage construction and noise barrier were conducted at TTA3 on Lin Ma Hang Road. No noticeable dust impact and muddy water discharge was observed during inspection on 12 August 2022.

Photo 5

Footpath construction was conducted at TTA2 on Lin Ma Hang Road. No noticeable dust impact and muddy water discharge was observed during inspection on 12 August 2022.

Photo 2

Road widening, drainage construction and noise barrier were conducted at TTA3 on Lin Ma Hang Road. No noticeable dust impact and muddy water discharge was observed during site inspection on 12 August 2022.

Photo 4

Footpath construction was conducted at TTA2 on Lin Ma Hang Road. No noticeable dust impact and muddy water discharge was observed during inspection on 12 August 2022.

Photo 6

Soil nail work was conducted at TTA1 on Lin Ma Hang Road. The finished slope was fully compacted. No noticeable dust impact and muddy water discharge was observed during inspection on 12 August 2022.

Photo 7

There was no construction activities carried out within the ASA. The unused aggregate have been covered by impervious sheet to prevent muddy water discharge.

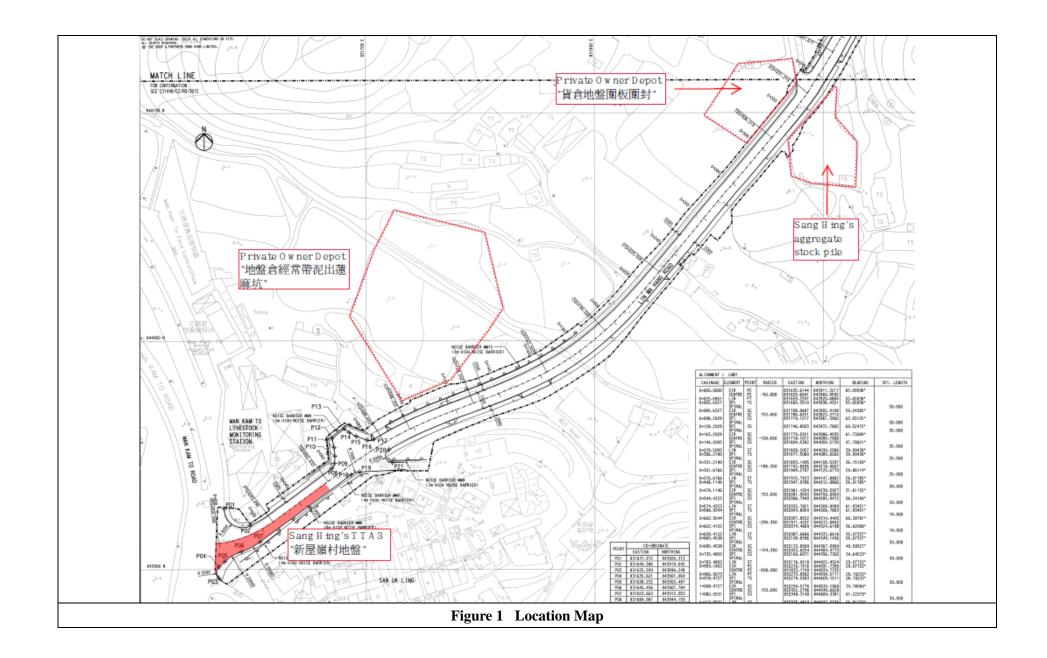

Photo 8

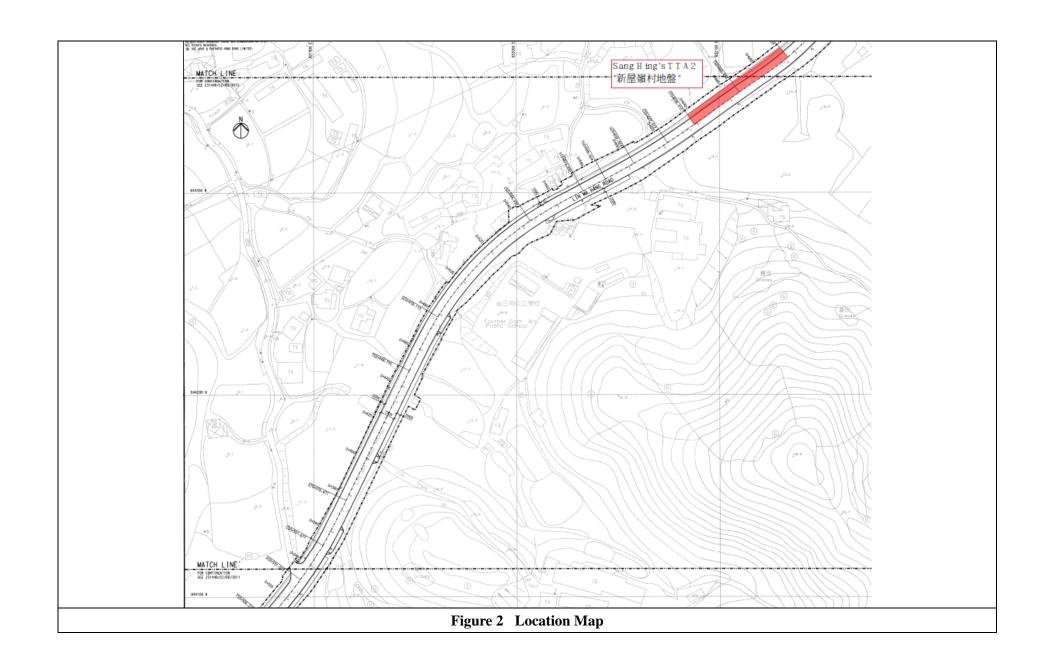

As advised by Sang Hing, there were several private owner depots located on Lin Ma Hang Road, and carrying of mud from the private owner depots were observed occasionally.

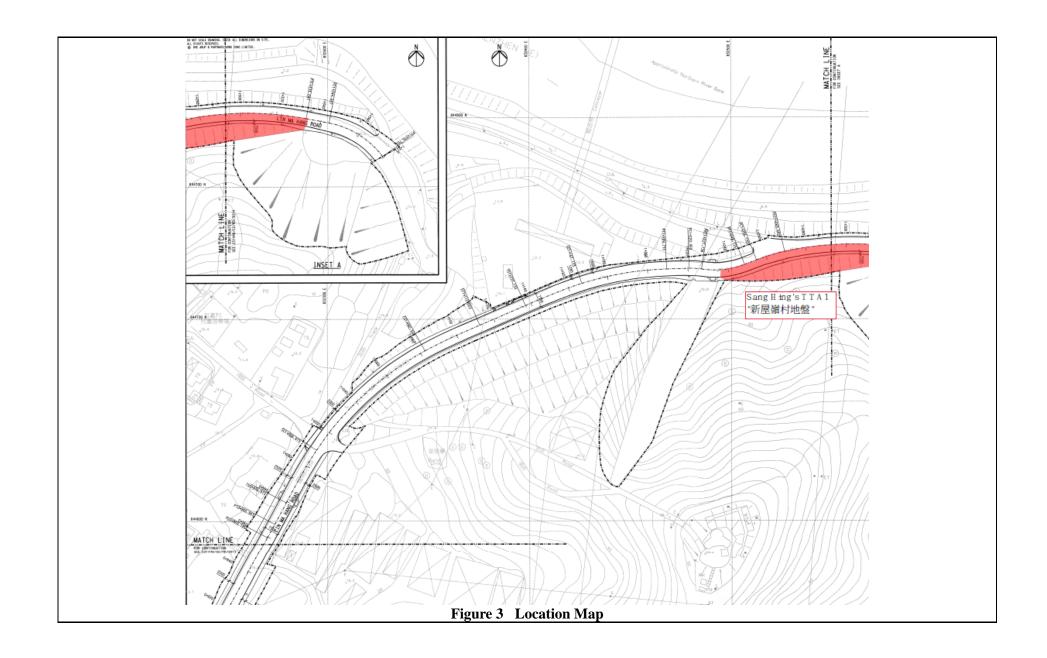

Photo 9

Moreover, one of the private owner depot (outside the boundary of the project) is located adjacent to the river course, which likely causing concern of blockage the rivers, flooding and environment problems.

Appendix O

Implementation Schedule for Environmental Mitigation Measures

						criteria	spraying
S4.4.5.2	Any excavated or stockpile of dusty material should be covered entirely by	Minimise dust impact	Contractor	All	Construction	• APCO	Implemented.
	impervious sheeting or sprayed with water to maintain the entire surface wet and	at the nearby sensitive		construction	phase	To control the dust	
	then removed or backfilled or reinstated where practicable within 24 hours of the	receivers		sites		impact to meet	
	excavation or unloading;					HKAQO and	
	Any dusty materials remaining after a stockpile is removed should be wetted with					TM-EIAO	Implemented
	water and cleared from the surface of roads;					criteria	
	A stockpile of dusty material should not be extended beyond the pedestrian						Implemented
	barriers, fencing or traffic cones;						
	The load of dusty materials on a vehicle leaving a construction site should be						Implemented
	covered entirely by impervious sheeting to ensure that the dusty materials do not						
	leak from the vehicle;						
	Vehicle wheel washing facilities should be provided at each construction site exit.						Implemented
	Immediately before leaving the construction site, every vehicle should be washed						
	to remove any dusty materials from its body and wheels;						
	• When there are open excavation and reinstatement works, hoarding of not less						Implemented
	than 2.4m high should be provided as far as practicable along the site boundary.						
	Good site practice shall also be adopted by the Contractor to ensure the conditions						
	of the hoardings are properly maintained throughout the construction period;						
	• The portion of any road leading only to construction site that is within 30m of a						Invalence 1
	vehicle entrance or exit should be kept clear of dusty materials;						Implemented
	Surfaces where any pneumatic or power-driven drilling, cutting, polishing or other machanical breaking appartiantaless place about the ground with water or						Immlement - 1
	other mechanical breaking operation takes place should be sprayed with water or						Implemented
	a dust suppression chemical continuously; Any area that involves demolition estivities should be enroyed with water or a						
	Any area that involves demolition activities should be sprayed with water or a			1			

EIA Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Implementation Agent	Location / Timing	Implementation Stage	Requirements and / or standards to be achieved	Implementation status and remark*
	dust suppression chemical immediately prior to, during and immediately after the activities so as to maintain the entire surface wet; • Any skip hoist for material transport should be totally enclosed by impervious						Implemented
	 sheeting; Every stock of more than 20 bags of cement or dry pulverised fuel ash (PFA) 						Implemented
	should be covered entirely by impervious sheeting or placed in an area sheltered on the top and the 3 sides;						Implemented
	 Loading, unloading, transfer, handling or storage of bulk cement or dry PFA should be carried out in a totally enclosed system or facility, and any vent or exhaust should be fitted with an effective fabric filter or equivalent air pollution control system; Exposed earth should be properly treated by compaction, turfing, hydroseeding, 						Implemented
	vegetation planting or sealing with latex, vinyl, bitumen, shortcrete or other suitable surface stabiliser within six months after the last construction activity on the construction site or part of the construction site where the exposed earth lies.						Implemented
S4.4.5.1	Implement regular dust monitoring under EM&A programme during the construction stage.	Monitoring of dust impact	Contractor	Selected representative dust monitoring station	Construction phase	• TM-EIAO	Implemented. 3 dust monitoring stations were Implemented.
S4.4.5.3	 All road surface within the barging facilities will be paved. Dust enclosures will be provided for the loading ramp, installation of 3- sided screen with top cover and the provision of water sprays at the discharge point would be provided. Vehicles will be required to pass through designated wheel wash facilities. Continuous water spray at the loading point. 	Minimise dust impact at the nearby sensitive receivers	Contractor	Barging point at Siu Lam	Construction phase	• TM-EIAO	No Applicable. * Barging point at Siu Lam is not in used.
Construction			l .		<u> </u>		
S5.5.5.3	Implement the following good site management practices: only well-maintained plant should be operated on-site and plant should be serviced regularly during the construction programme; machines and plant (such as trucks, cranes) that may be in intermittent use should be shut down between work periods or should be throttled down to a minimum; plant known to emit noise strongly in one direction, where possible, be orientated so that the noise is directed away from nearby NSRs;	Control construction noise	Contractor	All construction sites	Construction phase	• Annex 5, TM-EIAO	Implemented Implemented Implemented
	 silencers or mufflers on construction equipment should be properly fitted and maintained during the construction works; mobile plant should be sited as far away from NSRs as possible and practicable; material stockpiles, mobile container site office and other structures should be effectively utilised, where practicable, to screen noise from onsite construction 						Implemented Implemented Implemented

EIA Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Implementation Agent	Location / Timing	Implementation Stage	Requirements and / or standards to be achieved	Implementation status and remark*
	activities.						
S5.5.5.5	Adopt quiet plants during the construction of viaduct, widening of Sha Ling Road, construction of platform for crematorium and widening of Lin Ma Hang Road. The quiet plants should be made reference to the PME listed in the TM or the QPME/ other commonly used PME listed in EPD web pages or taken from BS5228: Part 1: 2009 Noise Control on Construction and Open Sites as far as possible.	Reduce the noise levels of plant items	Contractor	Works area for construction of viaduct, widening of Sha Ling Road, construction of platform for crematorium and widening of Lin Ma Hang Road	Construction phase	• Annex 5, TM-EIAO	Implemented * Quiet plants were in used.
\$5.5.5.6	Install temporary noise barriers (in the form of site hoardings, approx. 2.4m high) located on the site boundaries between noisy construction activities and NSRs. The conditions of the hoardings shall be properly maintained throughout the construction period.	Reduce the construction noise levels at low-level zone of NSRs through partial screening.	Contractor	All construction sites where practicable	Construction phase	Annex 5, TM-EIAO	Implemented where necessary. * Temporary noise barriers are not practicable due to site constraint.
\$5.5.5.7 - \$5.5.5.12	Install movable noise barriers (typical design is wooden framed barrier with a small-cantilevered upper portion of superficial density no less than 7kg/m2 on a skid footing with 25mm thick internal sound absorptive lining), acoustic mat or full enclosure, screen the noisy plants including air compressors, generators etc.	Screen the noisy plant items to be used at all construction sites	Contractor	All construction sites where practicable	Construction phase	Annex 5, TM-EIAO	Implemented where necessary. * Movable noise barriers are not practicable due to site constraint.
\$5.5.5.13	Sequencing operation of construction plants where practicable.	Operate sequentially within the same work site to reduce the construction noise	Contractor	All construction sites where practicable	Construction phase	Annex 5, TM-EIAO	Implemented

EIA Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Implementation Agent	Location / Timing	Implementation Stage	Requirements and / or standards to be achieved	Implementation status and remark*
S13.2.1.1 - S13.4.1.2	Implement a noise monitoring under EM&A programme.	Monitor the construction noise levels at the selected representative locations	Contractor	Selected representative noise monitoring station	Construction phase	TM-EIAO	Implemented. * 4 noise monitoring stations were Implemented.
Operation	l nl Noise (Road Traffic Noise)						L
S5.6.6.4	Provide a series of noise mitigation measures including absorptive noise barriers and low noise road surfacing materials along Lin Ma Hang Road and Sha Ling Road before operation of the proposed project for existing and planned representative NSRs. Locations of noise mitigation measures are stated as following: For existing representative NSRs Approx. 12m of absorptive noise barrier 2.5m above road level along Sha Ling Road (MM1); Approx. 92m of absorptive noise barrier 3m above road level along Sha Ling Road (MM2); Approx. 28m of absorptive noise barrier 3m above road level along Project Road near Sha Ling Road (MM3); Approx. 51m of absorptive noise barrier 3m above road level along Project Road near Sha Ling Road (MM4); Approx. 25m of absorptive noise barrier 4m above road level along Lin Ma Hang Road near San Uk Ling (MM5); Approx. 21m of absorptive noise barrier 4m above road level along Lin Ma Hang Road near San Uk Ling (MM6); Approx. 14m of absorptive noise barrier 4m above road level along Lin Ma Hang Road near San Uk Ling (MM7); Approx. 18m of absorptive noise barrier 3m above road level along Lin Ma Hang Road near San Uk Ling (MM8); Approx. 42m of absorptive noise barrier 3m above road level along Lin Ma Hang Road near San Uk Ling (MM8); Approx. 93m of absorptive noise barrier 3m above road level along Lin Ma Hang Road opposite San Uk Ling (MM10); Approx. 185m of low noise surfacing materials along Lin Ma Hang Road near San Uk Ling (MM10); For planned representative NSRs Approx. 36m of absorptive noise barrier 5m above road level along Lin Ma Hang Road near Muk Wu Nga Yiu (MM12);	Reduce operation noise from road traffic	Contractor	Refer to Figures 5.6.9 - 5.6.13 of the EIA Report	Prior to operation of the Project for existing representative NSRs. While for barriers to protect planned representative NSRs, it should constructed before intake of planned representative NSRs.	• TM-EIAO	Shall be implemented Prior to operation of the Project.

EIA Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Implementation Agent	Location / Timing	Implementation Stage	Requirements and / or standards to be achieved	Implementation status and remark*
	 Road near Muk Wu Nga Yiu (MM13); Approx. 31m of absorptive noise barrier 5m above road level along Lin Ma Hang Road near Muk Wu Nga Yiu (MM14); Approx. 31m of absorptive noise barrier 5m above road level along Lin Ma Hang Road near Muk Wu Nga Yiu (MM15); Approx. 41m of absorptive noise barrier 5m above road level along Lin Ma Hang Road near Muk Wu Nga Yiu (MM16); Approx. 340m of low noise surfacing materials along Lin Ma Hang Road near Muk Wu Nga Yiu (MM17). 						
Water Qua	lity (Construction Phase)						
S6.4.4.1 - S6.4.4.3	 In accordance with the Practice Note for Professional Persons on Construction Site Drainage, Environmental Protection Department, 1994 (ProPECC PN1/94), construction phase mitigation measures shall include the following: General Site Operation At the start of site establishment, perimeter cut-off drains to direct offsite water around the site should be constructed with internal drainage works and erosion and sedimentation control facilities implemented. Channels (both temporary and permanent drainage pipes and culverts), earth bunds or sand bag barriers should be provided on site to direct stormwater to silt removal facilities. The design of the temporary on-site drainage system will be undertaken by the contractor prior to the commencement of construction; Diversion of natural stormwater should be avoided as far as possible. The design of temporary on-site drainage should prevent runoff going through site surface, construction machinery and equipment in order to avoid or minimise polluted runoff. Sedimentation tanks with sufficient capacity, constructed from pre-formed individual cells of approximately 6 to 8 m³ capacities are recommended as a general mitigation measure which can be used for settling surface runoff prior to disposal. The system capacity shall be flexible and able to handle multiple inputs 	To minimise water quality impact from construction site runoff and general construction activities	Contractor	All construction sites where applicable	Construction phase	Water Pollution Control Ordinance ProPECC PN1/94 TM-EIAO TM-DSS	Implemented
	from a variety of sources and suited to applications where the influent is pumped; • The dikes or embankments for flood protection should be implemented around the boundaries of earthwork areas. Temporary ditches should be provided to facilitate the runoff discharge into an appropriate watercourse, through a site/sediment trap. The sediment/silt traps should be incorporated in the						Implemented
	 permanent drainage channels to enhance deposition rates; The design of efficient silt removal facilities should be based on the guidelines in Appendix A1 of ProPECC PN 1/94. The detailed design of the sand/silt traps 						Implemented
	shall be undertaken by the contractor prior to the commencement of construction; Construction works should be programmed to minimise surface excavation works during the rainy seasons (April to September). All exposed earth areas should be						Implemented

EIA Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Implementation Agent	Location / Timing	Implementation Stage	Requirements and / or standards to be achieved	Implementation status and remark*
	completed and vegetated as soon as possible after earthworks have been						
	completed. If excavation of soil cannot be avoided during the rainy season, or at						
	any time of year when rainstorms are likely, exposed slope surfaces should be						
	covered by tarpaulin or other means;						
	 If the excavation of trenches in wet periods is necessary, it should be dug and 						Implemented
	backfilled in short sections wherever practicable. Water pumped out from						
	trenches or foundation excavations should be discharged into storm drains via silt						
	removal facilities;						
	 All drainage facilities and erosion and sediment control structures should be 						Implemented
	regularly inspected and maintained to ensure proper and efficient operation at all						
	times and particularly following rainstorms. Deposited silt and grit should be						
	removed regularly and disposed of by spreading evenly over stable, vegetated						
	areas;						
	 All open stockpiles of construction materials (for example, aggregates, sand and 						
	fill material) of more than 50m3 should be covered with tarpaulin or similar fabric						Implemented
	during rainstorms. Measures should be taken to prevent the washing away of						
	construction materials, soil, silt or debris into any drainage system;						
	 Manholes (including newly constructed ones) should always be covered and 						
	temporarily sealed so as to prevent silt, construction materials or debris being						Implemented
	washed into the drainage system and storm runoff being directed into foul						
	sewers;						
	• Precautions be taken at any time of year when rainstorms are likely, actions to be						
	taken when a rainstorm is imminent or forecasted, and actions to be taken during						Implemented
	or after rainstorms are summarised in Appendix A2 of ProPECC PN 1/94.						
	Particular attention should be paid to the control of silty surface runoff during						
	storm events, especially for areas located near steep slopes;						
	All vehicles and plant should be cleaned before leaving a construction site to						
	ensure no earth, mud, debris and the like is deposited by them on roads. An						Implemented
	adequately designed and sited wheel washing facilities should be provided at						
	every construction site exit where practicable.						
	• Wash-water should have sand and silt settled out and removed at least on a						
	weekly basis to ensure the continued efficiency of the process. The section of						Implemented
	access road leading to, and exiting from, the wheel-wash bay to the public road						
	should be paved with sufficient backfall toward the wheel-wash bay to prevent						
	vehicle tracking of soil and silty water to public roads and drains;						
	Oil interceptors should be provided in the drainage system downstream of any						
	oil/fuel pollution sources. The oil interceptors should be emptied and cleaned						Implemented
	regularly to prevent the release of oil and grease into the storm water drainage						
	system after accidental spillage. A bypass should be provided for the oil						
	interceptors to prevent flushing during heavy rain;						

EIA Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Implementation Agent	Location / Timing	Implementation Stage	Requirements and / or standards to be achieved	Implementation status and remark*
	 Construction solid waste, debris and rubbish on site should be collected, handled and disposed of properly to avoid water quality impacts; All fuel tanks and storage areas should be provided with locks and sited on sealed areas, within bunds of a capacity equal to 110% of the storage capacity of the largest tank to prevent spilled fuel oils from reaching water sensitive receivers nearby; 						Implemented Implemented
	 Regular environmental audit on the construction site should be carried out in order to prevent any malpractices. Notices should be posted at conspicuous locations to remind the workers not to discharge any sewage or wastewater into the water bodies, marsh and ponds; Adopt best management practices. 						Implemented
S6.4.4.4 - S6.4.4.5	Sewage from workforce Portable chemical toilets and sewage holding tanks are recommended for handling the construction sewage generated by the workforce. A licensed contractor should be employed to provide appropriate and adequate portable toilets and be responsible for appropriate disposal and maintenance; Notices should be posted at conspicuous locations to remind the workers not to discharge any sewage or wastewater into the nearby environment during the construction phase of the Project; Regular environmental audit on the construction site should be conducted in order to provide an effective control of any malpractices and achieve continual improvement of environmental performance on site.	To minimise water quality from sewage effluent	Contractor	All construction sites where practicable	Construction phase	Water Pollution Control Ordinance TM-DSS	Implemented Implemented Implemented
S6.4.4.6	 Operation of Barging Point at Siu Lam All barges should be fitted with tight bottom seals to prevent leakage of materials during transport; Barges or hoppers should not be filled to a level that will cause overflow of materials or polluted water during loading or transportation; All vessels should be sized so that adequate clearance is maintained between vessels and the seabed in all tide conditions, to ensure that undue turbidity is not generated by turbulence from vessel movement or propeller wash; and Loading of barges and hoppers should be controlled to prevent splashing of material into the surrounding water. Mitigation measures for land-based activities as outlined in Section 6.4.4 should be applied to minimise water quality impacts from site runoff and open stockpile spoils at the proposed barging facilities where appropriate. 	To minimise water quality from operation of barging point at Siu Lam	Contractor	All construction sites where practicable	Construction phase	Water Pollution Control Ordinance TM-DSS	No Applicable. * Barging point at Siu Lam is not in used.

EIA Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Implementation Agent	Location / Timing	Implementation Stage	Requirements and / or standards to be achieved	Implementation status and remark*
S6.5.4.1 - S6.5.4.6	The following mitigation measures during operational phase are recommended: Sewage and wastewater discharge should be connected to foul sewerage system; Proper drainage systems with silt traps and oil interceptors should be installed; The design of road gullies with silt traps should be incorporated especially for the catchment leading to the existing wet woodland area located at the north of the site; The silt traps and oil interceptors should be cleaned and maintained regularly, especially before peak seasons of the visitors in Ching Ming Festival and Chung Yeung Festival; Energy dissipaters should be installed at the seasonally wet watercourses to reduce the magnitude of the first flush in order to minimise the erosion impact to the wet woodland. agement (Construction Waste)	To minimise the road runoff, wastewater discharge and erosion of seasonal watercourse during the operational phase	Highways Department /Contractors	Whole alignment	Construction / Operational Phase	Water Pollution Control Ordinance TM-DSS	For Operational phase
\$7.3.3.8	Construction & Demolition Material Management Plan (C&DMMP) • A C&DMMP shall be submitted to the Public Fill Committee for approval in the case of C&D materials disposal exceeding 50,000m3.	To enhance the management of construction and demolition (C&D) material including rock in public works projects	Contractor	All construction sites	Construction phase	Project Administrative Handbook for Civil Engineering Works, 2012 Edition	
S7.3.4.2	 Good Site Practice The following good site practices are recommended throughout the construction activities: nomination of an approved personnel, such as a site manager, to be responsible for the implementation of good site practices, arrangements for collection and effective disposal to an appropriate facility, of all wastes generated at the site; training of site personnel in site cleanliness, appropriate waste management procedures and concepts of waste reduction, reuse and recycling; provision of sufficient waste disposal points and regular collection for disposal; appropriate measures to minimise windblown litter and dust during transportation of waste by either covering trucks or by transporting wastes in enclosed containers; regular cleaning and maintenance programme for drainage systems, sumps and oil interceptors; a Waste Management Plan (WMP) should be prepared by the contractor and submitted to the Engineer for approval. 	Minimise waste generation during construction	Contractor	All construction sites	Construction phase	• Waste Disposal Ordinance	Implemented Implemented Implemented Implemented Implemented

EIA Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Implementation Agent	Location / Timing	Implementation Stage	Requirements and / or standards to be achieved	Implementation status and remark*
\$7.3.4.3	Waste Reduction Measures Waste reduction is best achieved at the planning and design phase, as well as by ensuring the implementation of good site practices. The following recommendations are proposed to achieve reduction: • segregate and store different types of waste in different containers, skip or stockpiles to enhance reuse or recycling of materials and their proper disposal; • proper storage and site practices to minimise the potential for damage and contamination of construction materials; • plan and stock construction materials carefully to minimise amount of waste generated and avoid unnecessary generation of waste; • sort out demolition debris and excavated materials from demolition works to recover reusable/recyclable portions (i.e. soil, broken concrete metal etc.); • provide training to workers on the importance of appropriate waste management	Reduce waste generation	Contractor	All construction sites	Construction phase	Waste Disposal Ordinance	Implemented Implemented Implemented Implemented Implemented
S7.3.4.5	procedures, including waste reduction, reuse and recycling. Storage of Waste The following recommendation should be implemented to minimise the impacts: non-inert C&D materials such as soil should be handled and stored well to ensure secure containment; stockpiling area should be provided with covers and water spraying system to prevent materials from wind-blown or being washed away; different locations should be designated to stockpile each material to enhance reuse;	Good site practice to minimise the waste generation and recycle the C&D materials as far as practicable so as to reduce the amount for final disposal	Contractor	All construction sites	Construction phase	• Land (Miscellaneous Provisions) Ordinance • Waste Disposal Ordinance • ETWB TCW No. 19/2005	Implemented Implemented Implemented
\$7.3.4.6	Collection and Transportation of Waste The following recommendation should be implemented to minimise the impacts: • remove waste in timely manner; • employ the trucks with cover or enclosed containers for waste transportation; • obtain relevant waste disposal permits from the appropriate authorities; and • disposal of waste should be done at licensed waste disposal facilities.	Minimise waste impacts from storage	Contractor	All construction sites	Construction phase	Waste Disposal Ordinance	Implemented Implemented Implemented Implemented
S7.3.4.8 - S7.3.4.15	Excavated and C&D Materials Wherever practicable, C&D materials should be segregated from other wastes to avoid contamination and ensure acceptability at public filling areas or reclamation sites. The following mitigation measures should be implemented in handling the excavated and C&D materials: • maintain temporary stockpiles and reuse excavated fill material for backfilling; • carry out on-site sorting; • make provisions in the Contract documents to allow and promote the	Minimise waste impacts from excavated and C&D materials	Contractor	All construction sites	Construction phase	Land (Miscellaneous Provisions) Ordinance Waste Disposal Ordinance	Implemented Implemented Implemented

\$9.7.5.3 - \$9.7.5.5, \$9.8.1.6	Preparation and submission of Enhancement Woodland Proposal to EPD for agreement.	Recommend appropriate enhancement planting programme, planting and post-transplantation monitoring methodology, action plan for monitoring the enhancement planting and maintenance programme.	Project Proponent/ Detailed Design Consultant (qualified ecologist/ botanist) for Wooded Area Proposal.	Filled slope west of the platform, and north west of the platform in the valley below MacIntosh Fort Indicative locations for Enhancement Woodland should be referred to Figure 9.11 of the EIA Report	Prior to construction phase	Enhancement planting and establishment requirements to be detailed in Wooded Enhancement Proposal. TM-EIAO	Implemented *Woodland compensation plan was submitted to EPD.
\$9.7.3.1 - \$9.7.3.3	Indirect impacts due to potential changes in water quality, hydrology and sedimentation could occur to a series of downstream watercourses and wetland systems (including the wet woodland, marsh and mitigation ponds) during both the construction (for the Platform and LMHR widening works) and operational stages. Generally, indirect water impact to any aquatic fauna during the construction phase should easily be avoided by implementing water control measures (ETWB TCW No. 5/2005) to avoid direct or indirect impacts any watercourses and good site practices (further details are discussed in Section 6 of the EIA Report). In addition, construction phase impacts on the watercourses, riparian corridor and fauna using these areas will be minimised by erection of a 2m high, solid, dull green site boundary fence on the edge of any active works area, 30m from the watercourse. Where this is not practicable due to site constraints, demarcation fencing will need to be erected to prevent unauthorised encroachment into the riparian corridor by constructions works and traffic. Detailed mitigation measures will be designed at the detailed design stage.	Minimise the indirect impacts to Water Quality and Hydrology	Contractor /detailed design consultant.	On the edge of any active works area, 30m from The watercourse	Prior to commencement and during construction phase	• ETWB TCW No. 5/2005 • TM-EIAO	Implemented.

Notes:

- (a) A detailed Tree Survey Report showing all identified valuable trees and OVT will be undertaken in a separate Tree Preservation and Removal Proposal.
- (b) Wood resulting from tree removal should be recycled as mulch or soil conditioner for re-use within the Project or in other projects as far as possible e.g. for the construction of soft landscape work, were practical.
- (c) Contractor is responsible for landscaping during the agreed establishment and maintenance period. Other designated management and maintenance agents to take up maintenance and management of landscaping after end of agreed period
- (d) Highways Department (HyD) is responsible for maintenance and management of landscaping of public road side slope, Leisure and Cultural Services Department (LCSD) is responsible for the management and maintenance of soft landscapes along non-expressway public roads outside Country Park and Food and Environmental Hygiene Department (FEHD) is responsible for maintenance and management of landscaping of other areas allocated to FEHD.
- (e) The landscape mitigation treatment of the future development site shall follow the below frameworks:
 - Buffer planting shall be provided to soften the edge of the site.
 - Aesthetic landscape treatment including both soft and hard landscape features shall be provided.
 - Vertical greening shall be provided as far as practicable.
 - At-grade tree planting shall be provided as far as possible while planting space is allowed, to enhance the overall environment.
 - Architectural design shall blend in with the surrounding environment.
 - Overall greening ratio shall comply with TC(W) No.3/2012 Site coverage of Greenery for Government Building Projects.

CEDD Contract CV/2017/02

Development of Columbarium at Sandy Ridge Cemetery – Infrastructural Works at Man Kam To Road and Lin Ma Hang Road

Incident Report on Action or Limit Level Non-compliance

Project	CV/2017/12		
Date	5 Aug 2022	5 Aug 2022	5 Aug 2022
Monitoring Location	M1	M2	M4
Time	10:00	10:35	10:15
Parameter	Turbidity / Suspended Solids	Turbidity / Suspended Solids	Turbidity / Suspended Solids
Action Level	7.1 / 8.5	39.7 / 29.0	5.4 / 4.8
Limit Level	7.6 / 10.1	42.2 / 31.0	5.9 / 5.0
Measured Level	20.0 / 47.5	36.6 / 61.5	23.9 / 45.0
Exceedance	Limit level / Limit level	N/A / Limit level	Limit level / Limit level
Possible reason for Action or Limit Level Non-compliance	 Limit level Limit level Limit level According to the Contractor's work programme, construction of footpath was conducted on Lin Ma Hang Road and construction of road works was conducted on Sandy Ridge. The location map for water quality monitoring locations and site boundary of the Contract 2 is shown in Figure 1. According to the site photos taken by the monitoring team on 5 August 2022, the water flowing at M1 was slightly turbid and muddy water was observed at M2. Furthermore, water quality at M4 was visually turbid. (Photos 1 to 3) According to the weather data from Observatory, there was heavy rainstorm on 5 August 2022, in which Amber Rainstorm Warning Signals were issued at 4:08 and 13:08 on 5 August 2022 respectively. (Photo 4) Under the influence of rain, the water quality of seasonal watercourse was inevitably be affected by the stirred up sediment and erosion from the surrounding environment even outside the construction site. Site inspection by ET was conducted on 4 August 2022. In view of the geographical location of Contract 2, M1 is located at upstream of Nam Hang Stream and outside site boundary of Contract 2, it acts as upstream of M2 and there was no works carried out near M1. (Photo 5 and Figure 1). Construction of footpath at TTA3 was conducted near M4 on Lin Ma Hang Road, there was no discharge in view of the work nature and no adverse water quality impact was observed after rainy day. (Photo 6 and Figure 1). Construction of road works was conducted on Sandy Ridge, most of area was hard paved and no adverse water quality impact was observed after rainy day. Contribution of polluted water to Nam Hang Road to M2 through seasonal channel was unlikely (Photo 7 and Figure 1). In our investigation, there were no active work conducted near M1 and no adverse water quality impact observed at site areas during site inspection. In view of the current site condition, it was considered that all the exceedances were likely rela		
Action to be taken	Investigation concluded that the exceedance was not project-related, therefore, increase of monitoring frequency is not required according to EM&A Manual 7.8.1.3.		
Remark	N/A		

Photo Record

Photo 1

During the water quality monitoring on 5

August 2022, the water flowing at M1 was slightly turbid.

Photo 2

During the water quality monitoring on 5

August 2022, muddy water was observed at

M2. M2 was receiving water from seasonal
channel and M1, no works were carried out
near location M2.

Photo 3

During the water quality monitoring on 5

August 2022, the water quality M4 was slightly turbid.

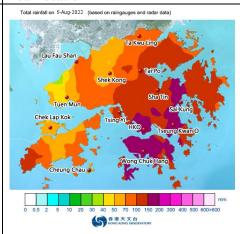

Photo 4According to the weather data from Observatory, there was heavy rainstorm on 5 August 2022.

Photo 5

In view of the geographic location of Contract 2, M1 is located at upstream of Nam Hang Stream and outside site boundary of Contract 2, it acts as upstream of M2. There was no works carried out near M1.

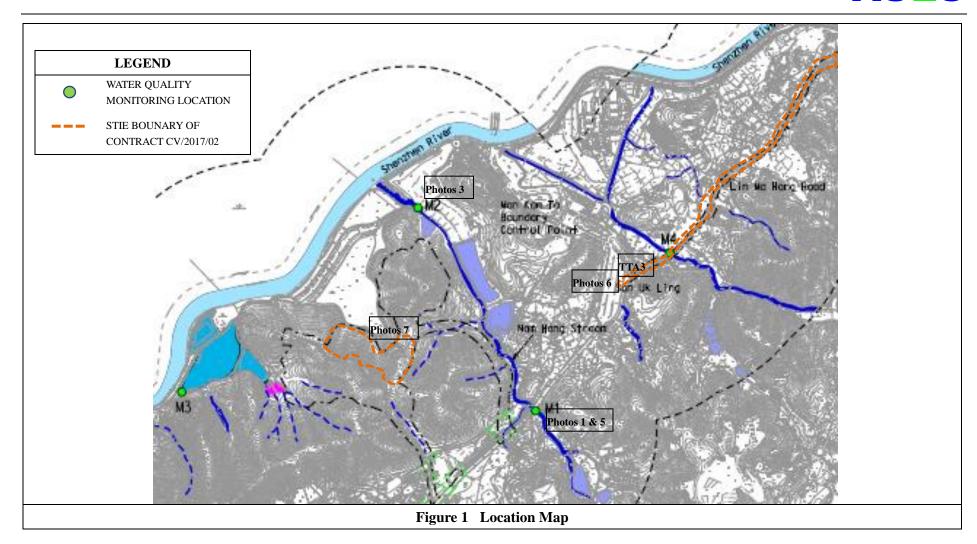

Photo 6

Construction of footpath was conducted near M4, there was no discharge in view of the work nature and no adverse water quality impact was observed after rainy day.

Photo 7

Construction of road works was conducted on Sandy Ridge, most of area was hard paved and no adverse water quality impact was observed after rainy day.

	/	/	/	/	/	/	
	Limit Level	Limit Level	Limit Level	Limit Level	Limit level	Limit level	
	 According to the Contractor's work programme, construction of footpath was conducted on Lin Ma Hang Road and construction of road works was conducted on Sandy Ridge. The location map for water quality monitoring locations and site boundary of the Contract 2 is shown in <i>Figure 1</i>. According to the site photos taken by the monitoring team on 10 and 12 August 2022, the water flowing at M1 was slightly turbid/ turbid and muddy water was observed at M2. Furthermore, water quality at M4 was visually turbid. (<i>Photos 1 to 6</i>) 						
Possible reason for Action or Limit Level Non-compliance	3. According to the weather data from Observatory, there was successive heavy rainstorm on 10 to 12 August 2022, in which Amber Rainstorm Warning Signals were issued at 12:15 on 12 August 2022. (<i>Photos 7 & 8</i>) Under the influence of rain, the water quality of seasonal watercourse was inevitably be affected by the stirred up sediment and erosion from the surrounding environment even outside the construction site.						
	4. Site inspection by ET was conducted on 11 August 2022. In view of the geographical location of Contract 2, M1 is located at upstream of Nam Hang Stream and outside site boundary of Contract 2, it acts as upstream of M2 and there was no works carried out near M1. (<i>Photo 9 and Figure 1</i>) Construction of footpath at TTA3 was conducted near M4 on Lin Ma Hang Road, there was no discharge in view of the work nature and no adverse water quality impact was observed after rainy day. (<i>Photo 10 and Figure 1</i>). Construction of road works was conducted on Sandy Ridge, most of area was hard paved and no adverse water quality impact was observed after rainy day. Contribution of polluted water to Nam Hang Road to M2 through seasonal channel was unlikely (<i>Photo 11 and Figure 1</i>).						
	5. In our investigation, there were no active work conducted near M1 and no adverse water quality impact observed at site areas during site inspection. In view of the current site condition, it was considered that all the exceedances were likely related to the impact of rainstorm and not caused by the work under the project.						
Action to be taken	Investigation concluded that the exceedance was not project-related, therefore, increase of monitoring frequency is not required according to EM&A Manual 7.8.1.3.						
Remark	N/A						

Photo Record

CEDD Contract CV/2017/02

Development of Columbarium at Sandy Ridge Cemetery – Infrastructural Works at Man Kam To Road and Lin Ma Hang Road

Incident Report on Action or Limit Level Non-compliance

Project	CV/2017/12						
Date	17 Aug 2022	19 Aug 2022	17 Aug 2022 19 Aug 2022				
Monitoring Location	M	1	M2				
Time	10:00	9:30	10:40	10:50			
Parameter	Turbidity / Sus	spended Solids	Turbidity / Suspended Solids				
Action Level	7.1 /		39.7 / 29.0				
Limit Level	7.6 / 1	10.1	42.2 / 31.0				
Measured Level	45.7 / 40.5	50.9 / 48.5	34.9 / 68.0	37.1 / 59.5			
Exceedance	Limit Level / Limit Level	Limit Level / Limit Level	N/A / Limit Level	N/A / Limit Level			
Possible reason for Action or Limit Level Non-compliance	According to the Contractor's work programme, construction of footpath was conducted on Lin Ma Hang Road and construction of road works was conducted on Sandy Ridge. The location map for water quality monitoring locations and site boundary of the Contract 2 is shown in <i>Figure 1</i> . According to the site photos token by the manitoring team on 17 and 10.						
	2. According to the site photos taken by the monitoring team on 17 and 19 August 2022, muddy water was observed at M1 and M2. (<i>Photos 1 to 4</i>)						
	3. According to the weather data from Observatory, there was successive heavy rainstorm on 17 to 19 August 2022, in which Amber Rainstorm Warning Signals were issued at 16:10 on 17 August 2022. (<i>Photos 5 & 6</i>) Under the influence of rain, the water quality of seasonal watercourse was inevitably be affected by the stirred up sediment and erosion from the surrounding environment even outside the construction site.						
	4. Site inspection by ET was conducted on 18 August 2022. In view of the geographical location of Contract 2, M1 is located at upstream of Nam Hang Stream and outside site boundary of Contract 2, it acts as upstream of M2 and there was no works carried out near M1. (<i>Photo 7 and Figure 1</i>) Construction of road works was conducted on Sandy Ridge, most of area was hard paved / hydroseeded and no adverse water quality impact was observed. Contribution of polluted water to Nam Hang Road to M2 through seasonal channel was unlikely (<i>Photos 8 & 9 and Figure 1</i>).						
	5. In our investigation, there were no active work conducted near M1 and no adverse water quality impact observed at site areas during site inspection. In view of the current site condition, it was considered that all the exceedances were likely related to the impact of rainstorm and not caused by the work under the project.						
Action to be taken	Investigation concluded that the exceedance was not project-related therefore						
Remark	N/A						

Photo Record

Photo 1

During the water quality monitoring on 17 August 2022, the water flowing at M1 was slightly turbid.

Photo 2

During the water quality monitoring on 19 August 2022, the water flowing at M1 was turbid.

Photo 3

During the water quality monitoring on 17 August 2022, muddy water was observed at M2. M2 was receiving water from seasonal channel and M1, no works were carried out near location M2.

Photo 4

During the water quality monitoring on 19 August 2022, muddy water was observed at M2. M2 was receiving water from seasonal channel and M1, no works were carried out near location M2.

Photo 6

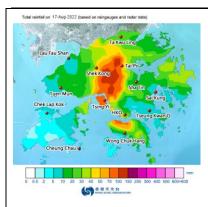

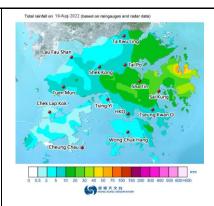

Photo 5

According to the weather data from Observatory, there was heavy rainstorm on 17 August 2022.

According to the weather data from Observatory, it was rainy on 19 August 2022.

Photo 7

In view of the geographic location of Contract 2, M1 is located at upstream of Nam Hang Stream and outside site boundary of Contract 2, it acts as upstream of M2. There was no works carried out near M1.
